COUGARS, HUSKIES REVEAL POWER IN FOOTBALL OPENERS

PULLMAN, Wash., Sept. 23—(AP)—Washington State's Cougars showed flashes of great power as they bowled over Whitman, 48 to 0, in a practice game today.

At the end of the regulation four quarters, the teams went on for two quarters more for practice. The Cougar starters rolled up four touchdowns in the opening period with a straight running attack.

Coach O. E. Hollingbery used his full Washington State squad, making substitutions by full teams. "Big" Borleski, veteran Whitman coach, likewise used every man he brought to Pullman.

WASHINGTON STADIUM, Seattle, Sept. 23—(AP)—Without uncovering their tricks to a small army of scouts, it took all the brute power of the University of Washington first team to score a 13 to 0 victory over a courageous Gonzaga university football team in the first intercollegiate gridiron tussle in Seattle this season. It was a non-conference contest.

The Washington Huskies kept the Bulldogs backed up against the goal line throughout the 69 minutes of play, and spoiled their record of scoring against 18 consecutive opponents, but it was the gallant blue and white trimmed gridgers from Spokane who made the bit interesting for the 4,000 blanketed spectators who braved the raw rainy weather.

Washington opened up like it might run away with the ball game when it scored a touchdown in three minutes. The second time the Huskies got their hands on the ball, Art Ahonen, triple-threat halfback hurried a pass straight down the middle of the field, and Orsa Pedersen, subbing for Matt Muczynski at the other half, cut into the open, hauled down the pigskin over his left shoulder and romped 10 yards to the goal line. The play was good for 35 yards.

But after Paul Sulkooski, fullback, failed in his attempt to score the extra point from placement, the Bulldogs fought off further Husky charges time and again.

