NERVOUS WOMEN Take Lydia E. Pinkham's Vegetable Compound

"I am so nervous it seems as though I should fly," "My nerves are all on edge," "I wish I were dead," "I have often heard these expressions from some woman who has become so tired and run-down that her nervous system is unable to stand the strain. No woman should allow herself to drift into this condition if she can help herself. She should give Lydia E. Pinkham's Vegetable Compound a trial. For nearly sixty years women have taken this wonderful tonic to give them renewed strength and vigor. No woman who reports to us that she is benefited by this medicine. Buy a bottle from your druggist today... and watch the results."

MEMBERS OF JUNTA IN THE SADDLE IN CUBA

The government junta representing the soldiers and sailors who overthrew the de Jespedes government in Cuba appeared on the surface to be optimistic that their coup d'etat would be successful and there would be no American intervention. More conservative opposition groups saw intervention as an accom- plished fact unless there is an abrupt change in the tense situation. Some of the members of the junta are shown as they met in executive session. NEW YORK, Sept. 19.—(AP)—A late rally in metal issues again pulled the stock market out of a ditch today and enabled several of the more depressed leaders to part or cancel early losses of 1 to 3 or more points. The recovery was attributed partly to short covering by professionals following a sharp morning slump. The close was steady to firm. Approximately 2,650,000 shares changed hands.

ENROLLMENT VARIES IN RURAL SCHOOLS

Preliminary survey by the county school superintendent's office of the rural schools, most of which opened September 4, shows the attendance to be "spotted." Some schools have more, and some less, attendance than last year. All the rural schools are getting underway in fine shape. By the first of the month, a full report on the attendance will be available.

PEACH BLIGHT SPRAY SHOULD BE APPLIED SOON, GROWERS TOLD

Peach and apricot trees should be sprayed at this time with Bordeaux mixture for the control of peach blight, states County Agent L. F. Wilcox. In case of late peaches where the crop has not as yet been harvested, spraying should be done as soon as the crop is off and before fall rains have occurred to any extent.

This is a very important spray if healthy peach and apricot trees are desired.
Peach blight is a fungus disease common to all peach and apricot trees. If not controlled it will cause the dieback of young shoots, the killing of fruit buds and the formation of gum cankers on wood and fruit tissue. Most of the red spotting on the fruit of the apricot is caused by this disease.

Bordeaux mixture, 4-4-50, is the recommended spray. Application should be thorough, giving the tree trunk and all branches a liberal covering.
