Dependable Insurance Is The Only Kind Worth Having

When insuring your property make certain that you are assured of fair and speedy settlement of claims. Losing your property is tragedy enough without having to worry about settlements.

The dependable fire, casualty and automobile companies we represent have gained the reputation of settling claims promptly. It's a big help to get prompt action when in urgent need of money. But in order to do this, the companies must have prompt payment of premiums in accordance with their rule of either cash or forty-five days from date of policy. We do not have mutual, reciprocal or cut-rate companies.

Owing to an automobile accident I am forced to go to the hospital and will be away for a short time, but Mrs. Gertrude Fredenburg Greb, who has had seven years experience in accounting and insurance, Mrs. Mabel Showers and my brother A. L. Wakefield will have charge of the office during my absence. Also P. J. Newman and Geo. Neilson, Attorneys, will represent my agency.

I have been serving friends and clients here for the past twenty-four years and have always been glad to extend time on payments, but at this time I am very much in need of some settlement of your accounts and your prompt attention to same will surely be appreciated.

Very truly yours,
Gertrude Fredenburg Greb in charge during my absence.)

HOW THE BANK CONTRIBUTES TO COMMUNITY WELFARE

The bank is an integral part of community activity

A bank is a private enterprise only so far as it is founded upon private capital, which is attracted as it would be to any other legitimate business. Inasmuch, however, as the bank becomes custodian of the public's money and stands ready to serve any and all, it is a community institution.

There is, then, a mutual responsibility between community and bank—the bank that it temper its serviceability with the utmost caution—the public that it expect nothing from the bank that would be contrary to that principle of safe operation.

One frequently hears the remark, "Oh, that bank is too tight-fisted in its loan policy." Now, when you realize the bank's chief source of income is in making loans, then that very "tight-fistedness" is an indication that the depositors' protection, and not the bank's profit, is the predominating policy.
