JOSEPHINE BERRY GROWERS PROFIT

GRANTS PASS, June 3—(AP)—Strawberry producers of the Grants Pass Irrigation district area are working at top speed this week picking, packing and shipping their unusually fine crop to the northern markets in response to the special demands made as the result of the partial crop failure in other more northern regions. A 90 per cent crop or better is in production here, with virtually no winter damage to the plants evident, while winter kill further north ran as high as 75 per cent and greater. It was reported locally. The local crop came on at exactly the right time this year for the local growers' hopes, starting when the California berries gave out and just about the time it was discovered the northern berry production would be curtailed. Prices being received by growers from the several firms buying and shipping the local berries are good. Real estate or insurance—Leave it to Jones, Phone 696

At Craterian

Unprecedented spectacle, a dramatic plot which reflects world history, and the most notable theatrical family in the world, lend glamor to "Rasputin and the Empress." The story tells of the strange monk, Rasputin, who by curing the little Russian czarvitch of a deadly ailment, makes the superstitious Czar and Czarina his slaves, rules Russia through them, precipitates a riot of orgy, meddles with politics and finally plunges Russia into the world war. The story, after his death, comes the revolution that seals the doom of the Romanoff dynasty. Authentic makeup literally re-creates the original actors in the strange drama, and huge settings, absolutely true to the originals, add further realism.
