REIN ON MORGAN BANK ACTIVITIES JOHN D. JR'S. IDEA

(Continued from Page One.)

and would make a good amendment to the bill. The sub-committee assailed. It went back to the hill and voted the amendment into the bill.

That is a fairly clear story but it has a cloudy aspect. One of them is the fact that everyone in the know here except Senator Glass understands the Glass bill will not be passed this session. That makes it look as if they polished up the horn of a dead cow. If the Glass bill does not pass neither will the Aldrich-Rockefeller-Roosevelt-Glass amendment.

This is not the first indication that Mr. Roosevelt and Mr. Rockefeller enjoy sticking pins in Mr. Morgan.

Some months back Aldrich made a speech demanding a new deal in New York banking. Everyone knew he had his eye on Mr. Morgan when he spoke. It was shortly thereafter that Mr. Roosevelt called Chairman Fletcher of the senate banking and currency committee, suggesting it would be a good time to investigate the private banking business, meaning Mr. Morgan.

Until then the Morgan house had not been exactly enthusiastic about Mr. Roosevelt's administration. But without batting an eye it immediately went Democratic. Mr. Morgan issued a public statement approving the gold embargo. A more favorable tone toward the administration was noticeable.

Later the financial grapevine reported Mr. Morgan would stand for some form of federal control over his business.

Mr. Morgan will not care for the kind of control now suggested. It would require him to give up his big checking account phase of the business if he wants to continue floating securities. Else he would be put under federal reserve restrictions somewhat the same as a member bank. That would interfere with the Morgan financial empire no matter which alternative he chooses.

The senatorial investigation beginning May 23 will bring the situation to public attention. A new demand will be created for some such legislation.

As long as it is tied to the Glass bill Mr. Morgan will lose little sleep.

There was a lot of buckpassing backstage on this new taxation to meet the public works bond issue. Congressmen privately suggested that Mr. Roosevelt fix the means of raising the money. He politely invited them to do it. Finally they decided to go down to see him about it. He greeted them with that impenetrable smile. "Gentlemen," he said in effect, "that is your job and I would not deprive you of it." They went back to the hill worried.

The reason is that any kind of increased taxes is bad political medicine.

Mr. Roosevelt had intended all along to avoid increased taxation. The public works program was to have been financed through the E. F. C. Amortization was not thought of. It was to have been inflation pure and simple.

What changed his mind is his secret. The natural guess would be that the first inflationary program did not meet with the proper public response.

The result is clear. The new program means sound money.

There are other inner evidences that the administration is veering around to credit inflation instead of currency inflation. A middle-of-the-road course now seems certain.

MINE ASSESSMENT HOLIDAY LOOMING

Good news for mining men was received today by Attorney Frank DeSouza from Congressman Walter M. Pierce, who announced definite progress in anticipated passage of senate bill No. 7, providing for suspension of annual work on mining claims. The bill has passed the senate and has been recommended for passage by the house committee, and is now on the house calendar for final passage.

It is probable, Mr. DeSouza explained this morning, that assessment work on mining claims will be suspended for the fiscal year, beginning July 1, as it was in 1932. If the bill passes the house no assessment work will be required.

PROOF THAT NEW FACE POWDER WON'T MAKE BLOTCHES

Many face powders are made out of cosmetics which darken when the perspiration strikes them.

Perspiration comes out through the openings of your pores and the oil just beneath. Every pore which is clogged with oil is darkening the powder around the opening of the pore. Thus you have dark spots around the pores and white spots between them, making an ugly, blotchy face of blotches, especially on the nose.

The new Mello-glo Face Powder contains none of these inferior cosmetics which are so easily darkened by the oil in your perspiration. Prove it for yourself. Powder one side of your nose with another powder. Powder the other side with the new Mello-glo. In five minutes, let your mirror give you the answer.

We challenge the world to produce a finer and more lustrous face powder than the new Mello-glo. The new Mello-glo formula is the formula used by the most exclusive cosmeticians in New York and Paris.

You don't buy face powder to make your face look doxy and blotchy. Therefore, do not waste your money on powders that you are not sure of. Ask for Mello-glo Face Powder by name. Look for the name Mello-glo Face Powder on the gold box. Refuse the unfair offer of "something just as good," which may blotch your face. Ask for Mello-glo by name and get it. 50¢ and \$1. Tax free.
