CORPORATIONS FEDERAL STOCK TAX EXPLAINED

Corporations in Medford were advised today by Mayor E. M. Wilson of requirements of the new federal capital stock tax on which reports must be in by August 31, the time having been extended from July, as originally announced. The new tax demands payment of one dollar a thousand on capital stock and surplus. There are three taxes to be paid by corporations and the government is permitting corporations to declare the value of capital stock, regardless of capital surplus, but demands that one dollar per thousand be paid on that declared value. However, twelve and a half per cent of the declared value will be used as a credit against the income of the corporation for excise tax purposes, meaning that five per cent on the balance will be collected under the excise tax. In other words, Mayor Wilson explained today, a corporation with a declared value of \$50,000 will be allowed a credit of \$7,500 and could have an income of \$7,000 without paying the excise tax. A corporation with a declared value of \$50,000 like-wise would have a credit of \$7,500 for excise tax purposes and would have to pay the five per cent excise tax only on income in excess of \$7,000. Mr. Wilson stated today that he was anxious for corporation representatives to understand that they are privileged to make a declaration of capital stock and surplus value, and stated that he would be willing to explain the tax further to anyone wishing information. MADAME PERKINS RUINS DRAMA IN STEEL SURRENDER

(Continued from Page One) Johnson is NOT only an able actor. He is a fighter as well. Testimony to that effect is offered privately by a certain lumberman. He and Johnson had words during the lumber code hearing. It ended with Johnson calling his adversary a liar. As usual Johnson was right. The lumber man found he had made an error. Next day he told a friend: "This fellow Johnson is more like John L. Sullivan than any man I ever saw. He can hit from a standing, sitting, backward or front position. And every time he hits you it's a knockout." Another who was floored was head of a well known manufacturers' association. His crowd sent him here to take Johnson down a peg. He was supposed to tell Johnson to take the code and jump in the Potomac. Johnson heard the advice calmly. Then he started to argue. He said: "I am not only going to get codes out of your people, but I am going to make you my right hand man." Before the fellow left Johnson's office he promised to leave the manufacturers' association and accept a position with Johnson. He holds that position today.
