

JACKSON COUNTY DELEGATION AIDS SALE TAX DEATH

(Continued from Page One)

for presentation has not deterred the Medford group from acquainting the individual members of both houses with its contents.

So enthusiastic did L. P. Allen, chairman of the house ways and means committee, become over its possibilities, that he sent a typewritten copy of it to the county clerk of Walla Walla county, where he resides.

FUNERAL SERVICE FOR R. SKINNER THURSDAY

The funeral services for Robert John Skinner, 16, son of Mr. and Mrs. E. A. Skinner, has been set for Thursday morning at 11 o'clock, at the home of the Rev. W. H. Eaton of the Baptist church.

SOCIETY and Clubs

Colborne-Schoeni Wedding in Toledo
Coming as a surprise to their many Medford friends was the news made known today of the wedding in Salem on New Year's day of Miss Grace Colborne, daughter of Mr. and Mrs. H. M. Colborne of Portland, to Arthur L. Schoeni of this city.

The ceremony was performed on the afternoon of January 1 by the Rev. Johnson of the Leslie Methodist church in the capital city.

Mrs. Schoeni, graduate of Oregon State college, is art instructor at the Medford Junior high school. On the Corvallis campus she was associated with Gamma Phi Beta, social sorority, and took a prominent part in school activities.

Mrs. Schoeni, correspondent for the United Press at the state legislature in session at Salem, was formerly associated with the morning newspaper here as news editor, and previously was journalism instructor at the Medford Senior high school.

A graduate of the University of Oregon, Mr. Schoeni was editor of the Oregon Emerald, student daily, during his senior year, and was a member of Sigma Pi Tau, social fraternity. He was also affiliated with Sigma Delta Chi, men's national journalism honorary.

Kiwanian Banquet Large Event of Monday
Fifty guests gathered at the colorful tables arranged at St. Mark's Guild hall last evening for the annual banquet and installation of officers of the local Kiwanis club.

The banquet was interspersed with telegrams from notables unable to attend and a splendid program was presented.

James Stevens, well known local sociologist, thrilled his audience with two spirited numbers, and Sebastian Apollo, pianist, also entertained with two enthusiastically received compositions.

"Faith in the Future" was the subject of the main address of the evening given by Frank Jenkins, president of the Southern Oregon Publishing company and member of the Klamath Falls Kiwanis club. His splendid and encouraging talk was received with much applause by the Kiwanians and their guests.

After the program the impressive presentation program was held, and Ted Geibauer, new Kiwanian president, was crowned king as strains of "All Hail to the King" echoed through the hall. Olen Arnsberger acted as installing officer and other newly elected leaders of the club were formally guided into office.

The remainder of the evening was devoted to bridge and other games. The splendid program was arranged under the leadership of John O. Mann, chairman for the evening.

Altar Guild Had Catered Dinner
Mrs. R. W. Frame was hostess last evening at her home at Phoenix to members of Altar Guild of St. Mark's church, Episcopal, at catered dinner and general social evening. She was assisted by her daughter, Miss Dorothy Carless.

Plans for a dancing party, honoring the younger set of St. Mark's, were made and the affair will be held in the near future.

The previous meeting of the Altar Guild was held at the home of Mrs. Porter J. Neff, who was assisted by Mrs. James Stevens, Mrs. Royal Bebb, and Mrs. Wm. Hamilton, Jr. Sewing for the Red Cross was started.

Christian Church Group To Meet on Wednesday
The Women's association of the Christian church will meet Wednesday afternoon at 2 o'clock in the church basement for installation of officers. The retiring officers will be hostesses for the afternoon and an invitation is extended all women of the church.

Newly elected officers to be installed are: Mrs. L. A. Staborn, president; Mrs. Mable Marsh, vice-president; Mrs. Roy Guyer, secretary; Mrs. Minnie Crisp, treasurer.

That TECHNOCRACY Question

NO. 3—MACHINES AND JOBS

EDITOR'S NOTE: This is the third of a series of six daily articles giving a new insight into Technocracy whose prediction of possible economic collapse started a far-flung controversy. The articles also present other statistics pertaining to displacement of men by machines, energy consumption, debts and other points involved.

(Copyright, 1932, by The Associated Press.)

NEW YORK (AP)—A new "money," an exact, invariable token of exchange based on energy, is one of the tentative proposals of Howard Scott, director of Technocracy, as a need of this economic system.

