

RECOVERY COUNCIL NAMED TO SPEED INDUSTRY WHEELS

(Continued from Page One.)

while production quotas and minimum prices will have to be shown to be fully justified and the interests of the public amply protected, and while there are other features which will require reconsideration, the hearing is called in the belief that provisions more in accord with announced policies of the administration may develop in the proceedings.

Minimum Hours Set

The code calls for maximum hours of work ranging from 40 to 48 weekly, depending on the region of the country involved; minimum pay ranging from 22 1/2 to 42 1/2 cents per hour, the lower level generally prevailing in the south and the higher in the north and west.

The code also would prohibit any child labor in the industry and proposed control of production by allocation among divisions of the industry. Also it called for establishment of minimum prices "reasonably adapted to meet costs including those resulting from the maximum wages of labor resulting from this code."

John D. Tennant, of Longview, Wash., chairman of the lumber industry's emergency national committee which framed the code, said it was not possible to estimate the ultimate increase in employment which it would bring about, but that on the basis of expected August production payrolls of the industry would have been increased more than \$10,000,000 that month if the code had been in effect.

Normal employment of the lumber industry is placed at around three-quarters of a million men, with the present figures substantially below that.

Win Krispy Cracker Prize

Happy Sunshine contest winner, Master Rex Cowan, winner of boys' division, is congratulated by Earl Road, Sunshine representative.

A nation-wide contest recently conducted by the Loose-Wiles Biscuit company, bakers of Sunshine crackers, cookies and cookie cakes, has terminated with the award of two bicycles and 200 pairs of roller skates. The winners of the first prizes—one boy and one girl—were each presented with a handsome bicycle. The boy was Master Rex Cowan of Ottawa, Kas., and the girl, Miss Josephine Braasill of Gloucester, N. J. The 100 girls and 100 boys who sent in the next best entries each received a pair of ball-bearing roller skates.

It was interesting to note that children writing in emphasized the qualities of extra flakiness and extra flavor they, themselves, discovered in Krispy crackers. These comments were as gratifying to Sunshine Bakers as the widespread enthusiasm with which this contest was received. Sunshine Bakers are greatly encouraged by the display of good feeling. The contest has brought them renewed inspiration to find still more ways of improving biscuits which have already won an enviable name for highest quality.
