Hal Hoss

So it's "30" for Hal Hoss. No man ever made a more gallant fight for life, than this veteran Oregon newspaper man, who left his copy desk on the Oregon City Enterprise to become secretary of state under the late Governor Patterson.

A year before his death he was critically ill, and several years before that, he was a very sick man. Had he followed the advice of friends and family, at that time, and taken to his bed, he might be alive today.

But while he looked like some sort of pre-Raphaelitic ghost, and presented a wan and smiling countenace to the world, there as guilible as were the crudely trained was not only plenty of fire and iron within, but there was a practitioners of the nineteenth cen-

He also had, as do so many victims of tuberculosis. (it appears to be a fundamental characteristic of the disease) an unfailing spirit of optimism-a faith that no matter how dark things looked they would come out somehow all right in the end. So he stuck to his job, fought for what he believed to be right, regardless of the odds against him, until he literally dropped in his tracks, had to be carried out, and was taken to an Eastern Oregon sanitarium. But then it was too late, and for many months, the final summons, were only a question of time.

Too bad! The death of Hal Hoss is a loss to the newspaper profession of Oregon, and a great loss to the state. He was a capable journalist, an efficient secretary of state, a most lovable and considerate friend.

The Tuberculosis Toll

coids, coughs and other respiratory ills begin with the season of months that have "R" in their names. At that, wouldn't it be fine if respiratory ills did not occur in the months when oysters are out of season! The manu-facturer's plea to the incompetents in the profession goes on to say that during the season for respiratory dis-eases So-and-so's Compound with ONLY a short time ago, the Christmas Seal sale was concluded, the proceeds of which go to fight this dread disease of tuberculosis.

The death of Hal Hoss again calls attention to the public and human need of such a fund-how necessary it is that this fight should not only go on, but should, from the standpoint of the public welfare, receive more general and generous support.

Like many other diseases tuberculosis is not difficult to prevent, not difficult to control in its early stages, but once deeply entrenched and allowed to advance, the fatality percentage is simply appalling.

This fund is devoted largely to prevention and facilitating Chicken coops are being robbed. The police have not decided whether the thieving is the work of hungry transient indigents, or neighbors get-ting ready to plant a garden. discovery of the disease, so prompt treatment can start,—the two methods of approach, which alone can place tuberculosis in the same category as smallpox and diptheria—once greatly dreaded, but now far down in the list of death causes.

We hope that when another Christmas comes around, the death of Hal Hoss, stricken down in what should be the prime of life-may be the cause of more people, giving more money, to support and carry on the war against this terrible disease.

Mrs. Greenway's Debut

WHILE on this subject,-which we admit isn't pleasant, but we feel IS, important-we are surprised that the maiden speech of Mrs. Greenway of Arizona in the House of Representatives on January 31st, did not receive more general notice in the press,

Mrs. Greenway, as everyone knows, is not only a close friend of President and Mrs. Roosevelt, but one of the latter's most intimate ones. Yet her debut as a "congresswoman" was marked by one of the most "SCATHING indictments of the administration's "ceonomy bill" that we have seen.

Here is, her picture, for example, of WHAT this economy drive has done to the war veterans suffering from tuberculosis, in her own state:

er own state: I want to give you a description of my home. We have two mormous hospitals. In these hospitals in 1924 were put to bed hundreds of ill men on the presumption that they might pos-sibly become ill through some service connection. Now, friends, think of this: Those men were not asked to prove service con-nection; those men possibly were not asked to prove service con-nection; those men possibly were not asked to prove service con-nection; those men possibly were not acked to prove service con-nection; those men possibly were not acked to prove service con-nection; those men possibly were not acked to prove service on the possible of the possible were put in those beds with have been put in those beds and cared for at the expense of Unche Sam. But those people were put in those beds with advance cases of tuberculoals, and their families were given 400, 550, 540 a month to live on in 1924. Those people have lain in those beds, presumably put there by a group of government officials, ourselves, put there and told that they would be cared to while their families pud 54, 55, and \$10 a month on little shock which they hoped ultimately to own and live in. Today when you go through these hospitals in my state, hospitals built with federal funds, magnificent, adequate hospi-tals you will find that whole wings are empty and those men is any three these years wasting away, who lost by the Economy Act that putance upon which their families lived while they ded, those men got up and asked for their clothes at a time when they had temperatures of 100, 101, or more or less, Il, exdaverous with heckie spots in their checks, and those people

when they had temperatures of 100, 101, or more or less, ill, cadaverous, with hectic spots in their checks; and those people today are walking the streats of my home state begging for work that they may support their wives and their children for whom we as a government have been caring for for 3 years. And now the issue in regard to the presumptive cases, which include the Spanish war veterans, is: Do you, as a body, mean to repudiate yourselves as of former years? Do you feel that you can take dying human beings—and when I say dying I pray that none of you may know what it is to die with tuberculosie:

Personal Health Service

By William Brady, M.D.

Signed letters pertaining to personal health and hygiene not to dis-ease diagnosis or treatment, will be answered by Dr. Brady if a stamped velf-addressed envelope is enclosed. Letters should be brief and written in ink. Owing to the large number of letters received only a few can be an-swered. No reply can be made to queries not conforming to instructions. Address Dr. William Brady, 265 El Camino, Beverly Hills, Cal.
