

WOMEN DOCTORS NEED OF DAY IS EXPERTS CLAIM

Maternal Instinct Naturally Fits Sex for Preventative Medicine—Many Mothers Need Greater Care

BALTIMORE, March 7.—(P)—More women are needed in the practice of medicine, Dr. Joseph Gold Bloodgood, eminent cancer specialist, told the student body of Goucher college today.

"Woman was once considered an inferior, but now that we've educated her she may prove a superior being," Dr. Bloodgood said.

"I feel confident that we need, in all the civilized countries, a larger number of women fundamentally trained in the medical sciences, not only as practitioners of medicine in the specialties and general practice, but in laboratory positions, research work, and in the public health."

Maternal Instinct an Aid.
Women, Dr. Bloodgood said, have a maternal instinct that naturally makes them better fitted for practicing medicine.

"My experience teaches me that women are taking to preventive medicine more quickly than men. The greatest protection against disease today is the continuous care of the medical and dental professions, and we need more of the best trained women physicians to take their place in this preventive effort."

Discussing the dangers of cancer, Dr. Bloodgood said only 10 per cent of mothers have adequate protection because of lack of examination and general knowledge.

Preventive Care Needed.
"The women," he said, "ultimately should have a great deal to do with prevention of cancer in women, and establishing preventive measures from the pre-natal stage."

"If we educate mothers to put themselves under the continuous care of the medical and dental professions, and so educate the medical and dental professions to meet these demands, few, if any, women will die of cancer of the cervix, of the breast, of the mouth or of the skin."

No beautiful woman has cancer of the skin, because she pays immediate attention to every skin blemish," Dr. Bloodgood said.

TICKETS GO FAST FOR BELL RINGERS

Tickets for the Royal Bell Ringers' concert to be held Thursday night, March 8th, at the high school auditorium, at 8:00 o'clock, have been much in demand the last two days, it was announced by E. C. (Jerry) Jerome this morning.

The concert is being sponsored by the general committee for Oregon Diamond Jubilee celebration and the proceeds will be devoted to publicity purposes.

On their present tour of the west, the Bell Ringers have been playing to capacity houses, particularly in the larger cities, due to the fact that their program is not only different, but reputed to be the finest of its kind offered in the world. This group has arranged whereby the bells are placed before each performer and do not have to be rearranged for each individual number. It is reported that it is the only bell ringers group which has perfected this idea.

Specialty numbers, glassophone numbers, and singing will complete an all around fine entertainment price. Tickets are on sale at the chamber of commerce.

MILL OWNER KILLED UNDER FALLING SNAG

BEND, Ore., March 7.—(AP)—Fred Anderson, 82, owner of a sawmill on Tumalo creek, west of here, was killed today by a snag which had been toppled over by the wind. He was to have opened his mill April 1. He had been engaged in the lumber business in the Bend country for many years.

If you have not already made an inventory of your business and will please remember the Commercial Printing Department of the Mail Tribune, 28-30 No. Grape, carry inventory blanks. Phone 75 and we will deliver the blanks to your place of business.

Vienna-Bound?

Rumors persisted in Austria that Archduke Otto (above), youthful claimant to that nation's throne, would be brought to Vienna as part of movement to restore an Austrian monarchy. (Associated Press Photo)

MEDAL TO MOODY FOR PUTTING LID ON TURMOIL HERE

Ralph E. Moody, assistant attorney general of Oregon, who conducted the prosecution against L. A. Banks and Earl H. Fohl, local agitators, in the turmoil cases arising in this county, has been awarded the 1933 medal of the United States Flag association for the most conspicuous service in the advancement and enforcement of law and order in this state.

The award is made annually by the association in connection with the nation-wide war on crime. Assistant Attorney General Moody will be awarded the medal by Governor Meier at a date to be fixed later. Moody has been ill since last October.

The purpose of the decoration is to stress in the public mind the importance of law enforcement and commendation in the efforts of those working for enforcement of the laws. The award also invokes public recognition of meritorious and oft-times courageous action of law-abiding citizens, who, through loyalty and patriotism, contribute to the security of society by advancing the cause of law enforcement.

