

# HOMEMADE PLANE FLIES WELL FOR PHOENIX BUILDER

Ocell Hartley, well known resident of the Phoenix-Talent farming district, has taken to the air again—this time in a plane of his own making, with which he completed a 17-minute flight, it was announced today.

Hartley, who a few years ago was successful in competing a glider which would work, started construction of a plane two years ago. It is now completed and a flight from the fairgrounds field yesterday proved it, too, will work.

It is a high-winged monoplane and Hartley has been seen several times this week transporting it from his home to the fairgrounds, where there is no hangar in which to house it.

A four-cylinder motorcycle engine is used to furnish the power with power and from the exterior it has all the appearance of a factory job.

Since Hartley is color blind he has been unable to obtain student instruction from licensed pilots and was forced to learn the art of flying on his own. It is also impossible for him to fly from the Medford airport, a licensed field, because of his failure to qualify for license. His plane is eligible for government identification number, however it was pointed out today, so he is enabled to fly from an unlicensed port.

**Cake Complexions.**

Maybe, if we thought of the outside appearance of our cake as its complexion, we'd find it as interesting as it deserves to be. Actually, an icing can almost make or break the appearance of any cake and, of course, it can do about the same thing to its flavor. Therefore, a variety of icings and fillings should be kept close to the cake recipe file, so as to remind us of a seasonally that a change might be enjoyed and is available for the baking.

Some combinations are especially pleasing to most people, such as orange or mint flavored icings for chocolate cakes, as a change from the ordinary chocolate and vanilla coverings. Lemon, orange, banana and pineapple are good on white cakes, and maple is good on almost any type of cake. Angel cake icings, if used at all, are delicately flavored with rose, almond or pistachio for variation. Then there are fruits, nuts, preserves and spices to add their luscious flavors to that of the ordinary tastes. Now, honestly, have you realized the complexion side and pitfalls that confront the cake maker? Or, rather, did you remember the many, many possibilities for improving the flavor and appearance of your own favorite recipe by changing the outside covering to suit the hour? Here are some good foundation recipes and we leave the variations to your pleasure.

"All Around."

2 1/2 c sugar  
1/4 c light corn syrup  
1/4 c water  
2 egg whites  
1 1/4 t vanilla  
Combine sugar, syrup and water and cook to 240 degrees, or a five-inch "string." Pour slowly over the stiffly beaten egg whites and beat until almost stiff, adding vanilla as you beat. (This icing can be kept in a covered dish several days.)

Seven-Minute.

2 egg whites (unbeaten)  
1 1/4 c white sugar  
1/4 t cream of tartar  
5 T cold water  
1 t flavoring, or  
3 sq. chocolate (melted)

Put first four ingredients into double boiler and beat with rotary beater over rapidly boiling water until the frosting stands up in peaks. Remove from heat and add the flavoring slowly. Do not beat more but cool slightly before spreading on cake.

Maple Seven-Minute.

1/4 c maple syrup  
1 c sugar  
1/4 t cream of tartar  
2 egg whites, unbeaten  
1 t vanilla  
Make as any "Seven-Minute" icing. Minute Pedre Icing.

1/4 c cocoa  
1/4 c butter  
1/4 c milk  
1 c sugar  
7g salt

Combine the ingredients and beat one minute. Remove from heat and beat until creamy enough to spread.

Orange Butter Icing.

3 c powdered sugar  
1-3 c melted butter  
1 orange, grated rind and juice enough to spread  
Combine.

Chocolate Fudge Icing.

1 1/2 squares chocolate, melted  
1 T butter  
1 egg yolk  
1/4 c salt  
1/4 c cream  
Powdered sugar to spreading consistency.

While chocolate is melting, beat together the remaining ingredients, adding sugar as necessary.

# WILSON GRANTED JUDGMENT FROM EMPIRE HOLDING

A decree and judgment of facts in the civil suit of Mayor E. M. Wilson and wife of this city, against the Empire Holding company, was signed this morning in circuit court by Judge H. D. Norton.

By virtue of the decree, Mayor Wilson is granted the immediate return of securities, including a \$3000 promissory note he gave to the Empire Holding company in payment of stock.

One of the chief points in the case was the contention that the plaintiff was guilty of laches, or legal neglect, in filing the suit within the legal time. The court held that Mayor Wilson acted legally as speedily as condition would permit.

The court, in its decree, holds that salemen for the Empire Holding company made false representations which the officers had paid in \$20,000 cash and received no salaries, and that extravagant claims were made, and never fulfilled, by representatives of the holding company.

The decree grants Mayor Wilson the immediate return of securities and notes given for stock.

The decree is of interest to 100 or more residents of Jackson county who invested in the Empire Holding company in an aggregate sum of close to \$100,000. It is probable some of these will take legal steps for the return of notes and other securities. Owing to the legal phases involved, it is imperative they act at once, attorneys say.

The Empire Holding company case was a chapter in the political and business life of the state which came to a dramatic climax. One of those involved was O. P. Coshaw, a former member of the state supreme court. Criminal prosecutions followed, with convictions for some of the head officials.

The testimony in the Wilson case was heard by Circuit Judge H. D. Norton. The plaintiff was represented by Crews and Coddling.

HILLS BROS COFFEE IS ANOTHER CLASSIC OF UNIFORMITY!

The exclusive Controlled Roasting process (a little at a time) gives every pound the same rich goodness

roasted to a degree that develops the full charm of its flavor! Such uniformity is unattainable in bulk-roasting. For big batches of coffee don't permit a uniform spread of heat. Under-roasting and over-roasting may easily occur.

You can expect to sit up and take notice, the first time you drink Hills Bros. Coffee. The flavor is fairly startling—deeper, richer, and with more aroma than you ever thought possible! Order some today, by name, and look for the Arab trade-mark on the can.

VARIEITY may be the spice of life. But you don't want variety in the flavor of your coffee! That's why Hills Bros. developed their exclusive Controlled Roasting process. The wonderfully rich and superb flavor of Hills Bros. Coffee is the same in every pound.

Instead of roasting in bulk, Hills Bros. roast their coffee evenly, continuously, a little at a time. Every berry is perfectly "done"—

No can of Hills Bros. Coffee will ever "go stale." The vacuum can keeps it **FRESH ALWAYS**

**GROUND RIGHT TO TASTE RIGHT**

# PREDICT SHORT WEEK IN NEWSPAPER PLANTS

WASHINGTON, April 28.—(AP)—A prediction that the 30-hour work week bill, when reported to the house, would include newspapers and periodicals, was made by Chairman Cunnery today in the labor committee's hearings on the measure.

He made this statement after Edward F. Cassidge, representing the New York Typographical Union and its 11,000 printers, had demanded that newspapers and periodicals be included among articles that would be banned from interstate commerce unless their workers were on a 6-hour-day, 5-day-week basis.

# MERCHANTS MAY PLAY TALENT TEAM SUNDAY

Manager George Sowers of the Medford Merchants is angling for a game with the Talent baseball crew in Talent Sunday. Sowers declares the local outfit has been having a tough time getting started this season, due to the usual lack of interest manifest here.

The manager lined up a snappy baseball aggregation at the start of the season, but is having difficulty in keeping his crew together owing to lack of support. Most of their games so far have been played out of town, where better crowds are possible.

Germany's newest airplanes for service between England and the continent carry 34 passengers and crews of seven persons at a speed of 115 miles an hour.
