Beware of Colds NOW

With Flu in the Air Colds Are Doubly Dangerous Colds—always treacherous—are doubly dangerous now, with flu reported in many sections. They lower body strength and pave the way for flu and all its serious complications. Heed even the slightest sniffle as a danger signal. It's no time to take chances.

The safest course to follow is that outlined in Vicks Plan for better Control-of-Colds. In clinical tests last winter, Vicks Plan reduced the number and spread of colds by half!—out their dangers and costs more than half! Full details of the plan are in each Vicks package. Briefly, it is this:

TO PREVENT MANY COLDS: At that first feeling of stuffiness or nasal irritation, snuffle or sneeze—Nature's usual warning that a cold is coming on—use Vicks Nose & Throat Drops, the new aid in preventing colds. Vicks Drops aid Nature in throwing off the infection that threatens. They prevent development of many colds.

TO END A COLD SOONER: If a cold has developed or strikes without warning, vigorous measures are necessary. At bedtime, apply Vicks Vapo Rub. Its direct double action—continuing through the night—brings quick relief. During the day, use the convenient Vicks Nose Drops every few hours as needed. They aid to comfort—help shorten the cold.

Follow Vicks Plan for Better CONTROL of Colds