Moody conducted the prosecutions against Banks for murder, resulting in his sentence to prison for life, and against Earl H. Fohl, Walter J. Jones of Rogue River, Arthur La Dietz and Gordon L. Schermerhorn, former s. griff, for ballot theft, six-teen of the lesser lights in the vote stealing entered plea of guilty.

Commendation was also accorded Charles P. Pray, superintendent of the state police, and members of that organization, for their services in restoring order in the local situation.

STAVISKY'S WIDOW PLACED ON GRILL

PARIS, March 7.—(AP)—Mme. Arlette Stavisky, pale in the widow's black she donned when "Handsome Alex" Stavisky died of a revolver shot as police surrounded him, faced two score inquisitors today.

Her interrogators were the members of the commission assigned by the chamber of deputies to uncover the ramifications of the great Bayonne pawnshop swindle which cost the French \$40,000,000 and two governments.

LIQUOR CONTROL RUNNING SMOOTH BY APRIL FIRST

Commission Will Complete Survey of Operations, Check Costs and Income and Adjust Overhead

PORTLAND, March 7.—(P)—By April 1 the state liquor control commission and its organization will be running as smoothly as a well-tuned piece of fine machinery, it was said here today by George McMorran, chairman of the commission, as he prepared to return to his home at Eugene after spending three days here with the other members, Alex G. Barry of Portland and James Burns of Condon.

McMorran said that by the first of next month the commission will be able to survey its operations, check its operating costs and its income, and with a normal business volume being done, so adjust its overhead as to provide for an irreducible minimum, with a resultant probable influence upon consumer costs.

It was said to be probable that by April the commission will appoint some state-operated stores with state agencies designated where the volume of business has disclosed that the agents can handle the business more economically.

The next meeting of the commission will be held Thursday, March 15, at the head office in Salem. The commission expects to have data available which will permit definite consideration of the plan for putting on the market liquor blended in Oregon at a price less than comparative blends purchased in bottles from distilleries.

Importation of aged malt from Scotland, to be blended, bottled and sold by the commission, is proposed.

In Memoriam

Southern Oregon lost a rare citizen in the passing, March 1, of Alice Applegate Sargent. As the funeral cortege passed through the streets of historic Jacksonville Sunday afternoon, and wound its way up to the cemetery on the hillside, those who knew saw two evidences of her generosity—the historical museum which she purchased and presented to the Native Daughters several years ago, and to which she gave many of the exhibits and much of her own time and attention, and the stone retaining wall which guards the steep cemetery road.

The Spanish War Veterans buried Mrs. Sargent with military honors, as a full comrade—a tribute rarely paid to a woman, but felt to be deeply fitting by all who knew the soldierly spirit of one who not only followed the flag of the United States for 32 years, accompanying her husband on campaigns in both Cuba and the Philippines, but remained the finest type of peace-time patriot until her death at the ripe age of 82.

While her bravery is remembered, let not her tenderness be forgotten. To those who ate the bread she provided for the local relief station through all the dark days of the depression, to the other neighbors, relatives and friends to whom her countless benefactions were extended at times when her help meant the saving of home, or health, or hope, the stately lady of Casa Grande may have seemed wealthy; only those nearest her knew the painful economy she

WEATHER RECORD SHOWS FEBRUARY AMONG MILDDEST

Monthly meteorological notes for February, compiled by W. J. Hutchinson, local meteorologist, show a month of abnormally mild winter weather and much in contrast to the weather of February a year ago.

During February, 1933, temperatures averaged well below normal with a monthly temperature mean of 37.7 degrees, a record low mean for 22 years. Average daily temperatures for this February were mostly above normal with a monthly mean of 45.6 degrees, one of the three highest February means in 23 years.

Precipitation, except for a moderately heavy rain on the 27th, was extremely light. Normal rainfall for February is 2.36 inches and with a total of 0.76 inches for the month a deficiency of 1.60 inches is shown. Light rains were scattered throughout the month with the greatest 24-hour fall of 0.48 inches occurring on the 27th. A short period of hail was recorded on the 8th, and light sleet fell for a few minutes with the rain of the 21st. Occasional snow squalls were observed over the surrounding mountains, but no snow fell in the vicinity of the station. Seasonal precipitation totaled 6.92 inches at the close of February; a deficiency of 5.67 inches as compared with the normal of 12.59 inches.

