### DRIVE FOR WHEAT TO AVERT HUNGER STARTED IN CHILE

SANTIAGO, Chile—(AP)—Fearing future food shortages and the necessity of using some of the Central Bank's badly needed gold for purchases abroad, the government has ordered provincial officials to make an intensive campaign for more wheat.

The administration hopes to have 1,652,840 acres sown in wheat for next season, a figure far above present acreage.

The government announces that it will fix a minimum price, and that if any farmer is unable to sell his wheat, the commissariat of price control will take over his grain at that figure.

President Arturo Alessandri's farm colonization plan also is expected to aid in the increase in production of wheat. He hopes to have both collectives and co-operatives functioning before the next season.
