OREGON COLLEGE STUDENTS MAKE WORLD'S FAIR TRIP

Group of agricultural engineering students at Oregon State college leaving the campus on 5500 mile bus trip to the Chicago World's fair and return. From left—Clyde Walker, W. J. Gilmore and R. N. Lunde, faculty members; Acel Garlinghouse, Halfway; Henry Scott, Roseburg; Andrew Schmidt, Redmond; Norman Harrang, Foster; Ivan Branton, Dixonville; Ivan Weikel, Napa, Cal.; Hazen Sandwick, Redmond; Henry Collin, Orosi, Cal.; Francis Morganroth, Portland; Arnold Ebert, Echo; Howard Hansen, Redmond; Donald Robinson, Corvallis; Olaf Anderson, Grants Pass and Everett Davis, St. Paul, Neb. Three men not in the picture, Ray Garrison, Nyssa; Keith Chamberlain, Mosier, and Wilbur Travis, Roseburg, are also making the trip.

OREGON STATE COLLEGE, Corvallis, June—Earning their way in advance by means of a student farm project, a group of students in agricultural engineering from here are now enroute to two faculty members on a month-long bus trip which will take them to a national convention of agricultural engineers and to the world's fair for engineering week late in June.

Conceiving the idea of such a trip a year ago, the students rented a

30-acre young walnut orchard and interplanted it with field corn. They tended the corn till school was out and then hired it cultivated through the summer, returning in the fall to harvest an excellent crop on which they cleared \$300. To this was added various donations mostly from farm equipment companies which totaled enough to finance the trip with only about a \$10 contribution from each man making the tour.

Faculty members gave wholehearted support to the idea because of the educational value of the trip which will take the party into the heart of the agricultural machinery industry, provide visits to other colleges and universities enroute, and permit attending the national convention of the American Society of Agricultural Engineers—all in addition to the visit to the world's fair itself.

COLUMBIA FLOOD MENACE DWINDLES

PORTLAND, Ore., June 13.—(AP) The flood menace on the Columbia and Willamette rivers began to ebb today as cooler weather in eastern Oregon and at the headwaters of the two streams slowed the snow run-off. "The flood situation does not look as serious today as on Monday," said Edward L. Wells, government meteorologist here. He was awaiting complete reports from the upper Columbia and Snake rivers. At The Dalles the Columbia dropped six inches overnight, temporarily ending the danger to the Old Oregon Trail highway.

AVOID THE DANGER OF CONSTIPATION

Delicious Cereal Overcomes This Condition Safely and Pleasantly. The first signs of constipation may be headaches, tired feelings, sallow complexions, sleeplessness, loss of appetite. If neglected, constipation may seriously impair health.

Today, you can banish constipation by simply eating a delicious cereal. Laboratory tests show that Kellogg's ALL-BRAN provides "bulk" to exercise the intestines, and vitamin B to further aid regular habits. ALL-BRAN is also a good source of iron for the blood.

This "bulk" in ALL-BRAN is gentle in action similar to leafy vegetables. Within the body, it forms a soft mass, and gently clears out the intestinal wastes.

Two tablespoonfuls daily will overcome most types of common constipation. If not relieved this way, see your doctor.

Enjoy ALL-BRAN as a cereal, or use in cooking. Appetizing recipes on the red-and-green package. Sold by all grocers. Made by Kellogg in Battle Creek.

PRESIDENT SIGNS BILL EASING LOAD OF HOME OWNERS

WASHINGTON, June 13.—(AP)—President Roosevelt in signing the home mortgage refinancing bill today, asked creditors to abstain from foreclosing proceedings until the legislation gets into operation. "I appeal to mortgage creditors," he said, "and all others who have claims against the home owners, and ask them, until full opportunity has been given to make effective the refinancing provisions of the home mortgage act, that they abstain from bringing foreclosure proceedings and that they abstain from seeking to dispose of the home owners who are in debt to them."

What is YOUR Opinion about prices?

MANY authorities doubt if this generation will ever again see prices as low as they are to-day. This applies particularly to electric refrigeration—and especially to Kelvinator, because Kelvinator's present low prices are for standard, full-quality merchandise and not for special, "cheap" models built down to a price.

Commodity prices are advancing. Copper, zinc, lead, tin, rubber and other materials used by Kelvinator, have increased from 22 to 63% since Kelvinator announced the present low prices.

Washington says that all wages must be raised. Buying power must be restored. The Industrial Emergency Bill gives the President power to carry out this program. He has the authority to raise prices by currency inflation.

All of this can mean but one thing—a further rise in commodity prices.

That Kelvinator prices have not already been increased, is due only to rigid economies at the factory and to a tremendous volume of business.

April was the biggest month in Kelvinator history when 30,116 units were shipped. And for May—a new high, all-time record of 43,357 units was established.

But volume and economy no longer suffice to meet the situation. And materials costs continue to advance. Kelvinator is buying materials on a "price at time of delivery" basis.

In view of these facts, what is YOUR opinion about Kelvinator prices?

One point of policy is absolutely established—has been for 19 years—Kelvinator will not cheapen the product to meet a low price.