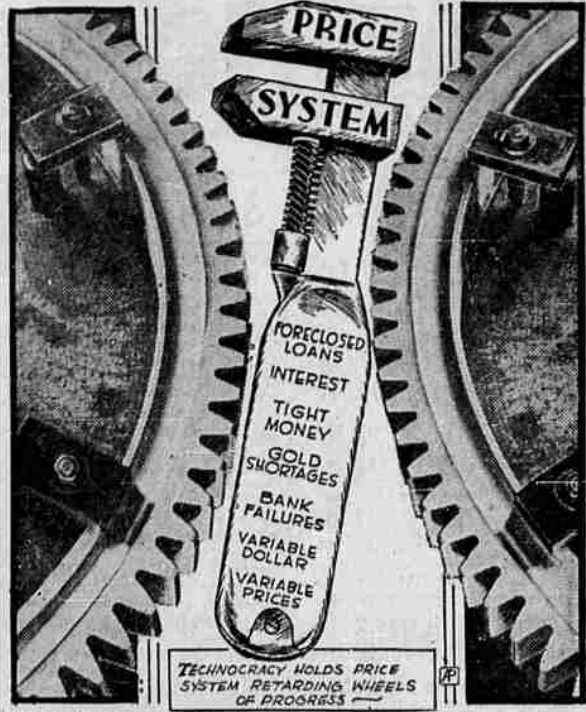

But why a new money? Because, in the eyes of Scott, the present system of exchange, coupled with other attributes of the price system such as debt, interest, and the dollar's variability as a measure of wealth, interferes with the machine and social progress.

This is part of the paradox of poverty in the midst of plenty, wherein huge factories lie idle, willing and physically able to produce, but prevented from doing so because of the lack of purchasing power among the people—a lack partly accounted for, according to Scott, by the concentration of money in the hands of the few.

Says "Price System" Finished.
Does Scott propose the total abolition of the price system, of banks, of interest, of mortgages and finally of the dollar itself?

The present system is finished, Technocracy says, and the country must realize that the price system will no longer work. Neither Scott nor Technocracy has publicly explained fully what a new system of direction would include, so far as the replacement of the present exchange system is concerned.

A unit of "value" under the price system, as Scott describes it, is a "certification of debt"—a lien, theoretically, against a physical entity. Under technological control, a unit of "measurement" would be a "cer-

The sketch above, showing the price system as a monkey wrench in the wheels of social progress, illustrates a basic theory of Technocracy, a research group at Columbia university. Debt and other attributes of the price system prevent, according to Technocracy, the natural flow of goods and allow the present paradox of poverty in the midst of plenty.

ification of available energy produced. Instead of trying to value goods in terms of dollars of variable purchasing power, Technocracy would measure the energy produced—so to speak, would measure the income instead of the capital—in calories, ergs, foot pounds, British thermal units, horsepower or with some of the other terms for energy measurement which are theoretically exact and which would be used-up.

This, Technocracy holds, would prevent debt and huge accumulations of wealth. The individual would receive a proportionate share of the energy produced. He would spend it in certain ways for the things he desired. The energy unit would not

be a measure of desire as is the dollar, but a measurement of what actually was available and might be economically given to the people. All of this implies central distribution of income and a more rigid control of the division of goods.

Economists are critical of such proposals. George Soule, economist and associate of the New Republic, says if the nation could have such control as this, present old-fashioned money would do quite well.

As for Scott's statements that energy units would furnish exact measurements, an economist for a Wall street financial house points out that the amount of energy produced from coal oil and waterpower is variable and that the measurements of it are also variable. Unless Technocracy proposes absolute control of the entire economic system, this economist says, the more efficient user of fuel would receive more income and would accumulate things again, unless the state prevented such accumulation.

Another economist holds, more or less facetiously, that "energy money" could be quite easily bootlegged. The hills might be full of "illicit stills" for the manufacture of energy which would be wired secretly to towns and cities.

It might be transported across national lines, if such lines were allowed in a technologically controlled system. And what would happen if transmission of power were made possible by radio, a possibility now receiving considerable study? These would be, the economist said, factors tending to make energy extremely unstable.

Many economists have proposed a commodity dollar to alleviate the generally admitted evils of the present variable dollar. Such a dollar would be allocated purchasing power according to a commodity index and would vary as the supplies of the various commodities varied.

Thus, money would always have approximately the same purchasing power and debts would not vary in their burdensomeness.

Tomorrow—Machines and Debts.

TIGERS AND SONS FROSH TO CLASH HERE FRIDAY EVE

Medford high school's Tiger quintet will sharpen its teeth for future battles Friday night when the team meets the freshmen from the Oregon Normal school in the main game at the local high school gymnasium.

Coach Darwin K. Burgher, in announcing the game this morning, declared that the game should be fast, and will provide his team with the practice so necessary to successful competition later on.