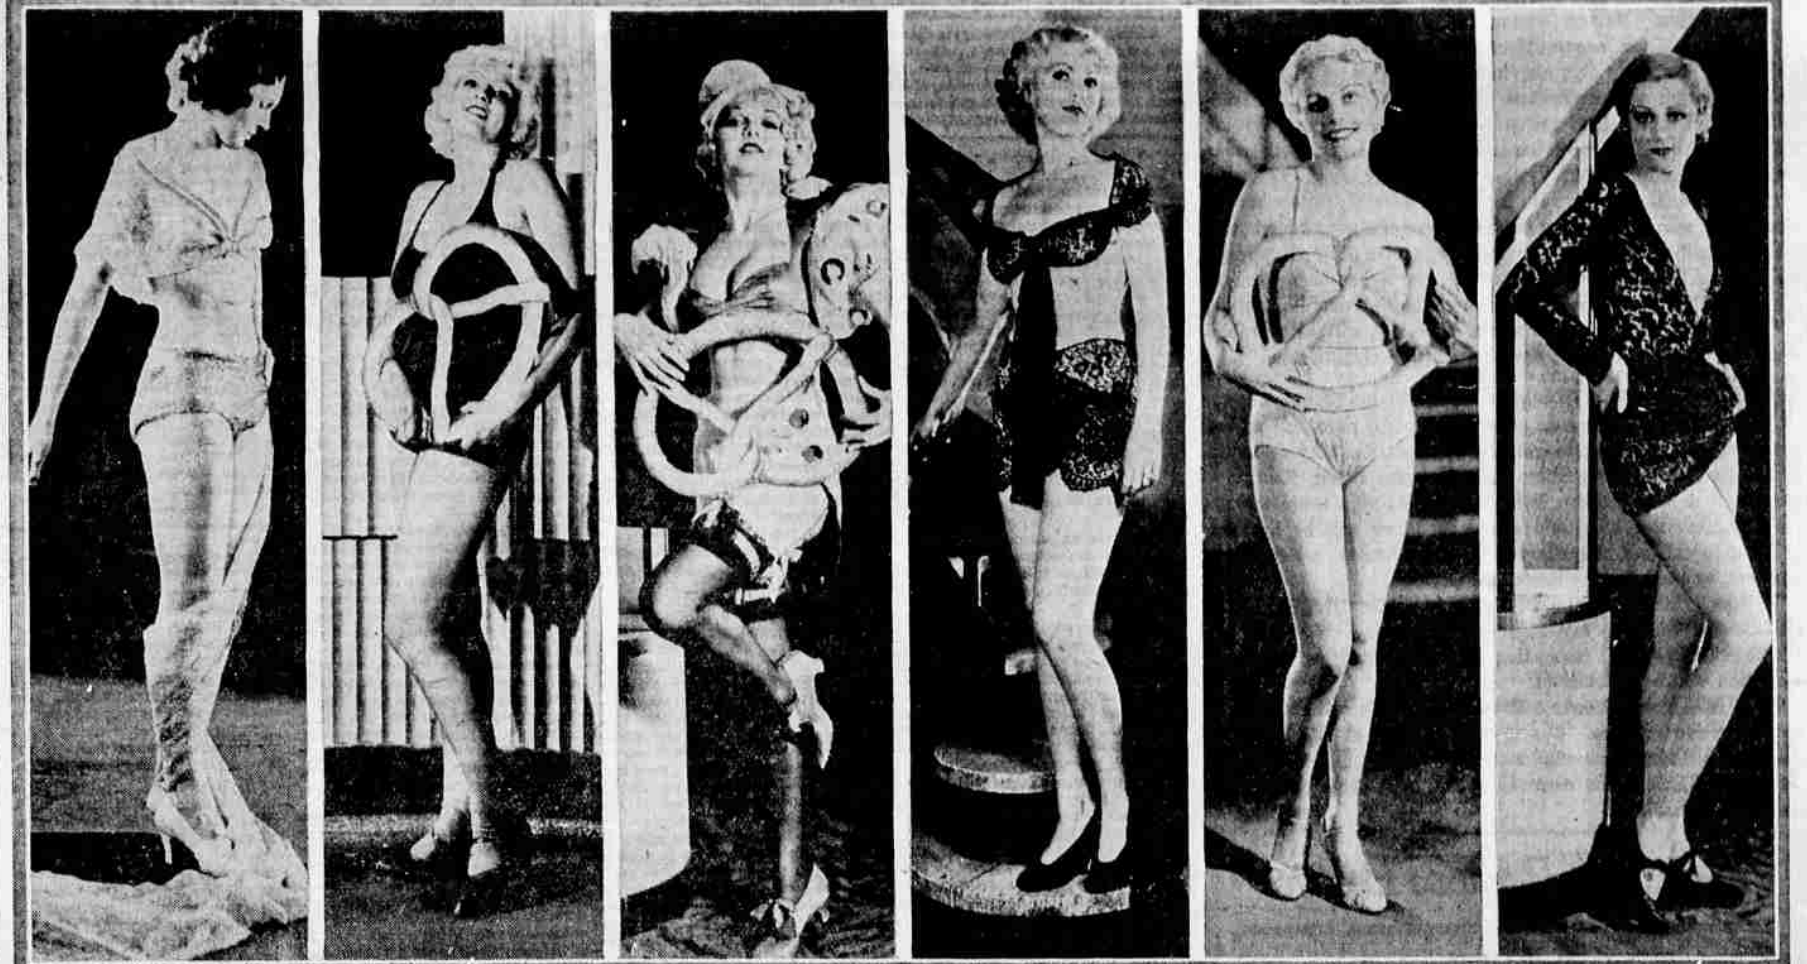

Only once did Gonzaga reach the 50 yard line on its own offensive drive but the Bulldogs showed lots of fight and a strong defense.

Washington made victory safe in the third when Ole Hanson, substitute halfback, put his men within scoring distance by running back a punt 23 yards to the Gonzaga 12 yard line, and Ahonen slipped around left end to score standing up on the third play.

Bevy of Pulchritudinous Pretzel Benders In Craterian Hit, "Moonlight and Pretzels"

With 12 stars, 100 of New York's most beautiful show girls and eight song hits including the already popular "Are You Makin' Any Money?" "Moonlight and Pretzels" opens at the Craterian theater today for a three-day run.

OREGONIAN HAS RARE AUK NEEDING HOME

PORTLAND, Ore.—(UP)—Dora E. Dietz, Portlander, reports she has a very elegant auk—usually as extinct as the renowned dodo—which she will sell to an "auky" buyer.

The story deals with a man isolated on a desert island, where he works out his own salvation after the manner of Robinson Crusoe, except that he is confronted with many harrowing experiences.

"ROBINSON CRUSOE" OPENS AT STUDIO

An unusual musical score lends intimate quality to the Douglas Fairbanks film, "Mr. Robinson Crusoe," which opens at the Studio today.

The story deals with a man isolated on a desert island, where he works out his own salvation after the manner of Robinson Crusoe, except that he is confronted with many harrowing experiences.

Pear Summary Copies Available

Fruitmen wishing a pear summary, covering the marketing of the 1932 crop, are advised that they can obtain the same by writing "Market News Service, 341 U. S. court house, Portland, Ore."

The report was recently released and will be available to anyone wishing a copy.

ANCIENT MAYAN HIGHWAY FOUND AMONG JUNGLES

System of Mighty Roadways Discovered Deep in Yucatan Peninsula—Lead to Coba: Once Great City

WASHINGTON—(AP)—A network of mighty roadways, deep in the jungles of the Yucatan peninsula, where more than a thousand years ago scuffed the feet of the whip-driven slaves of the ancient Maya civilization, has been rediscovered and trod again by man.

Findings in these dense jungles indicate that coincident with the construction of highways, that made Rome the greatest ancient road builder, there was a Mayan empire in Yucatan that likewise understood the mixing of mortar and the military and commercial values of great roadways.

Sixty-five miles east by south of Chicken Itza, headquarters of the archaeological field staff of the Carnegie Institute of Washington, lies Coba, a Maya metropolis of the pre-Columbian days, long since forgotten.

That Coba once was a great commercial center is seen from the archaeological discoveries made there.

As all roads once led to Rome, so all roads at one time apparently led to Coba, for the ruins of a number of ancient highways are found branching out in all directions like the spokes of a wheel.

One of these, entering the jungles to the west, was thought to end at Yaxuna, 11 miles south-southwest of the institute's headquarters at Chicken Itza. Intent on determining this, the expedition, headed by Alfonso Villa, a young schoolmaster of the Yucatan race, entered the dense undergrowth to the east of Yaxuna, determining to follow the road where ever it led.

Nearly 25 miles out of Yaxuna the party came upon a solid stone, cylindrical shaped, lying on top of the causeway toward one side—probably just where it had been left centuries before. It was broken in two about midway its length, and plainly showed the erosion of the centuries, but enough remained to satisfy the expedition that it had been quarried and given the cylindrical shape for a purpose—road construction.

Thirteen feet long and over two feet in diameter, this five-ton stone once was a road-roller. At intervals the party came upon stone platforms on either side of the causeway, some 16 feet high. These also were badly eroded, but it was believed they may have served as wayside shrines. In indications that walls had been erected directly across the road, apparently to keep out hostile tribes, also were found.

COPCO FEATURED "ALL ELECTRIC" MODEL KITCHEN

An "All-Electric Kitchen," which represents the acme of perfection in domestic kitchen equipment, is now on display in the lobby of the Copco home office building on West Main street. This is the first all-electric kitchen exhibit to be installed in this part of the state and it is anticipated that thousands of southern Oregon people will inspect this novel display during the next few weeks.

The new Copco kitchen is equipped with all modern, labor-saving appliances such as the electric range, electric refrigerator, electric dishwasher, food mixer, ventilating fan, telephon clock and many small devices, such as percolator, toaster, waffle iron and what-not. The scientifically arranged cabinets and drawers, which were installed by the Trowbridge Cabinet Works, represent the latest ideas in convenience and take care of every need.

The combination electric dish washer and metal sink promises to make a hit with local housewives who dread the daily drudgery of washing dishes, and the attractive refrigerator and range are the last word in this popular electric equipment.

The illumination of this "dream-kitchen" is also worthy of special attention as it provides an abundance of shadowless light, free from glare, and at the same time enhances the beauty of the decorative effects, which are both clever and colorful.

