

EASTER SERVICES FILL CHURCHES OF CITY AND VALLEY

Churches of Medford and the valley were filled with worshippers yesterday, who, undaunted by the rain, and hail, which peppered Easter bonnets, came to their favorite altars to sing again the sacred hymn, "He is Risen."

Pews pervaded with the fragrance of lilies and other blossoms, repeating His promise of renewed life, were crowded with church members and guests in celebration of the joyousness of Easter.

Special music was offered with the sermon in most churches. At the Protestant church, a cantata was also presented in the evening under the direction of Mrs. Elsie Carlton Strang with Miss Dorothy Reynolds at the organ. Miss Marjorie Moore at the piano, Miss Marjorie Foley at the violin.

At the Christian church, where the visiting evangelist, Reverend Teddy Leavitt, is holding services, space could not accommodate the crowds. In order that all who came might hear an Easter sermon, however, Rev. W. R. Baird, the pastor, conducted services at the same hour in the church basement.

The Sacred Heart church, Catholic, which each year observes Easter day with several very beautiful services, inviting the public to join the members in rejoicing, again yesterday received many visitors at high mass at 8 o'clock and low at 10:30. Special music for high mass was directed by Sebastian Apollo, organist, with the following singers participating: I. E. Foy, Raymond Miksche, Mrs. John Wilkinson, LaVerne Sutherland, Mrs. Rupert Maddox, Mrs. August Singler and Edna Zifer. Father Francis W. Black delivered the Easter sermon and words of welcome. Following the early mass the men of the church were entertained at Parish hall at breakfast, served by the women.

Three services at St. Mark's church, Episcopal, were attended by large crowds and the special music was directed by Father Wm. B. Hamilton with Mrs. H. O. Purucker at the organ, was received as among the most beautiful contributions of the year.

At the First Methodist Episcopal church special Easter music was provided by Mrs. Henry Huebner and Mrs. C. A. Meeker. Easter program was presented at the Methodist church, South, to a large congregation at 10 o'clock. There was special music at St. Peter's Lutheran church and at the Zion English Lutheran church, under direction of Mrs. George Andrews. An Easter program was also presented in the evening. At the Baptist church special music was under direction of Mrs. D. V. Platt.

Promising to bring publicity of unlimited value to southern Oregon along with other regions of the Pacific Northwest a series of motor cruises, was announced Saturday by the Portland Oregonian and the Oregon State Motor association, and letters received here today by Lee Garlock, local representative of the Motor association, state that the newspaper representatives and Ray Conway of the motor association with other members of the tour will join the caravan from Medford to Crater Lake next Sunday.

The cruises will provide material for a series of 13 full-page articles, the first of which will appear next Sunday, collectively the articles will comprise the most comprehensive survey of the outdoor Oregon country ever undertaken, announcement in yesterday's Oregonian stated. Purposes of the articles is to publicize recreational advantages of this area as a vacation territory. The articles in the Portland newspaper will be written from the viewpoint of the outsider and readers will be invited to send the pages to their friends in other localities. More than 2,000,000 pages will be published in the entire series.

Mr. Garlock will meet the tour at Crater Lake next Saturday noon and continue with the group to Medford for Saturday evening. The Portlanders and Mr. Garlock will then join the lake caravan to be sponsored by the Medford chamber of commerce.

The first article in the series will appear in next Sunday's Oregonian and will consist of a survey of the Northwest playground, the newspaper states. Succeeding articles will relate the adventures on specific trips.

Travelers on the various expeditions out from Portland will be Mr. Conway of the Motor association and Edward M. Miller, well known Oregonian staff writer and automobile editor.

Blank forms for making application for loans from \$25.00 to \$300.00 may be secured at the Medford office of the county agent, where other necessary information can be secured and assistance rendered in filling out the applications in accordance with the regulations governing the crop production loan work.

These loans are for the purpose of assisting the farmers to secure seed, spraying and dusting material and fertilizer in producing the 1933 crop.

Now that the system is in full operation applications are going thru more promptly, according to Mr. Pankey, and applications filed recently were returned for record with the checks for the growers in a period of ten days, where the applications were correct in all details.

CRATER CARAVAN TO SHARE STATE PUBLICITY STUNT

Carl L. Margreiter appeared before Justice of the Peace William R. Coleman this morning on a charge of drunken driving, and was sentenced to serve 30 days in the county jail, and fined \$100 and costs. The sentence automatically carries with it suspension of the driver's license for one year.

