

Approach of Holidays Brings Fine Programs for Radio Owners

COPCO OFFERING FREE INSPECTION SERVICE ON RADIO

The free radio inspection service inaugurated a short time ago by the California Oregon Power company is being received cordially by local people. Many of the causes of poor radio reception believed to be the fault of broadcasting stations or atmospheric conditions are in the radio receiver itself and are oftentimes easily corrected if the true cause is known. Because the power company is vitally interested in having every electric user receive the greatest possible benefit from all electric service, so they state, the free inspection of radio sets in the home by an expert qualified to find defects in radio receivers and recommend the remedy is given free to their customers. Poor radio reception may be the fault of any one of the following common causes:

A Old type radio set incapable of receiving modern perfect tone broadcasts, radio out of adjustment, worn-out radio tubes, poor aerial, poor ground, static caused by electrical discharges from cloud to cloud (in the new type radios minimize and in some cases eliminate this trouble), fading of broadcasting signals (this trouble is eliminated in the new set equipped with volume control), pulsating signals (two or more stations on the same wave length), natural electrical discharges from power circuits. Household appliances of all kinds may cause interference, especially if they are worn out or in disrepair, electric spark type ignition oil burners may cause a loud buzz, poor connections in house wiring or fixtures, violet ray and other home electric treatment machines, X-ray machines, telegraph, telephone and railroad signals, some types of electric sign flashers and home lighting plants may all cause trouble.

Very often the faults are in the set itself and when this is the case an expert inspection will show exactly what is wrong. When the fault is once known the remedy is usually a simple matter. The company explains that they are selling nothing in radio excepting the small amount of electricity it uses, which averages 1 cent for each six hours of operation on the appliance rate, according to the company. All radios and radio repairs must be purchased through dealers not connected in any way with the company.

Radio entertainment has come to be one of the most important of home features in the great majority of American homes. During the past year a great improvement has been made in the construction of radio sets, together with substantial reductions in the price of radio receiving equipment. The addition of short wave reception to the regular broadcast wave band brings programs from all parts of the world.

Moscow, Buenos Aires, Berlin, London, Paris, Madrid, are brought to your chair at the turn of a dial. Another turn, and the voice of an air pilot, high above the clouds, fills your room. Spin the dial again and hear the soft, tense police broadcast to roaming cars and ready cops. Literally, the world contracts to a tiny globe beneath one's finger tips. Entertainment may be musical, theatrical or starkly human news. Marvelous tone (with the new dual wound speakers) . . . steady volume without fading (volume control) . . . visual tuning (exact silent tuning of each station) . . . short wave reception from all parts of the world are all yours with the new radios of today.

KMED Broadcast Schedule

- Friday.
- 8:00—Breakfast News, Mail Tribune.
 - 8:05—Musical Clock.
 - 8:15—A Peerless Parade.
 - 8:30—Shopping Parade.

Mae West Coming in Holly Film

For her new picture, "I'm No Angel," coming to the Holly Saturday, Mae West has selected an entirely modern background, contrasting sharply with the Gay Nineties of "She Done Him Wrong." She plays the role of Tira, a carnival dancer, who, after startling the boys in the small town, comes to New York and wrecks havoc upon the hearts and homes of New York's playboys.

Miss West stars in her pictures; not content with that, she also writes the stories for them. She always has written her stage plays and vaudeville acts, and has done all her own research. A keen student of life and an absolute realist, she leaves no path unexplored to gain first hand knowledge of the subject matter of her story.

EGG PRICES DIVE AFTER REDUCTION BY CO-OPERATIVES

PORTLAND, Nov. 23.—(AP)—General slashing of egg prices on the open market, which finally forced local co-ops to loosen their price by at least 10 cents was not terminated by such action. In fact, open declines in the price only served to stimulate depression in the trade. Slashing continued with sales of fresh cut as much as 20 dozen below established values. While most of the severe cutting was reported by small operators and chiefly nearby country stores, it has become practically impossible to force more than a nominal value of sales at the extreme values.

Out-state operators were reported as slashing values generally which again upsets the local trade. Market for butter was showing artificial character with continued government buying. Much stuff was being pulled out of storage, taking away more than normal volume of fresh sales. Prices were unchanged. Prices were being generally held here with chicken receipts of small volume. Only the fact that turkeys were so cheap keeps this market from showing betterment.

Shipment of packers' pork from outside points, which has caused more or less price shading here, finally resulted in a lower price in country killed.

Packers were also bearish in the veal market and were bringing in huge stocks on contract which were reported selling to retailers somewhat under country killed stuff.

Markets

Livestock
PORTLAND, Nov. 23.—(AP)—Cattle 50; calves 90; steady, unchanged. HOGS 250; steady to weak, unchanged. SHEEP 600; nominally steady; lambs, good and choice, \$5.25-\$5.75; others unchanged.

NEW YORK, Nov. 23.—(AP)—Stocks turned downward today after mulling about indecisively in the early part of the session. Wheat dropped more than 3 cents a bushel, the dollar rallied sharply against foreign exchange and traders appeared highly confused over the currency controversy. The close was generally heavy. The turnover amounted to about 1,350,000 shares.

Today's closing prices for 32 selected stocks follow:
