Wholesale Shifting Due to Failure Mix With Faculty - Too Much Specialization - Testy Before Games

CHICAGO, Dec. 28.—(AP)—Football coaches would hold their jobs longer if they taught another sport and made themselves more indispensable to their schools...

What are the causes for the constant, wholesale shifting? Simply this: The coach didn't mix with the faculty; he failed to add anything to the life of the community other than produce a football team...

Recruiting and subsidizing of athletes are on the wane, Dan McGugin of Vanderbilt university, president of the association, said...

The odds, which until yesterday favored the westerners by 10 to 8, in spite of much "expert" opinion on the other side, may shift to make the eastern squad a slight favorite by game time, bettors believed.

POISON PLOT HAD FINNISH OFFICERS AS TARGET, CLAIM

HELSINKI, Finland, Dec. 28.—(AP)—Authorities announced today they had discovered a large scale plot to poison high officials of the Finnish army's technical groups and ordered a dead official's body exhumed in the belief he was murdered.

The alleged plot, they claimed, is part of what they describe as the espionage conspiracy in connection with which two Americans, Mr. and Mrs. Arvid Jacobson of Michigan, were arrested October 27. Jacobson was a mathematics instructor in the Northville, Mich., high school three years.

The body to be exhumed is that of Lieut. Col. Fritz Walter Asplund, director of the state munitions works until his sudden death last April. Police physicians will conduct an autopsy to determine whether he really died from inflammation of the lungs, the cause given on his death certificate.

Police say the symptoms of death from lung inflammation and from certain kinds of poisons are similar. It was recalled today that, at the time of Asplund's death, three other officials were suddenly taken seriously ill.

TWINS HAVE TWO FATHERS, IS RULE IN DIVORCE CASE

Court Decision Is Received With Skepticism by Medical Science—Mother's Admission Important Factor

YANKTON, S. D., Dec. 28.—(UP)—The legal claims that twins born 10 years ago to Mrs. Ewald Peddie had three parents were recognized today in the court of Judge A. B. Tripp when the jurist granted Peddie's claim of a divorce on infidelity grounds.

The divorce plea was believed to be without precedent in legal annals and medical authorities said such a case had never been authenticated by science, although theoretically possible. Peddie's petition, won by default, claimed that his wife had been unfaithful and had admitted her infidelity. Peddie maintained that he was the father of one of the twins born to his wife and that a neighbor was the father of the second child.

Medical testimony presented to the court said that in a case of fraternal twins it was possible for a different man to father each child. The court, impressed by the weight of the evidence, awarded to Peddie custody of the boy which he said was his and gave the mother custody of the son whose parentage is disputed.

Peddie testified that his wife had told him that only one of the boys was his. The twins, said Peddie, resembled each other in no important physical characteristic. One boy looks much like Peddie. The other, said the husband, resembles the neighbor with whom the mother admitted infidelity.

The opinion of a medical expert entered in the court records said: "In case of fraternal twins, the children might develop from two separate cells of the female, impregnated at two different times within the interval which might be as great as several hours."

CHICAGO, Dec. 28.—(UP)—Professor H. H. Newman, University of Chicago scientist, regarded as one of the nation's leading geneticists, expressed grave doubts of the authenticity of the Yankton "two fathered" twins.

"Such an occurrence is scientifically possible but most difficult of proof," said Newman. "It is quite true that the one might be fertilized by different sperms but scien-

HOG TAX EVASION RILES SECRETARY

WASHINGTON, Dec. 28.—(AP)—Secretary Wallace today threatened to use all powers of the farm administration to prevent the evasion of processing taxes by local hog buyers.

In a statement, the secretary declared that local hog buyers, small processors, and other purchasers of live hogs for commercial slaughter have been reported to be deducting part or all of the processing tax from the market price quoted to farmers selling hogs.

"Country buyers and others, who, in settling with the farmer, make a deduction for the processing tax on the bill of sale, are penalizing the farmer and are tending to frustrate the declared policy of the agricultural adjustment act," Wallace said.

"There is absolutely no excuse for such a practice and farmers should refuse to sell to any buyer who makes or proposes to make any such deductions."