"There is one thing this court will not tolerate, and that is drunken driving," said the court in passing sentence. "There will be no leniency when a man is drunk and driving, and endangering the lives and property of others. If after you have served a portion of your sentence, and are able to pay your fine, the court might order your release. The court won't say that under those conditions it will release you—but it might."

Sanford Rose, charged with driving an auto with four people in the front seat, failed to appear when his name was called and his case was postponed until a later hour.

HARD JOLTS WAIT DRUNKEN DRIVERS

SHOE REPAIR SHOP moved from 41 S. Front to 122 N. Central. County shoe repairing, H. P. Preab.

ASTHMA

Sufferers can now sleep normally by using R. M. B. Prescription. Thousands of stubborn cases of Asthma, Hay Fever and Bronchitis have been cleared up. Why suffer longer? R. M. B. taken internally—goes to the root of your trouble. Send the coupon today for full information.

FARMERS WISHING CROP LOAN ASKED TO SPEED FILINGS

Farmers who are contemplating securing loans from the Crop Production Loan office should do so at an early date, according to H. T. Pankey, assistant field inspector, who is in Medford today in the interests of the Crop Production Loan office.

According to a ruling of the United States Department of Agriculture the time for filing these applications will close on April 30th; that is, the applications must be mailed in time to be presented at the Crop Production Loan office in Minneapolis not later than April 30, 1933. To insure arrival within the specified time the applications should be mailed not later than April 25th.

Blank forms for making application for loans from \$25.00 to \$300.00 may be secured at the Medford office of the county agent, where other necessary information can be secured and assistance rendered in filling out the applications in accordance with the regulations governing the crop production loan work.

These loans are for the purpose of assisting the farmers to secure seed, spraying and dusting material and fertilizer in producing the 1933 crop.

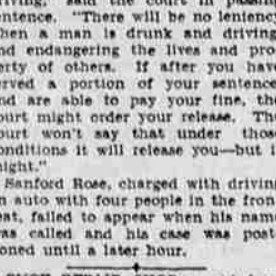

Now that the system is in full operation applications are going thru more promptly, according to Mr. Pankey, and applications filed recently were returned for record with the checks for the growers in a period of ten days, where the applications were correct in all details.

You Can Be Loulier This Way

New, wonderful MELLO-GLO powder makes your skin look fresh, tempting, made by a new French process it spreads with surprising smoothness, stays on longer, hides tiny lines and wrinkles, prevents large pores, ugly skin blemishes. No drawn or "pasty" look. No irritation with purest face powder known. Buy delightfully fragrant MELLO-GLO today, 50c and \$1.00. Tax free.—Jarmin & Woods Drug Store.

SMITH TELLS HOW TO SNARE JOBS IN DEPRESSION DAYS

(By Walter L. Smith.)

The average man is looking for the wrong thing or the wrong job for a livelihood and is going broke on the strength of the desire for a big job, or a steady job with a big income. It is nice to have but they are passing up some very good opportunities. They are passing up the dimes trying to get the dollars. Try to catch the rolling dime for a while. It doesn't roll rarely as fast as a dollar, because it is smaller.

Now, we will get down to how to catch them. Most anyone can raise twenty-five or fifty cents for a little work around the place but they cannot think of paying out a dollar as a rolling dime for a while. It doesn't roll rarely as fast as a dollar, because it is smaller.

We will now try to sell our labor for a small amount instead of trying to sell it for a great price. Like the land owner who found he could not sell his 10-acre tract for \$100 as no one would think of putting out that much money, so he cut it up in small tracts and sold it off in small lots at \$100 each. We could all raise \$100, so we all bought lots and he got his \$1000 in short order. He profited by his experience, so let's try our labor the same way.

We will start down the street to sell our labor. The first house we come to we will try to sell, say, one hour labor. Not a month's work or anything like that, but just one hour's labor at 50c. Now you say, for what? What can I do for that hour's labor? Here is what you can do, which is all honest labor and anyone of these might put you into a steady job for yourself by selling a little of any of these little jobs to the residents of your own town.

You can do this: Trim or cut the lawn, fix up the flower garden, trim up the shrubbery, clean up the backyard, clean up the basement, wash the floors and woodwork, clean the walls and draperies, fix up the fences, woodshed or outbuilding, screens, and so on, tell there are a lot of jobs around the house that are too numerous to mention.