The Jacksonville town team, coached by Dr. Harold Gillis, will oppose the Tigers on Saturday night. It was also announced, with the Friday night game starting at 8 o'clock, and the Saturday night game at 9 o'clock.

Friday night's main game will be preceded by a game between the Tiger Cubs and the Junior high school team. The Tiger Cubs will also play a preliminary game Saturday night, the opponent to be picked later. Friday night's preliminary game will start at 7 o'clock, Burgher announced, and Saturday night's preliminary at 8 o'clock.

Medford's Tigers are fast whipping into shape, Burgher announced, and if improvement continues, Medford should have one of the outstanding teams of the state, despite a lot of new material.

The Ashland Normal freshmen present some of the hardest competition the Tigers will have to face this year, as the team will be composed of former high school stars, not only from valley teams, but from other high schools of the state. The line-up for the Normal freshmen has not been announced, but Burgher indicated they would be hard enough to beat, at best.

EMIL MOHR DIES SUDDENLY AFTER LONG ILL HEALTH

(Continued from Page One)

He purchased a farm near Fresno, Calif.

In 1898 he journeyed to Alaska during the Klondike rush, and established a mercantile business, with Dawson City as his headquarters. He built up a large business, with an extensive trade throughout the Yukon territory. After 10 years in the northland, he sold his interests. In 1910 he moved to this city and engaged in the hotel business with W. F. Rau. In September, 1911, he took charge of the Hotel Medford, and became its owner.

Praternally, Emil Mohr belonged to the Dawson Lodge of Masonry, Medford Lodge, 103, A. F. & A. M., Malta Commandery No. 4 Knight Templars, Ashland; Medford Rotary club, Hillah Temple of the Shrine, the San Jose, Calif. lodge of Odd Fellows, the Medford lodge, B. P. O. E.

"NOT CONSTIPATED FOR SEVEN WEEKS"

Writes Mrs. Johnson After Using Kellogg's ALL-BRAN

Sufferers from constipation will be interested in this unsolicited letter:

"Your ALL-BRAN surely relieves constipation. I am so glad over the good it has done me that I feel I must write and tell you of it.

"For lunch I take a banana, a large one. Six tablespoons of ALL-BRAN in a sauce dish, and dip banana at each bite until all is consumed. I haven't been constipated now for seven weeks."—Mrs. Louise Johnson, 1433 Forest Street, Denver, Colorado.

Constipation often causes headaches, loss of appetite and energy, sleeplessness. This condition is usually due to lack of "bulk" to exercise the intestines, and vitamin B to further promote regular habits. Kellogg's ALL-BRAN has both, as well as iron for the blood.

The "bulk" in ALL-BRAN is much like that in leafy vegetables. Within the body, it forms a soft mass. Gently, it clears out the wastes. Try ALL-BRAN in place of patent medicines—often harmful. Two tablespoons daily will overcome most types of constipation. Chronic cases, with each meal. If not relieved this way, see your doctor.

Use as a cereal, or in cooking. Recipes on the red-and-green package. Sold by all grocers. Made by Kellogg in Battle Creek.

Cold Relief QUICK!
Start taking Licoquid at the first sneeze or sniffle. Relief comes quickly. Many say in 30 minutes. Licoquid is the popular new liquid cold prescription. Get a bottle today—have it on hand.

"I'm glad we Looked at All Three!"
A CERTIFIED INTERVIEW WITH EDWARD TRUMBULL (ARTIST), 166 EAST 38th STREET, NEW YORK CITY
"Look at All Three" was a sporting proposition. So we looked at the other two low-priced cars."
"Then we saw the new Plymouth. The first thing I noticed, naturally, was the beautiful design!"
"My wife just couldn't stay out of the car. We both agreed that Floating Power sure is smooth!"
"We like it better and better all the time. It's a good-looking car. And it uses hardly any gas at all."
"If you ask me, Plymouth is America's next Number One Car"
TALK to any Plymouth owner! Ask him how he likes his car! You'll find the same enthusiasm everywhere you go.
Edward Trumbull's case is typical of thousands. Like the rest of us, he wanted to be sure of getting his money's worth.
That's why "Look at All Three" appealed to him. It sounded fair. So he looked, studied, compared... then bought a Plymouth.
Word-of-mouth is the strongest kind of advertising. Happy owners are a car's best salesmen. And Plymouth owners are happy!
Talk to Plymouth owners about Floating Power engine mountings! Ask them about Hydraulic Brakes... a safety-steel body!
And then ask a dealer for a Floating Power ride! You won't be pressed to buy!
