GROWERS HOLD HOPS AS PRICES SOARING

PORTLAND, May 5.—(P)—Hop growers in Oregon were today refusing dealers' eager offers of 54 cents a pound for their holdings. The market was strong and unusually active and some growers and dealers declared the \$1 a pound mark is now in fair view.

VETS ECONOMIES BEYOND PROMISE

INDIANAPOLIS, May 5.—(P)—Louis Johnson, national commander of the American Legion, today assailed what he termed "frustrated application of the economy knife" in cutting veterans' benefits, and urged the legion executive committee to adopt a four-point permanent policy on national legislation affecting veterans.

He told the committee in annual session at national headquarters here that those to whom President Roosevelt has entrusted administration of the economy act "have gone far beyond what his spokesman in congress promised would be the extreme limit of the burden to be imposed upon the veterans."

The W. C. T. U.

By Mrs. Wm. H. Hill.

(By Mrs. Wm. H. Hill, Secy.) "Beer makes fat," said the W. C. T. U., in this day when obesity is the greatest crime in the social category.

"Beer has not food value and cannot make fat," countered the brewers, hunting women customers.

The W. C. T. U. then organized window exhibits showing a dollar spent for beer cannot buy groceries.

"Don't mind that," say the brewers, "beer itself is food."

Now which statement is right? For 40 years the brewers claimed beer was "liquid bread." Rotund beer drinkers were held up as ideal physical specimens, but when we warn women about obesity from beer the Wahl Institute of Brewery Technology in Chicago claims that beer does not make fat because there are only 92 calories in a 10-ounce stein, of which 54 are in the alcohol and 38 in the other components.

Evidently the brewers are trying to make beer drinkers of women, but medical science does not recommend beer as a slenderizer.

The brewers say beer "in moderation" will not cause fat. We claim that continued use of beer frequently turns "moderate drinkers" into tremendous drinkers, consuming large quantities of beer and in addition large quantities of food, often to the point of gluttony.

Beer drinkers are inclined to jealousy. This accounts for some of the obesity, fatty infiltrations, especially among persons who consume large quantities of beer. A dilated stomach is frequently seen in chronic beer alcoholics, sometimes reaching an enormous size. This condition is more likely to occur in beer drinkers than to any other type. A fatty liver is associated with chronic alcoholism. It is more frequent in women drinkers than in men.

"MOTHER SAID TO BE SURE IT'S WHITE STAR TUNA"

"She didn't like that kind I took home last time. And I didn't think it was so good myself. Mother made me eat mine, but I noticed Dad didn't eat his. Guess he didn't think it was as good as usual either."

Real drip coffee at last!

A NEW Coffee specially prepared as it should be. The name "Drip Coffee" on a million tongues—but only a favored few have really tasted it. Many homes are trying different kinds of drip coffee makers, different brands of coffee, different "grinds" and what not, trying to find what REAL Drip Coffee is really like.

The facts are these: There are many excellent Drip Coffee Makers—but REAL Drip Coffee can only be made by using a coffee that has been specially prepared for the purpose.

Not merely a fine grind. Coffee for the DRIP process must be more finely ground than coffee for a percolator. But that is not all. It must also be specially blended and specially roasted to secure the flavor of REAL Drip Coffee. All standard coffees with which you are familiar were prepared for a percolator or some other method than DRIP. Merely grinding them a little finer is not suitable for the rapid filtration of a drip maker.

So far as we know, Schilling Drip Coffee is the only one prepared for this purpose.

Filter papers in each tin. It is absolutely impossible for you to brew the finest DRIP Coffee without filter papers. For your convenience, a sufficient number of filter papers (20 to the lb.) are packed in each Schilling tin.

Costs far less. First, you use far less coffee than with any other process (saves you over 5¢ per lb.). Then, the 20 filter papers in each lb. of Schilling Drip Coffee save you 2¢ (regular retail price).

The Schilling Drip Maker shown here, is of sturdy enamel endorsed by "The Good Housekeeping Institute". The color is rich ivory, trimmed in pastel green—in keeping with the finest table service.

If your grocer cannot supply you send his name and \$1.20 to A Schilling & Company, San Francisco. The Drip Maker and the Drip Coffee will be sent to you direct.

Moneyback. Try them for a week—for a month. If, morning after morning they do not produce the most delicious coffee you ever tasted—your \$1.20 back from your grocer or from us.
