P. E. O.'s Have Lovely Evening in Grants Pass

One of the loveliest affairs in keeping with the Valentine season was the party held last evening at the home of Mrs. Chas. Cooley of Grants Pass, when the P. E. O. chapter in that city entertained members of the Medford chapter AA.

Dinner was served preceding the regular meeting, with one large table and several small ones decorated in the Valentine motif with red candles in crystal holders, Valentines for place cards and corsages for all visiting guests.

Following the regular meeting, an interesting program was presented by the Grants Pass hosts. The 19 guests attending from Medford were: Mrs. J. P. Fiegel, Mrs. T. W. Miles, Mrs. Lois Young, Mrs. J. G. Love, Mrs. L. E. Williams, Mrs. C. C. Furnas, Mrs. Leland Menzer, Mrs. Frank Roberts, Miss McKay, Miss Gertrude Parker, Miss Katherine Stewart, Mrs. F. Wilson, Miss Marjorie Kelly, Mrs. E. E. Kelly, Mrs. R. B. Hammond, Mrs. C. D. Thompson, Mrs. E. A. Moore, Mrs. W. E. Tully and Mrs. Cobb, a member of the Grants Pass chapter, now residing in Medford.

in many cities and have proved very helpful to all societies within the churches.

Mrs. Geo. P. Kabele of the Lutheran church will direct the noon hour program, to which all ladies unable to attend the other services of the day are cordially invited.

All interested women are invited to attend the services, regardless of other church affiliations.

Travel Study Club Has Interesting Session

The Travel Study club held a very interesting meeting last Monday afternoon at the home of Mrs. Walter Frazier Brown on West Eleventh street. Mrs. F. C. Albert gave a complete and interesting biography of David Livingstone, one of the pioneer missionaries in Africa. She brought out that Livingstone was a guide, philosopher and friend to a vast district in Africa. He dedicated his whole life to God and thus to Africa. Cecil Rhodes, another character, was very ably presented by Mrs. C. L. Furry. He dedicated his life to the extension of the British Empire and for the gain of money. The contrasts in these two lives were made very evident.

All members of the club brought interesting items about Africa and Africans during the current events period.

ADVISE SPRAY FOR BLACKBERRY MITE

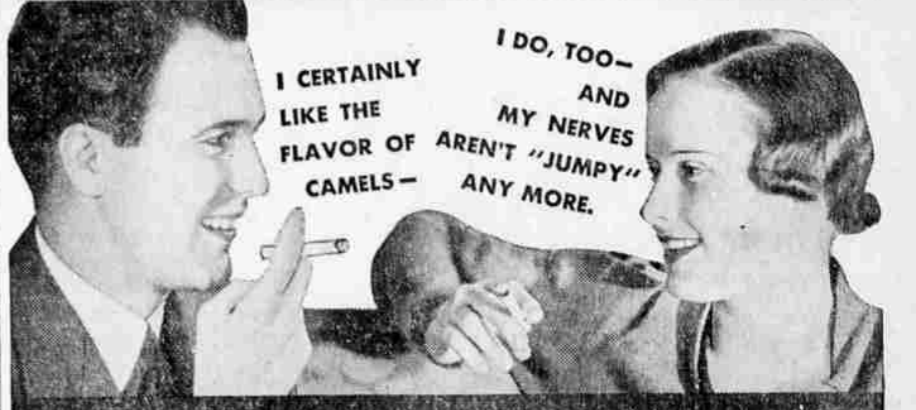

Blackberry mite, which causes the so-called "red berry disease of blackberries" may be easily and successfully controlled by spraying all canes thoroughly at this time of season.

with liquid lime sulfur, one gallon to 12 or 14 gallons of water, according to County Agent L. P. Wilcox. The mite works its way into the buds prior to the bloom period and so injures the small berry that normal development is impossible. Berries injured by the mite remain red and hard, failing to mature. The Himalaya variety is most susceptible, but injury is known to occur on other varieties to a certain degree, even those growing in the wild state. It would be advisable, therefore, to spray the canes of all blackberries, regardless of variety.

Growers desiring to control the mite should plan to apply the above recommended spray before the first leaf buds break open.