Proponents of the all-electric kitchen idea have stated that in this new and modern addition to the home the housewife no longer has to do the work with her hands; she merely directs it. Electricity preserves the food safely and economically in the electric refrigerator, cooks the daily meals automatically without constant supervision, and even washes and dries the dishes much more efficiently than by hand.

A snap of the switch and electric servants swiftly and silently accomplish the tasks that now require hours of time. In short, the "workshop of the home," where the average woman now spends one-third of her waking hours, becomes the most enjoyable room in the home—the new guest room of the house.

"All-electric" kitchens can be easily installed without rebuilding, according to local Copco officials, who advise that these new kitchens are not "standardized" but each is individually planned and designed. Local residents who are interested in building or remodeling may secure a color sketch with full specifications of an all-electric kitchen individually designed for their own homes by applying to either the California Oregon Power company of the Trowbridge Cabinet Works.

Eddie Cantor Revue On Rialto Program "Whoopee," Eddie Cantor's big musical comedy hit of about three years ago, makes a return showing at the Rialto theater today and Monday. The late Franz Ziegfeld exhausted every angle of his art to make the picture a memorable one.

The cost of the picture, originally estimated at a million and a half, was nearer the two-million mark when production was finished. The filming called for 74 changes of scenery, many of them taken in such world-famous beauty spots as Zion National park, 512 changes of costume and scenes including 400 and 500 people.

The entire Ziegfeld staff was combined to the studio staff to make "Whoopee" technically perfect. The finished product became a picture that is still making screen history.

BEAR HIBERNATION WILL BE STUDIED

YELLOWSTONE PARK, Wyo.—(UP)—The question of what bears do in the wintertime will be studied this coming season by Rangers Frank Childs and Ed O'Donnell.

They have buried a 50-gallon barrel in the ground, packing it with insulating straw and hay, and otherwise equipping it as a de luxe winter hibernating resort. Childs hopes to entice a wild yearling black bear into the den, thus gaining information on the behavior of the animals when not in captivity.

An oblong slit cut in the barrel top will give Childs and O'Donnell a chance to watch the sleeping bear as he breathes, and whether their circulation, temperature, heart beats and general disposition shows much change during the long nap.

Theresa Bennett Theresa Bennett died at her home west of Medford on the Old Stage Road, Friday afternoon, from paralysis, aged 38 years, 2 months and 9 days. She was born at South Bend, Ind., June 13, 1895. Wife of Frank P. Bennett. She had three sisters and three brothers, all living in South Bend, with the exception of one brother, Stanley Cupinski, of Myrtle Point, Ore.

Funeral services will be held at the Catholic church Monday morning at 10 o'clock. Rev. Father Francis W. Black officiating. Interment in Siskiyou memorial par. Rosary services will be held at the Park Funeral Home, Sunday, September 24, at 7:30 p. m.

Dr. Roy W. Scott, professor of clinical medicine at Western Reserve University, Cleveland, has a collection of 5,000 human hearts in his laboratory.

Black and brown bears have increased in the national forests from 50,506 in 1931 to 52,331 in 1932.

Dr. B. F. Geer, new president of Furman university, is the first alumnus to head the institution.

TOTALLY DRY BANQUET RARE EVENT IN PARIS

PARIS—(UP)—One of the few totally dry banquets ever held here was when the delegates of the General Federation of Women's clubs, on a world friendship tour of Europe, gave a party in honor of Theodore Marciner, charge d'affaires of the American embassy, and of Count Serge Fleury, attache of the French foreign office.

The menu consisted of turkey and cranberry sauce, sweet corn on the cob, ice cream and ice water—no wine, no liquors, no champagne.

Rome Burns In "SIGN OF CROSS" Rome will burn again, 2000 years after the famous blaze during which Nero fiddled. On the silver screen this time, "The Sign of the Cross," which opens at the Roxy theater today.

Frederic March, as the heroic perfect of old Rome, sacrificing wealth, position, even life for love of a Christian martyr-maid, is said to have the most vital role of his career. Elissa Landi, Claudette Colbert and Charles Laughton have the other principal roles.

Work has been started on Alaska's largest aviation field, at Cordova, costing \$50,000.

One bushel of wheat will produce 42.5 pounds of flour, sufficient for 62 one-pound loaves of bread.