Overcast skies prevailed during the greater portion of the month with occasional periods of broken clouds and a few days characterized as clear. Morning valley fogs occurred on the first four days and on the 6th, 9th and 23rd.

Winds were mostly light to moderate in speed, averaging an hourly velocity of 3.3 miles. Prevailing winds were northerly and the accumulated monthly movement totaled 3589 miles. During the development of monthly weather on the 7th a maximum velocity registered 35 miles per hour from the southeast. Gusty surface winds, at times reaching a velocity of 27 miles, were also recorded on the 6th, 10th and 19th.

Weather as a whole was favorable throughout February to the rapid growth of vegetation and the early development of fruit tree buds. Soil conditions, however, were not entirely satisfactory, due to subnormal rainfall.

BRITISH PLANNING INCREASE IN NAVY

LONDON, March 7.—(AP)—Construction of four new cruisers and many other craft is provided for under increased navy estimates for 1934 announced by Great Britain today. The navy estimate for 1934 total 2,980,000 pounds (\$14,900,000).

In addition to providing for a ships construction program, the estimates also make provision for increasing the naval personnel. The construction program included: Four cruisers—three of the new Minotaur type and one of the Arcton type. One leader and eight destroyers. One aircraft carrier. Three submarines—one mine layer submarine and two of the "B" or patrol type.

Under the estimate, the personnel of the fleet will total 92,338 officers and men—an increase of 2,038—and 884 Royal Marine police, an increase of 19.

VETERAN TEACHER TAKEN BY DEATH

PORTLAND, March 7.—(AP)—Miss Nellie Collins, 71, a native of Oregon and for more than 30 years active in school work in the west, died at her home here last night.

Miss Collins was born in Dallas, Ore. in 1862. She began her education in the old La Crosse Academy there, and in 1889 was graduated from the Oregon Normal School at Monmouth. Later she took additional work in the New York State Normal school in the South Dakota State Normal school. After 14 years there she returned to Oregon where she lived on a ranch near Falls City until 1911. She then resumed teaching, going to Burns, and then to Jerome,

Ariz. where she directed Americanization work among the Mexican children. Be correctly corrected in an Artist Model by Ethelwyn B. Hoffmann. In keeping with the times—Drugs and Toilettries at Cut Prices at JARMIN'S DRUG STORE. For Garden Flowing Tel: 912-J.

Another Delightful DANCE Saturday Evening HOTEL MEDFORD P. G. DENSON, Manager

In the 13th Century the monks discovered that the waters of Burton-on-Trent made better beer

In 1896 Leopold Schmidt discovered these famous brewing qualities in the subterranean springs of Tumwater...

THE waters of Burton-on-Trent, England, became famous in the 13th century. So valuable was this water that the monks leased the land surrounding the springs by paying the owner daily "two white loaves from the monastery, two gallons of conventual beer and one penny besides seven gallons of beer for the men."

Leopold Schmidt discovered similar brewing waters at Tumwater where the completely new Olympia Brewery now stands and where Olympia Beer is again brewed exactly as it was before prohibition and by the same family of brewmasters.

"It's the Water" has a definite meaning—endorsed by the findings of scientific research—as follows:

1. Extracts from the hops and grains hidden flavors.
2. Gives golden color and sparkling life to the beer.
3. Creates a more active fermentation of the yeast cells, thereby making the beer more digestible and of constant purity.
4. Prevents detrimental changes when the beer is bottled and chilled.

Serve It in Your Home Olympia Beer is a wholesome, mildly stimulating beverage. Original imported yeast stock from Denmark guarantees complete fermentation which means that Olympia Beer is pre-digested and, therefore, non-fattening. You can obtain it from your dealers. Olympia Brewing Co., Olympia, Wash.

IMPORTANT! Wherever you see the Authorized Draught Dispenser Certificate, you will know that this dispenser is fully equipped to serve you Olympia Draught Beer, properly kept and served as it should be served—bringing you the full-flavored goodness unchanged from the Brewery.
