

EARLY ACTION ON VOLSTEAD REPEAL HELD VITAL NEED

WASHINGTON, Nov. 25.—(AP)—Representative Snell of New York, Republican house leader, today urged adoption at the short session of congress a resolution to repeal the 18th amendment.

Speaker Garner has said he hoped and expected congress would legalize beer before the new year.

Snell, long ranked as a friend of the prohibition amendment, told newspaper men the people of the country would not be satisfied with beer of small alcoholic content.

"There is no question in my mind that the people of the country are not satisfied with the 18th amendment," he said.

"Not only the wets but the real temperance people believed that some regulation of the liquor traffic would be better than the speakasies we have at present.

"The best way, to my mind, to handle this is for the house judiciary committee to immediately bring up for consideration a constitutional

amendment along the lines of that proposed by Senator Carter Glass, of Virginia, in the Senate last year.

The Glass proposition provided for the federal government to retain constitutional power to protect dry states from liquor importations, and to outlaw the saloon.

"I would vote for such an amendment," said Snell. "The Glass amendment is almost exactly in accord with the wet plank of the Republican platform.

"We should get action at the earliest possible time and the quicker we get the prohibition question out of Washington the quicker we can give intelligent consideration to the big economic problems confronting this country."

Snell said he would want to see the proposed Democratic beer bill before he committed himself on it.

PORTLAND, Nov. 25.—(P)—An upward trend in commodity prices, suggesting improved labor and economic conditions, was seen here today.

An advance in butter early this week carried Portland prices to the highest point in the United States. An increase in cheese quotations followed.

For the first time in a very extended period, advances in canned salmon have been made, brought about by the greater call for the better grades which for months had been more or less neglected.

Prune prices are advancing in spots with all indications pointing to further betterment.

WORLD PARLEY TO STABILIZE WHEAT PRICE CONSIDERED

CALGARY, Nov. 25.—(AP)—The dominion government was requested to convene a world wheat conference in a resolution approved at today's session of the Alberta wheat pool's annual meeting. Delegates believed such a conference would lead to stabilize wheat prices and solve the present marketing problem.

The leading wheat-exporting countries of the world would attend the proposed conference. They would be Canada, Australia, United States and Argentina, who control 87 per cent of the world export wheat supply.

The resolution, unanimously approved by the pool delegates, referred to the serious plight of the wheat farmer, due to the drastic drop in prices and the lack of markets for his product. The delegates believed only by co-operation between the flour exporting countries could a solution to the problem of markets and low prices be found.

GIRL GOLFER, 14, TOURNEY WINNER

DALLAS, Tex.—(AP)—Youth will be served—and Betty Jameson, 14-year-old Dallas school girl golfer, is living proof of the age-old proverb.

This lassie, who knows all about the fairways and greens but little about bunkers and traps because she is seldom in the rough, holds three gold titles.

She recently won the Texas municipal championship for women, and followed through by beating a debatable field for the Dallas city championship.

Then she added another conquest by winning the Dallas Lakewood Country club championship, putting together a 41-42-43 in the finals—about her average game on any course.

Husky for her age, Miss Jameson hits a long tee shot, is accurate with her approach clubs and a fine putter.

She is ranked with Antela Gorceyva of Fort Worth and Mrs. Dan Chandler of Dallas as one of the three best shot-makers in the section.

SWEETER BEETS ARE FARMER'S OBJECTIVE

LANSING, Mich.—(AP)—"Sweeter" sugar beets this year, with higher sugar content, will mean more cash to meet the mortgage and pay for farm improvements.

It is estimated that the Michigan sugar beet crop this year will be worth close to \$8,000,000.

The probable average yield is 10 tons to the acre, and a return of \$6 per ton is forecast, giving a cash return of \$60 an acre. The 10-year average has been \$56.81.
