

# Many Surprises in Store for Guests at Cooking School Thursday

## GET FAST ACTION TERSE ORDER TO U. S. DELEGATION

### Group of Spokesmen and Technical Aides Departing Today for London World Economic Conference

By V. G. VOSGURGH  
Associated Press Staff Writer  
WASHINGTON, May 31.—(AP)—The United States delegation headed today for the world economic conference at London with one final, terse instruction from President Roosevelt: Get fast action and cut the speeches short.

On that, the diversified group of spokesmen and technical aides set out to translate into accomplishment Mr. Roosevelt's bold bid for world concord, stabilization of currencies, lower tariff barriers, higher prices, more credit, employment and business.

Behind their campaign at the conference opening June 12 were the painstaking consultations with foreign leaders at the White House and state department, upon which the president had staked much of his hope for success.

Hull Heads Group  
Boarding a train at 7:55 a. m. to make the 2 o'clock (E. S. T.) sailing of the S. S. President Roosevelt, the group was headed by Cordell Hull, the secretary of state.

The other delegates, some named at the eleventh hour, were James M. Cox of Ohio, Democratic candidate for the presidency a dozen years ago and a friend of the League of Nations; Senator Key Pittman of Nevada, and Sam McReynolds of Tennessee, chairman of the house foreign relations committee; Ralph W. Morrison of San Antonio, Roosevelt backer and developer of power projects along the Mexican border.

The lone Republican so far named to go—Senator James Couzens of Michigan—is to sail a week hence as his acceptance of appointment only yesterday left him no time to prepare. The president intends to name one more Republican, preferably a member of the house.

War Debts Left  
Hull and his associates left the question of war debts behind, for the present intends to deal with this delicate subject personally. Installments totaling \$144,000,000 are due June 15 and Mr. Roosevelt is holding fast for payment, despite the strong indications of default just as

the world conference—gathering of some 60 nations comprising virtually the entire civilized world—gets down to business.

## SARAH J. SLAGLE OF TALENT DIES

Sarah J. Slagle, wife of J. D. Slagle of Talent, passed away in a local hospital late Tuesday at the age of 71. She was born in the state of Kansas, March 8, 1862. The family came to Jackson county 18 years ago and for the last three years had resided at Talent. Mrs. Slagle was a member of the Presbyterian church and the Woman's Relief Corps of Central Point.

Besides her husband, she leaves one son and one daughter, Mrs. L. D. Slagle of Talent. Also three grandchildren. Funeral services with Congregational Funeral parlors in charge, will be conducted by Rev. Pope at the graveside in the Talent cemetery at 11 a. m. Thursday.

## DEADLOCK HOLDS IN FISHING STRIKE

ASTORIA, Ore., May 31.—(AP)—Describing the official report of the state board of arbitration as a "joke," union fishermen on the Columbia river today refused to modify their strike demands for 8 cents a pound for raw fish. About 4000 Oregon and Washington fishermen on the Columbia have been on strike since the season opened May 1.

Today, 31 days after the strike began, and with by far the best part of the annual salmon run passed, the deadlock is as tight as ever.

## BANKIN INJURED IN STUNT WITH PLANE

PORTLAND, Ore., May 31.—(AP)—Comparatively minor injuries were suffered here yesterday by Dick Rankin, Portland flier, when he attempted to fly his plane off the top of a speeding automobile. The plane crashed nose first into the ground. The stunt was a feature of a Memorial day celebration at an amusement park here.

## NORGE LAUDED BY THOSE ATTENDING COOKERY CLASSES

The Norge Rollator refrigerator, for which E. J. Feldman, formerly White Sewing Machine company at 24 North Bartlett street is local dealer, won much favorable comment from guests of The Mail Tribune cooking school. A particularly attractive model, which was displayed on the stage at the Craterian today during Hester Heath's program will also be shown Thursday.

Norge Refrigeration is a development and refinement of the ice box known years ago as the Alaska. Alaska Refrigerator Co. has been absorbed by the Norge Corp., which, in turn, is a subsidiary of Borg-Warner Co., the largest manufacturers of precision machinery in the world.

Early in 1926 the Norge Corporation set a Rollator at work in the laboratory where it has been running CONTINUOUSLY ever since, with the exception of a 24-hour period once each year when the Rollator is taken down, examined, and carefully checked with micrometer gauges to determine the wear, if any, that has taken place in the previous year. To date there has been no measurable wear on any of the Rollator parts. In other words, it wears in, instead of out, much after the fashion of the celebrated Knight sleeve-valve motor.

Norge refrigerators are in a class by themselves, according to E. J. Feldman, Medford manager for the distributing office. "Norge is absolutely pre-eminent in the standpoint of appearance. No one disputes the fact that Norge is one of the most outstanding electric refrigerators in beauty of design, hardware and finish," Mr. Feldman said.

