PEAR BREAD NEW AND DELIGHTFUL PALATE TICKLER

What are southern Oregon pears good for is a question that has been answered in many tongues during recent years, and in many fancy dishes concocted to tickle the taste buds in the world's big mouths. But it took Dr. George Schumacher of this city to answer it with "the staff of life." That's the latest pear by-product on the market today, ladies and gentlemen—pear bread.
Baked in the Schumacher ovens, several loaves were handed out this week to connoisseurs of cuisine. The report was, "fine food," and there was a rumor floating about the town today to the effect that "it will be great with beer." For there's a little rye and a little wheat mixed in with the pear flour to complete the loaf.
It's nutritious, healthful bread and promises to form an important channel for consumption of cull pears. Dr. Schumacher has been interested for many years in the development of by-products to eliminate the food waste now existing in the pear industry. Many products, previously promoted, fell into the luxury classification. The bread constitutes a staple food, and although still in the experimental stages, success is predicted for it by many people who are sincere in advocating advancement of the pear loaf.

SILVER TO BACK NEW CURRENCY

WASHINGTON, Nov. 3.—(AP) The treasury may soon issue \$11,000,000 in silver certificates backed by silver received in last June's war debt payments.
The Thomas amendment to the farm law, which authorized acceptance of debt payments in this medium, required that the silver thus received be backed by the value of the certificates.
The process of assaying the metal has just been completed.
The new step would be the engraving of the certificates.
Treasury officials denied today that this could be considered inflationary, as the certificates will be used in the normal course of business to replace other forms of currency as they are turned in at the treasury for redemption.
They pleaded guilty to charges of second degree murder.
Mrs. Fleming, the middle-aged farmer who hated "boy babies," and his wife Alleta, were sentenced to life imprisonment today for the murder of their two-month-old son last August.

Who Wouldn't Obey?

NEW YORK, Nov. 3.—(AP)—The kind of wool which kept the cave woman warm may be widely worn soon by her modern daughters, through a discovery announced to the United States Institute for textile research today.
This wool is "kemp," which textile manufacturers have regarded as "dead," and carefully sorted out because it does not take dyes well. Discovery that it is not dead, but a "throw-back" to primitive sheep, and that it can be dyed beautifully, was made at Massachusetts Institute of Technology.
Primitive sheep of the cave woman's epoch had two coats of wool. One was inner fleece, the other an outer coat of hairs highly resistant to color. When man began to manufacture woolen goods this outer coat would not dye well, so he called it "kemp" and began to breed it out of sheep. Tuffs of it still persist.
Putting the kemp under high-power microscopes at the Massachusetts institute, Prof. E. R. Schwartz found it smoother than the more highly prized wool, and its interior structure quite different. It has a core of cells arranged like those of a honeycomb. Air packed in and around the cells prevents dye from penetrating them.
But by tanning the air out of the kemp hairs they take the dyes more freely than normal wool.

PIONEER WOMAN TO FINAL REST

PORTLAND, Ore., Nov. 3.—(AP)—Funeral services were held here yesterday for Mrs. Elizabeth D. King, 70, who was born in a blockhouse near the present site of Olympia, Wash. She died here Tuesday.
Mrs. King was the daughter of William Moore Rutledge, a descendant of Edward Rutledge, who signed the Declaration of Independence. Her mother was Sarah Jane Scott, daughter of Major Scott and niece of General Winfield Scott, hero of the Mexican war.
Her father crossed the plains by ox team in 1852, went north to the Puget Sound country and operated the first grist mill in that area. Mrs. King was born during an Indian uprising. The family had taken refuge in the blockhouse.
Her first trip to Portland was made by stage to the Cowitz river, thence by Indian canoe to the site of Longview, where she boarded a steamer for Portland. In 1902 she married the late S. W. King, founder of a large department store here.

'HUMAN RADIO' GAINS RELIEF

SEATTLE, Nov. 3.—(UP)—A radio insulation belt has brought relief to Martin Bodker, "human radio" of Emuclaw, Wash., he revealed today.
Radio disturbances have made life miserable for the dairyman until he invented a wire-trapped case to "ground" his body.
Bodker said today the belt consisted of a square piece of metal with six contact points pressed against his flesh. An insulated wire girdle holds the metal strip against his body.
The radio sufferer still carries the wire-trapped case for support. He said the annoyance of radio waves greatly weakened him.

SHERIFF-GUNMAN ESCAPES OFFICERS

CHICAGO, Nov. 3.—(AP)—Yakov O. Miller, the one-time South Dakota sheriff, who turned fugitive after he became one of the most hunted men in the country, was still at large today after escaping the gunfire of Chicago agents who traced him to a Federal hideout.
In custody, however, was a woman whom agents said they believed was his wife.
