# Tasty, Nourishing Dishes Possible With Sour Milk

By Bureau of Home Economics, U. S. Department of Agriculture

It may seem like a disaster when the milk turns sour. But sour milk is good food, and should never be thrown away, says the Bureau of Home Economics of the U. S. Department of Agriculture. Some of the best cooks go so far as to make milk sour, deliberately, for special uses. And you remember, of course, that Little Miss Muffet sat on a tuffet, eating her curds and whey—with enjoyment, presumably, until the spider came.

But perhaps you call it clabber—or bonyzlabber. Or, if you live in the far South, it may be French curd to you. In any case, clabber or curd with sweet cream or top milk and sugar, is good for breakfast or it is a delightful summer dessert—with fruit or preserves if you have them.

For a dish like this the souring must not go too far—just far enough for the milk to "set." For quick breads, however, and some kinds of cakes, clabber is just as good. Many cooks prefer it to sweet milk for biscuits, griddle cakes, corn bread, muffins, brown bread, waffles, gingerbread, spice cake, or devil's cake.

When used in cooking, sour milk must be neutralized by soda. In doughs or batters, it can be substituted for equal quantities of sweet milk if you use the right quantity of soda. The proportions are one-half level teaspoon of soda to each cup of sour clabbered milk, or a quarter teaspoon of soda if the milk is just turning. The soda should be mixed with the flour and other dry ingredients, so it will not begin to act until it is in the batter or dough.

For thick batters, the soda and sour milk usually furnish enough leavening, but for thin batters or doughs powder is usually needed too. For griddle cakes, for instance, in place of one cup of sweet milk and two teaspoons of baking powder, use one cup of sour clabbered milk and one-half level teaspoon of soda with no baking powder. This quantity of soda is right for the sour milk, and with the milk it is practically equivalent in leavening power to the two teaspoons of baking powder. For blaudt dough, however, where you would use one cup of milk and four teaspoons of baking powder, substitute one cup of clabbered milk, one-half level teaspoon of soda and two teaspoons of baking powder.

Milk turns sour because of the lactic acid bacteria it contains, but these are beneficial bacteria. They produce a soft curd in sour milk, which is easy to digest, and this is the reason that buttermilk, cottage cheese and artificially soured milk are recommended by physicians.

Cottage cheese is one of the best summer dishes. It is often made of our milk, and when moistened with a little sweet top milk and seasoned with salt and pepper it may be served with dinner, or as a main dish for lunch or supper. Or it can be used as a dessert, served with top milk or cream and sugar. It makes an attractive salad when loosely piled on a lettuce leaf, perhaps with grated carrot or strips of green pepper, green cabbage slices of tomato, cucumber or pickle. Or it can be put in the center of a ring of tomato jelly, or pressed into a green pepper which is then chilled and sliced. Again, cottage cheese with crackers and jelly or preserves makes a good finish for lunch, dinner or supper.

If the milk has soured with the top milk on it, try using that top, or any sour cream, to make a horseradish sauce to serve with meat or fish. Or add a little sour cream to pork gravy just before it comes off the stove. Or you can add small quantities of sour cream to any cooked salad dressing with good effect.

LOW-COST MENU FOR ONE DAY

Breakfast: Hot Cereal, Toast

Tomato Juice for Youngest Child, Coffee (adults), Milk (children)

Dinner: Boiled Fish, Horseradish Sauce, Potatoes, Green Onions, Sour Milk Corn Bread, Supper: Mixed Vegetable Salad, Bread and Butter, Baked Custard

RECIPES

French Curd: This is uncooked curd or French cottage cheese. The sour milk is not heated. It is simply poured into earthenware molds with holes in the bottom. A very fine sieve may be used instead of the molds. The whey drips out and the curd assumes a custard-like consistency and takes the shape of the mold. When sufficiently stiff the cheese is chilled and is eaten with sweet cream and sugar, fruits or preserves.

Sour Milk Cottage Cheese: 1 quart freshly clabbered milk, 1 quart boiling water, Salt, Pepper. Pour boiling water over the clabber. Let stand until curd separates. Turn into cheesecloth bag and let hang until whey has drained. Break and moisten curd with two tablespoons of melted butter. Season to taste. Sweet or sour cream may be added, for greater smoothness and better flavor.

Horseradish Sauce: 1 cup thick sweet or sour cream, 1/2 teaspoon salt, 3 or 4 tablespoons fresh grated horseradish. Whip the cream, salt and sugar and gradually add the horseradish. Serve with meat or fish.

Cottage Cheese Pie: 1 pound cottage cheese, 1-3 cup sugar, 1/4 cup milk, 3 eggs, beaten, 1/2 cup chopped raisins, 1/2 teaspoon salt, 1/2 pint and juice of 1 lemon, 1 tablespoon melted butter. Pastry. Press the cheese through a fine sieve. Add the other ingredients and stir until well mixed. Line a deep pie tin with pastry and make until a delicate brown. Fill with the cheese mixture. Bake in a moderate oven until firm in the center, about 15 to 20 minutes.

Balbo Changes Returning Path

ROME, Aug. 4.—(AP)—Gen. Italo Balbo, commander of a squadron of 24 Italian seaplanes, sent a message from Shoal Harbor, N. F., today saying he had decided to change the return route and go by way of the Azores and Lisbon.

This change from the original intention of flying from Shoal Harbor to Valentia Island, Irish Free State, was due to a continuance of bad weather over the North Atlantic.