## CENTRAL POINT BANK ORDERED SELL BONDS

Order to sell city of Salem bonds, to the value of \$10,000, held by the State Bank of Central Point, placed in the hands of the state bank superintendent was signed by the circuit judge this week.

The bonds of the value of \$1000 each, issued by the city of Salem for sewer improvements, were directed sold to Harold Koster of Portland, the only bidder. The bonds will yield 8 1/2%.

The order was issued as part of the liquidation of the assets of the bank.

## To Control Cotton

## PRUNE CROP HIT BY HEAVY DROP

PORTLAND, Ore., May 31.—(AP)—The Journal said today that "the most severe damage ever encountered by the prune industry of Oregon and Washington is confirmed." Entire sections of the Willamette valley, the report said, will have no prunes to harvest since the drop in those districts has been practically complete.

"Guesses as to the probable production for western Oregon and Clark county, Washington," the survey said, "indicate an output of not more than 15 to 25 per cent of a full crop, which means probably not more than 15,000,000 to 25,000,000 pounds."

## FISH STAYS MUM ON RESIGNATION REPORT

PORTLAND, Ore., May 31.—(AP)—Art M. Flah, assistant state game supervisor, today refused to comment on reports that he had submitted his resignation to the chairman of the state game commission, to become effective when the commission shall act on it.

Flah did say that the only reason he would consider "a change" would be for his own "economic betterment." He would neither confirm nor deny the rumor that he had resigned.

## FRIGIDAIRE HAS POPULAR PROOF IN MANY USERS

The fact that there are a million more Frigidaires in use than any other make of refrigerator is proof of the dependability and superiority of this fine electric ice box, according to Morris Leonard, proprietor of Leonard Electric store. The Frigidaire will be used by Hester Heath at The Mail Tribune's cooking school, Craterian theater, today and this model will also be on display Thursday evening.

Among the outstanding features combined in the new Frigidaires are: Full automatic defrosting; chromium plated freezing units; center icing with added shelf space; semi-concealed hinges; acid-resisting porcelain and quick release ice trays. In operating this amazing refrigerator no more current is used than an ordinary lamp bulb.

In appearance Frigidaire is distinctive and sturdy. Every detail reflects the standards which have made Frigidaire the choice of a million more buyers than any other electric refrigerator. Morris B. Leonard explained today.

An especially attractive offer is being featured by the Leonard Electric company this week to enable southern Oregon housewives to purchase Frigidaires at a very low price.

## FRED HITCHCOCK NOTED ENGINEER, HERE FOR VISIT

Fred C. Hitchcock of New York city, who had charge of the construction of the Moffatt tunnel through the Rockies, and one of the foremost civil engineers of the land, is in the city for a few days, visiting his old friend, Fred Blakeley of this city and Portland, a mining operator.

They were young men together in Ohio, and both are members of the Toledo, Ohio, B. P. O. Elks lodge, No. 53. The two Elks made an agreement to attend the Medford lodge session

Thursday evening. It will be the first time in 40 years they have attended lodge together.

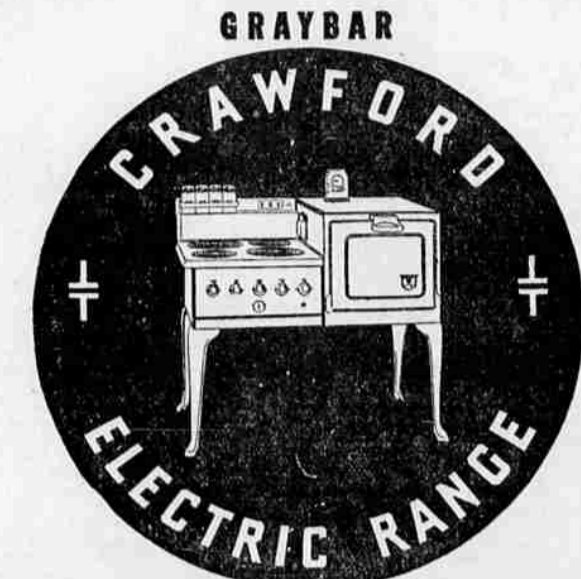

Hitchcock, besides building the Moffatt tunnel, regarded as one of the engineering feats of recent times, has constructed railroads in China, Japan, Russia and South America,

and his profession has carried him to all parts of the globe.

Hitchcock remembers Blakeley when he played right field for the Allegheny, Pa., baseball team. The present Pittsburgh team of the National league, sprang from this organization. Blakeley played professional

baseball before Owney Patton, another local diamond pioneer, was out of knee pants.
