

# GRADUATES TOLD PANIC SACRIFICES AIDS CHARACTER

### Dr. Gilbert in Address Urges Class of '33 to Profit By Experiences—Greed Held Depression Cause.

The manhood of America has inventive powers too great to remain long in a depression—in the cheering message brought to Medford youths Friday night by Dr. James H. Gilbert of the University of Oregon in an address before the class of 1933, composed of 146 students, who received diplomas, at the fourth annual commencement, which drew a capacity crowd to the high school auditorium.

Declaring emphatically that characters are built through sacrifice, Dr. Gilbert urged his listeners not to be discouraged by the stress of the years, during which they have gained their high school education, but to profit by the experiences that have been theirs.

The true cause of the depression he described as "greed," asking the youths going out into life's school to measure their success in something other than monetary gain.

Dr. Gilbert also urged the class of 1933 to retain its sanity and become a thinking people, not acting upon impulses, but scrutinizing carefully all ventures before they are entered for the development of a self-control, needed badly throughout the world today.

Cultivation of a true spirit of democracy was also urged by the commencement speaker, who told the class members to look at things from the standpoint of their bearing upon the people as a whole and to work for things, which will promote the common good.

Class legislation, which has resulted from greed of the past several years, Dr. Gilbert cited as one of the nation's greatest evils. He condemned acceptance of any dictatorship, regardless of the class from which it may spring, telling graduates and audience that it is leadership, not dictatorship, by the intelligent and the fit, that the country is needing.

Oregon was complimented by the speaker for its intelligence rating, which places this state fourth in the union. The Medford high school, which has been chosen by Columbia university with the 10 best in the nation, also won much praise from the university speaker.

His wish has always been, Dr. Gilbert then told the graduates, to send the upper 10 per cent of every graduating class in the state of Oregon on to college or university with expenses paid by the state. Oregon could make no finer, no more profitable investment, he declared in closing.

As official representative of the class of '33, Miss Frances Tucker, valedictorian, expressed the class' appreciation of the generosity of parents and taxpayers, who made graduation possible. Stating that school is not the boundary line of education, she promised that her class would endeavor to repay its debt in good citizenship.

Misses Frances and Elizabeth Perry, twin daughters of Mr. and Mrs. D. N. Perry, in a pleasing question and answer adaptation delivered the salutatory address.

Miss Aileen Gity, a member of the class entertained with a vocal solo and the boys' chorus with "Medford High," adapted from Heidelberg. The program opened with music by the high school orchestra an invocation by Rev. Wm. Howell. Diplomas were presented by N. H. Franklin, chairman of the school board, and awards by C. G. Smith, principal. The speakers were introduced by Superintendent E. H. Hedrick.

The cup, awarded each year to the outstanding senior girl, went to Erma Niedermeyer, the corresponding cup in the boys' ranks to Maurice Schell. Frances Perry received the forensic cup, given by Rotarians; Frances Tucker, the valedictory cup; June Davis and Velma Smith, state athletic honors; Cornelia Tjoelker the P. E. O. scholarship; Aileen Gity, the College Women's club scholarship, and a number of students Torch Honor pins.

# GOLD DREDGE TO BE OPERATED ON OLD J'VILLE HILL

### Plans for the operation of a large gold dredge on the old Jacksonville hill were announced yesterday by P. E. Latner of Seattle, who, with a crew of men, has been prospecting the property since February to determine values of the ground. Associated with Mr. Latner in the dredge project are John Larson and Charles Huber, both well known residents of Portland.

Present plans call for the operation of the dredge by early January with the return of winter moisture and is to have a capacity of 500 yards daily. A large amount of ground to be worked is in sight and is said to be in the region of an old channel, possibly flowing with water unknown years ago when the world was still in the making. This channel, Mr. Latner believes, is the source of much of the wealth found when Jacksonville was a thriving mining town over 70 years ago. He states the channel cuts through the land to be worked for some distance and indications are that the use of dredge will be warranted, as a result of very systematic prospecting. The property, acquired first from the government in 1893 by C. B. Rostel, deceased for several years, was fruitful for gold panners during the early gold rush.

The equipment to be used on the hill will consist mainly of a dry land dredge and will employ approximately 12 men. The dredge itself will not float on water, but will move about on tracks. Mr. Latner states further no stock is being offered for sale in the project, being entirely privately financed, and was not definitely planned until the value of the ground was determined.

A small crew, composed of Mr. Latner, his son, Paul, Jr., and John Stombach, the latter a former University of Washington football star, is still working on the property. The men expect to leave the camp in a few days, returning next fall. Earlier in the season a large crew was kept busy and for a time worked day and night.

Mr. Latner is a mining man of long experience, having spent much of his time in Montana, Colorado and eastern Oregon. He is optimistic over mining possibilities in this region and looks forward to a greater development of the natural resources of Jacksonville county. His associate, Mr. Huber, is well known along the entire coast as an outstanding bridge contractor, while the third member of the group, Mr. Larson, is a mining man of long experience, particularly in Colorado.

BURNS, Ore., June 3.—(AP)—A dust storm followed by thunder and lightning and a driving rain whipped over Burns today from the west. The weather had been threatening for three days after a brief hot spell here earlier in the week.

# GARDEN CLUB TO SPONSOR FLOWER SHOW JUNE 7-8

The flower show to be sponsored by the Medford Garden club next Wednesday and Thursday, June 7th and 8th, is a golden opportunity for Medford and Rogue river valley citizens to see their beautiful home garden flowers at their best, according to chamber of commerce officials.

Garden club officials are bending every effort to make this year's show a banner one and according to Mr. Bolger, it really is a community affair and not necessarily a project of the Garden club alone. The Garden club is entitled to the full support of citizens of Medford and Jackson county.

"The chamber of commerce is devoting a lot of time and energy this year to attract tourists to this section," continued Mr. Bolger, "because of the beautiful scenic resources surrounding our city. Flowers play a very important part in our scenic advantages and the chamber of commerce intends to send photographs of the show to certain magazines because it realizes that Medford can capitalize on the flowers which bloom here so profusely at this time of the year. Each year visitors in Medford at the time of the show express themselves in very complimentary terms regarding the exhibits which it has been stated would do credit to far larger cities than Medford and it behooves our local people to show as much interest in the flower displays as the outsider."

The splendid climate which we enjoy here, the fertility of the soil, and other advantages which Medford is endowed, all make it possible for the Garden club to put on its annual show and chamber of commerce officials believe that a visit to the show will be an education, especially to those who contact summer visitors.

Many cities throughout the country capitalize with good results on their flowers and the chamber of commerce believes it is time for Medford to step into the horticultural limelight also.

Later on it is the purpose of the chamber of commerce to photograph some of the more beautiful gardens of the valley and send the pictures to those magazines particularly devoted to the garden and home beautiful ideas.

The following letter was received from Mayor E. M. Wilson this morning by the chamber of commerce: "I am in perfect accord with your idea in endeavoring to promote attendance at the Garden club show next Wednesday and Thursday and I sincerely trust our citizens will respond in large numbers. The Garden club is to be congratulated for carrying on this very important work each year and the officials of the club are entitled to the support of everyone living in this delightful country."

# FIGURES IN SENATE QUIZ OF MORGAN

The master of the Morgan banking house, J. P. Morgan, and his son, Junius Spencer Morgan, a partner in the firm, are shown reading newspaper accounts of a senate committee's investigation of the famous international bank. Morgan and his associates follow closely all testimony as well as newspaper accounts of the hearing.

# LUMBER SHIPMENT SET NEW RECORD

PORTLAND, Ore., June 3.—(AP)—The steamer San Julian, idle at Portland since May 15, 1932, will go on berth here in July to load the largest cargo of lumber taken from the Columbia river in four years, Kenneth D. Dawson, general manager of the Quaker line, announced here today.

The steamer will load 7,700,000 board feet of lumber, the equivalent of 12,700 tons, with demand for lumber cargoes increasing, Dawson said, no one mill in the Columbia-Willamette district will be able to supply all the cargo, and the vessel will be shifted from one mill dock to another until her holds and deck space are entirely filled. The lumber will be delivered at Atlantic ports.

Dawson said the largest lumber cargo ever carried in the intercoastal trade was one of more than 8,000,000 board feet loaded on the steamer Lewis Luckenbach several years ago. That cargo, however, came from both the Puget Sound and Columbia river districts.

The San Julian will be the 23rd ship ordered back into service between Portland and Atlantic coast ports because of a heavy increase in the demand for cargo space.

# INDIANA VOTERS COOL ON REPEAL

INDIANAPOLIS, June 3.—(AP)—Indiana voters today seemed steadfastly indifferent toward the special election Tuesday which will decide the state's stand on the eighteenth amendment.

The apparent apathy of the voters was disconcerting to both wet and dry organization workers but they hoped to arouse interest.

At the election Tuesday 329 delegates will be elected to the convention to be held June 26 at which a formal vote will be cast either for or against ratification of the twenty first amendment which would repeal the eighteenth amendment.

The dry forces have concentrated on Indiana, Bishop James Cannon, Jr. having described this state as the "real battle ground in the repeal fight."

# JUNE RAIN FALLS ON OREGON WHEAT

BEND, Ore., June 3.—(AP)—Central Oregon last night and early today was soaked by the heaviest rain in six months. The precipitation in Bend amounted to 84 of an inch in 24 hours. An electric storm preceded the rain.

The Jefferson county wheat belt was soaked by rain which started this morning and continued for several hours, drenching farm lands and leaving parched range areas. The June rain was said to have practically assured a good wheat crop in the Madras country. The Deschutes National forest and the plateau region to the east also got some rain.
