2000 CCC YOUTHS CAN TESTIFY TO GOODNESS OF FLUHRER'S SPUN BREAD

Spun Bread

FOR the two months prior to the introduction of Spun Bread we made a batch of this new type bread each day in order to perfect the special Dough Processes necessary to Spun Bread.

AS we were not yet ready to place this bread on the market these batches of Spun Bread were included in the deliveries of bread to the various CCC camps which we have been supplying.

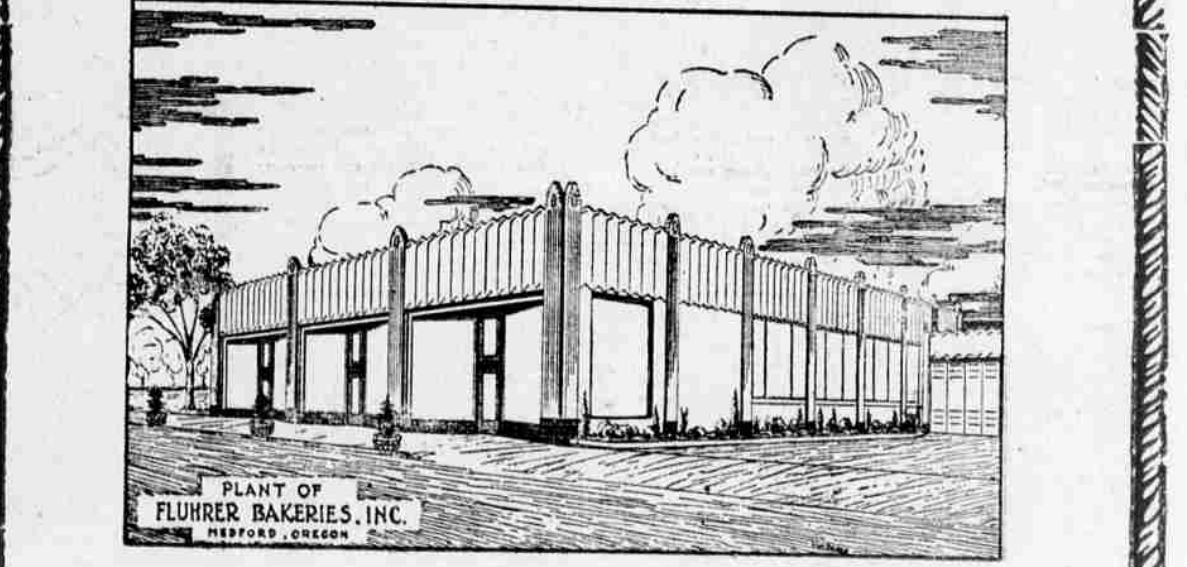

IT was not long until some of these camps began to ask us if we could increase their allotment of this new type bread. Their approval was most enthusiastic and convincing.

WE believe you too will feel the same way after you have tried Spun Bread. You will note a flavor not found in the ordinary bread—the Spinning process in which two strands of dough are intertwined is the secret of this superiority of Spun Bread over ordinary bread. Ask your grocer about it today.

DIFFERENT TEXTURE
Note the difference in Texture of plain bread and Spun Bread. Diagonal Air Cells in Spun Bread prevent free circulation of drying air through the slices.

From One of the Coast's Finest Bakeries!

The comments of the various tradesmen and bakers who have come to inspect it from all parts of the coast have been most complimentary. We believe that with this new plant and the knowledge gathered from two generations of experience in the baking business that now more than ever before Fluhrer's Breads are the finest the market affords.
