

MILITANT PASTOR IS KILLED WHILE WALKING IN SLEEP

VENTNOR, N. J., Sept. 8. — (AP) — The Rev. Dr. Charles H. Parkhurst, militant minister who attained nation-wide fame in the 90's as a bitter and victorious foe of Tammany hall in New York city, died today an hour after he fell from the roof of his home.

Mrs. Grace Moore Parkhurst, his niece, said he had been walking in his sleep of late, but that his health had been excellent. He was 91 years old.

The aged minister stepped out of a window to the porch roof of the home of his nephew, Winthrop Parkhurst, with whom he lived here. He was taken to Atlantic City hospital, where he died at 4 a. m.

A terrific attack he launched from the pulpit of his Madison Square Presbyterian church in 1892 against what he termed a "damnable pack of administrative bloodsuckers" started a campaign which resulted in the unseating of Tammany in New York.

On a wave of reform, William L. Strong was elected mayor and Theodore Roosevelt was installed as police commissioner. Tammany came back after the Strong administration to put Robert A. VanWyck in the mayor's chair, but later, with Parkhurst playing a prominent part, a fusion movement again beat Tammany and elected Seth Low as mayor.

Although he retired in 1918, Dr. Parkhurst never changed his opinion of what he called political "corruption," and occasionally he issued a blast against it from his New Jersey home.

GIRL'S HUG BLAMED FOR AUTO SMASHUP  
CAMBRIDGE, Mass. — (UP) — A drunken girl threw her arms around him, causing him to lose control of his automobile and collide with a safety island, George J. Evans, son of a Wakefield shoe manufacturer, testified.

"It's a moral defense," said Judge Maloney. "Not guilty."

HOW BIG TRAIN WAS WRECKED

This view of the interior of one of the baggage cars of the Golden State Limited, which slipped off a bridge into a flooded arroyo near Tucuman, N. M., shows how badly some cars were smashed up in the accident. (Associated Press Photo)

'FLYING BOAT' IN SUCCESSFUL TEST

EAST PITTSBURGH.—(UP)—The "flying boat" has come through its first practical test with "flying colors," according to Dr. Oscar Tjebens, noted for his research in streamlining of airplanes, racing automobiles, Zeppelins and railway cars.

A 14-foot boat with normal maximum speed of about 12 miles an hour was used in the test. When converted to a "flying boat," by attachment of hydrofoils, or wing-like planes, the craft attained a speed of about 24 miles an hour on the Delaware river at Exton, Pa.

"The hydrofoils act in water as an airfoil acts in air," Dr. Tjebens said. "When a certain speed is reached the airfoil, or wing edge,

lifts an airplane off the ground into the air. Similarly, my hydrofoil lifts the boat clear of the water."

PSYCHOLOGY PLAYS PART IN WAR GAS

ROME, N. Y.—(UP)—The use of gas has a psychological effect upon a soldier, according to Dr. B. A. Wilkins, research engineer for the Revue Copper and Brass corporation, because it is an enemy with which it is difficult to cope.

During the world war Wilkins said, American gas was 1.6 per cent more effective than that produced by the enemy, and he spoke of a new and more deadly product that was in the course of manufacture when the armistice was signed.

MEDFORD COUPLE ESCAPE DEATH IN POISON MUSSELS

Mr. and Mrs. J. D. McPherson of 302 South Orange, who were reported critically ill early yesterday from poisoning, were in an improved condition last night and the attending physician stated their recovery was expected.

The McPhersons, who spent the holiday week-end at Brookings, according to the report, ate mussels gathered there, which caused the severe poisoning. Their little daughter failed to eat any of the seafood and was not stricken with the acute illness upon return to Medford.

Wednesday night Mr. McPherson's condition was described as very serious and Mrs. McPherson was also in a critical state. She showed a marked improvement early yesterday and Mr. McPherson was showing signs of recovery last night.

CORVALLIS PILOT KILLED IN CRASH

CORVALLIS, Ore., Sept. 8.—(AP)—His plane crashing into the ground just after leaving the North Corvallis airport, Ray Bicknell, 38, garage mechanic, was killed here late yesterday afternoon. Bicknell was taking off and banked into a turn

before gaining sufficient altitude, when his plane nosed into the ground and was totally demolished.

His body was found on one of the wings, with his skull fractured, face burned by hot oil and clothes bearing indications of being burned in the crash, though the plane did not catch fire.

Bicknell had been flying about three years and is survived by his mother, sister and a brother, living in Eugene, and by two children, who reside with his estranged wife in Toronto, Canada.

CRUDE INCUBATOR SAVES TINY BABY

SAN FRANCISCO.—(UP)—Chubby Richard Weare, who spent his early days in an ingenious home-made incubator, weighs a normal 35 pounds today.

Richard was born prematurely. He weighed only three and one-half pounds and was "so small even to cry."

His father, J. H. Weare, placed a wide board across the infant's crib and connected four 40-watt lamps. The heat from the lamps provided an even temperature of 100 degrees. Richard, meantime, was fed through an eye-dropper.

As the infant gained weight, the temperature was gradually reduced by turning out the lights, one at a time. After two and one-half months the child was taken from the incubator in normal condition.

St. Ann's Altar Society will sponsor a card party Wednesday evening at 8 o'clock, at Parish hall. Auction and contract bridge and 300 will be played. The public is invited.

AMERICAN AIR LINES SHOW BIG INCREASE IN NUMBER WORKERS

WASHINGTON.—(UP)—Approximately 500 more persons were employed by American-operated airlines on July 1, 1933, than on the same date in 1932, according to the aeronautics branch of the department of commerce. The 1933 total was 5997 employees.

Of this number, 575 were pilots and 192 co-pilots, while 2734 were mechanics, 1613 other hangar and field personnel and 1381 office employees.

Gasoline consumed by scheduled airlines during the first half of 1933 totaled 12,889,547 gallons, the department noted, a substantial increase over the 1932 figures. Oil consumed by these planes also showed an increase, pumping from 317,656 gallons for the first six months of 1932 to 470,164 gallons for the 1933 period.

All of these increases were made in spite of the fact that at the end of the period this year there were only 844 planes in operation as compared with 860 on July 1, 1932.