Now, say we have sold one of the jobs to the party. Now see that you do your part; put out a job that you are proud of and know that you would be willing to pay the price for and think you are getting a bargain, then you can expect another job just like that. You are selling your labor instead of selling some little article in the store, so see that you have a satisfied customer. Don't be discouraged in the first house that turns you down, because maybe the next house is wishing for someone to come along to do just what you can do.

When you start, make a system—

Why is it necessary to urge people to be kind to animals, asked a well-known radio announcer in his announcement of "Be Kind to Animals Anniversary," which this year is being observed nationally from April 17 to 23. The answer to that question comes from Mrs. H. D. McCahey of the Jackson County Humane society, who writes:

"There are few people who are intentionally unkind to animals, but I wonder if many realize the suffering endured before meat and fowl is delivered to the dining table.

"Though stockmen and poultry farmers may meet all the conditions imposed in the shipment of their product to the market places, and though practically all of these shipments are inspected by humane society officers, there are still revealed hundreds of thousands of casualties annually.

"Through the efforts of humane societies crates must be of regulation size to permit the animals to stand upright and the number allowed in each size crate is limited. Food and water must be supplied at specified intervals. These regulations are generally complied with. But still it seems impossible to do away entirely with injury and suffering because of lack of consideration on the part of those handling shipments.

"Frequently great trucks are seen carting poultry along city streets or

country roads with crate piled upon crate over jolly roads, where each jolt means agony to some of those victims on the way to slaughter.

"In the unloading of the crates they are often dropped heavily, with a resultant injury to head, wing or limb of the fowl, which, too, are often left confined for a considerable period without food or water before being butchered.

"Dr. Francis H. Rowley, chairman of the national committee on slaughter reform, reports that besides unnumbered millions of poultry, there are slaughtered annually in the United States over one hundred million four-footed animals. One humane society reports that in 303 carloads of stock it examined there were found 558 casualties, which included 235 crippled cows, calves, hogs, sheep and horses, and 323 dead cow-calfs, hogs, sheep and horses. This,

despite the fact that humane societies have brought about some stringent laws with regard to the shipment of stock within the last few years."

THE SECRET IS OUT

76 ANTI-KNOCK LEADERSHIP MADE POSSIBLE BY BLENDING OF 4 GASOLINES

IN THE way 76 is made we find the secret of its anti-knock leadership.

FIRST Crude oils of high quality are run through modern, continuously operating stills to produce two "straight run" gasolines—one light and the other heavy. The light gasoline is not only rich in fractions which provide quick starting and rapid acceleration, but it has high anti-knock value as well.

SECOND The heavy gasoline gives speed, power, and good mileage but in its original form is deficient in anti-knock qualities. To build these up and still retain its other characteristics it is "reformed" by a new process which operates at temperatures above 950° Fahrenheit.

THIRD Carefully selected heavy oils, much heavier than kerosene, are subjected to a combination of high temperatures and tremendous pressures. This process produces a "cracked" gasoline of extremely high anti-knock value.

FOURTH Natural gas produced with crude oil from the wells is treated to recover from it a small amount of volatile material called "natural gasoline." This is collected, transported under pressure to the refinery, and "stabilized" to remove from it the fractions which would cause vapor locking trouble in use. The "stabilized natural gasoline" has the ability to maintain high knock resistance under severe summer operating conditions.

THEN All 4 gasolines are purified to be certain that objectionable gum, acid, and other harmful ingredients are removed.

FINALLY The 4 gasolines are scientifically blended to produce 76—the highest anti-knock non-premium fuel ever offered.

New Motor Method of Anti-Knock Testing

As a further protection to the quality of 76, the Union Oil Company has in-

stalled the new official Cooperative Fuel Research "motor method" test engine approved by the American Petroleum Institute. This is the present standard method for accurately testing actual road performance in the laboratory.

Every batch of 76 is thoroughly tested on one of these machines—your guarantee that the higher anti-knock rating of 76 will be maintained under actual operating conditions and not break down on the road as do many non-premium fuels now claiming high anti-knock value.

YOUR GAIN

The increased anti-knock of 76 not only means new smoothness and the elimination of knocks—it means more power and MILEAGE than any fuel selling for the same price.

Don't pay \$1.00 for gasoline and get 50c worth of anti-knock power and mileage. Use 76 and get your full dollar's worth. Here is your guarantee!

The 76 Guarantee!

Easy to Find

To secure 76 just watch for the big orange and blue 76 banners. Then be sure the gasoline you get is colored orange—and comes from the 76 pumps.

Accept nothing "just as good"—because there isn't any. Insist on 76.
