DETAILS GIVEN ON RETAIL CODE FOR OBSERVANCE HERE
Due to the fact that considerable confusion exists concerning the provisions of the master retail code, which went into effect in Medford yesterday, the Portland district headquarters of the National Recovery Administration, acting on orders from Washington, issued a list of businesses exempt from the retail code, lately approved by President Roosevelt. The list was received in Medford today.

The following lines of business do not come under the provisions of the master retail code: Milk and its products, foods and foodstuffs; dispensing of drugs, medicines or medicinal supplies by a dentist, doctor or veterinarian, provided such dispensing is incidental to their practice; any branch of retail selling already covered by an accepted code, such as gasoline and oil, new and used automobiles, lumber and timber products and oil burners.

All other sales at retail are covered by the retail code. However, it was announced from official sources that the selling of newspapers, coal and farm equipment at retail would shortly be covered by special laws regarding certain provisions of the code, or that they would soon be given separate approved codes.

Under "store hours and hours of labor," requirements of the code, three groups are listed and one of the schedules must be adopted by all establishments.

They read: Group A—Any establishment may elect to remain open for business less than 56 hours, but not less than 52 hours per week, unless its store hours were less than 52 hours prior to June 1, 1933, in which case such establishment shall not reduce its store hours; no employee of these establishments shall work more than 40 hours per week, nor more than eight hours per day, nor more than six days per week.

Under Group B—Any establishment may elect to remain open for business 56 hours or more per week, but less than 63 hours per week; no employee of such establishment shall work more than 44 hours per week, nor more than nine hours per day, nor more than six days per week.

Under Group C—Any establishment may elect to remain open for business 63 hours or more per week; no employee of such establishment shall work more than 48 hours per week, nor more than 10 hours per day, nor more than six days per week.

Within cities ranging from 2500 to 25,000 in population, in which classification is listed, the wages of all classes of employees shall be increased

BAPTISTS POSTPONE EVANGELISTIC DRIVE
Dr. W. H. Eaton, pastor of the local Baptist church, reports that it has become necessary to postpone the beginning of the fall evangelistic campaign next Sunday on account of the unexpected detention of the Cutler evangelistic party at Brownsville, where they are now conducting meetings.

Evangelist C. W. Culler writes that the campaign there has acquired a momentum which makes it impractical to close those meetings for another week. It is now expected that the meetings will begin on Sunday, November 12.

TINY TOT KILLED BY FALL IN HOthouse
BERKELEY, Cal., Nov. 2.—(UP)—Aetha Dempster, 2 1/2 years old, took her doll out for the usual morning ride in its tiny carriage today.

She pushed the buggy over a stone terrace and fell through the glass roof of a hothouse. Her jugular vein was severed. Desperate efforts by physicians to save the child's life by blood transfusions failed.

Accident Yesterday—Otha Oden of Grants Pass and Mrs. W. W. Howard have filed accident reports at the city police station on the collision at Eleventh and Fir streets Wednesday afternoon at 5 o'clock. Mrs. Howard suffered a number of bruises when she was thrown from the car, and Frank Wilcox of Grants Pass, riding with Oden, had an injured arm.

WATER PROTECTS RUBBER

that's why you get 30% more mileage by getting new Goodyears now!

OF COURSE you want the grip of tough new rubber between your brakes and the road in fall and winter—when there's more slippery driving than any other time in the year.

And now—scientific tests prove that tires "broken in" during wet, cold weather average 30% more total mileage.

Hot summer roads make tires wear faster. Using your brakes on hot dry roads is like holding them against a whirling grindstone.

But roads are cool in winter—and most of the time they're wet. That means danger when your tires are thin and worn. But it means protection for stout new rubber, because the water prevents rapid wear by preventing friction between the tire and the road.

Think that over, and ask yourself—can you afford to wait till spring when new Goodyear Pathfinders are still selling today at prices just about the same as they cost a year ago?

Not on your life! The wise thing—and the thrifty thing for you to do is to get new Goodyears Now!
