

FOREIGN TRADE HOPE BRIGHTER THAN FOR YEARS

Annual Convention of Council Told Transition Stage Promises Substantial Progress in Settlements

By MAREN GRAHAM. Associated Press Staff Writer.

PITTSBURG, April 27.—(AP)—The 20th annual convention of the national foreign trade council opens in an atmosphere of more confident assurance regarding the future than has prevailed at any time during the past three years.

"We are in a transition stage that promises substantial progress toward international understanding and settlement of major questions bearing upon the world economic situation," he declared.

Can Meet Competition. "Our manufacturers have not lost their skill, or their capacity to produce on a competitive cost basis. With the revival of buying abroad, our exports of finished manufacturers will again be in demand and constitute a chief item of our export trade."

"The most pressing need at present is the establishment of sound currencies in all countries." As "father" of the convention, which he helped found while president of the United States Steel corporation, Mr. Farrell's annual speech, gathered with much care and revision to conform with kaleidoscopic events of the past week, was the highlight of the opening of the three-day convention.

Europe Partly Blamed. Farrell laid much of America's trade plight to failure of Great Britain and other European countries "to adapt mechanics of industry to the new industrial order" and to "adoption of various artificial devices for resuscitation of their commerce."

"These devices have proved to be secondary exciting causes that now constitute the chief problems with which a world economic conference has to deal in an effort to harmonize national policies," he said. The "devices" he described as a "vicious circle created by depreciated currencies, exchange controls, embargoes on imports, quotas and other fantastic schemes which operate in restraint of international trade."

Tariff Not Main Issue. Farrell contended that tariff is not a major issue today, citing that England in reversal of her fiscal policy, with protective tariffs now averaging 33 1/3 per cent, "has not solved this problem."

"Are we not justified, therefore, in claiming that the tariff law of the United States is not a major issue in discussion of the causes of world trade stagnation?" he asked. Defending America as a creditor nation, Farrell said the government and private investors have loaned 30 billions of dollars abroad while tourists spent an average of \$800,000,000 annually.

"If these factors have ceased to operate," he said, "defaulted loan services have dried up the American market. 'I feel I do not speak for myself alone when I say that our national trade interests should be safeguarded against any further exploitation of American generosity.'"

Lowell of Boston, who released George Crawford, negro, wanted in Virginia in connection with murder. Salvation Army to Stage Show Friday at Local Barracks

The Salvation Army's Young People's division is endeavoring to raise funds in order to carry on the work here.

In order to do this, we have selected a one-act comedy, "Squaring It With the Boss," written by J. C. McMullen. This comedy is guaranteed to keep you laughing from start to finish.

Two old maid aunts, Hortense and Clara, are hopeless lovers of parrots and cats, from which many fights ensue. Jimmy and Beth are a young married couple, who become implicated in a lie told to Mr. Dunne. Jimmy's boss Johnny Bender, a nine-year-old boy, takes the part of a baby and gets the young couple in no little amount of trouble.

In addition to the play, Mr. J. Buchanan will give a trumpet solo, while the two Wilder boys will also entertain. Mr. Buchanan has also arranged other musical skits and short numbers, which are sure to please.
