

VALUES ON EGGS SCRAMBLED BY IGNORING GRADES

PORTLAND, March 16.—(AP)—Further confusion in the egg market as the result of practically indiscriminate grading, was remarked upon by the trade today as prices remained unsettled but generally unchanged.

thing that appears fit to eat is these days termed of 'extra grade.' Dealers have declared that mixing of mediums and extras has enabled many of the violating dealers to undersell competitors, at the same time wrecking the trade tone. Producers meanwhile, appear at the mercy of the wholesalers. Trading in the butter market continued more or less unchanged although here and there some weakness was suggested for so-called extras. Butterfat remains at least steady. Considerable activity was suggested in the market for cheese and especially Oregon offerings. Prices were at least steady for Tillamook and Oregon coast offerings. Market for light weight hens is now slow in the live chicken trade. Prices

were showing no further change but it was not so easy to sell the small weight stuff even at current low prices. Heavy stuff was firm. Spring lamb prices continued to tend down in reasonable showing here with country killed offerings generally a trifle easier around 21-22c lb. for extreme top quality. Old lamb and ewes continued in call. Late call for dressed turkeys has continued quite favorable here with 18@19c generally the top resale price to retailers. Some poor stuff was selling materially lower. Boost in asparagus prices was generally reflected here with a shortage of southern offerings, which has been expected for several days. General low price for good 'grass is around \$2.50 pyramid. Still further advance in the price on cauliflower-broccoli sent the 1c to an extreme of 90c crate here for the day and were scarce at that. Even 2a were quoted to 65c crate.

LINDY CRITICIZES NEW MAIL BILL IN SENATE HEARING

(Continued from page one)

Senator Barbour (R. N. J.) brought up that section of the bill prohibiting contractors whose contracts were annulled from bidding on new contracts unless they waived any claims against the government.

If these contracts were honest, you are for them and if they are not you would not condone them?" "I feel," Lindbergh said, "these companies have the right to trial before being convicted of guilt which is only implied and not proven." While Lindbergh testified, Richard Whitney, president of the New York Stock exchange, submitted to the banking committee down the hall, a complete report on transactions in air stocks prior to the cancellation of the mail contracts. Senator O'Mahoney (Dem., Wyo.) asked Lindbergh: "If you had a contract with an individual and discovered it was fraudulently obtained, you would think it was right to cancel, wouldn't you?"

CROP LOAN OFFICE NOW IN OPERATION

The Mail Tribune has just received word that an emergency crop loan office has been opened at the office of the county agent in Medford, Jackson county, and farmers desiring loans should apply between the hours of 8 a. m. and 5 p. m.
According to the regulations under which the crop loans are to be made this year, any farmer who secures a loan must obtain a statement from the county production council, where one exists, that he does not intend to increase his acreage or production in violation of the agricultural adjustment administration program.
In counties where a county production council has not been set up, before any application for a loan will be considered the farmer who is applying will have to give satisfactory evidence that he is co-operating with the production control program of the agricultural adjustment administration.
The maximum amount of an emergency crop loan that may be obtained by any one individual is \$250, the minimum is \$25.
Applications for loans in any amount from \$25 to \$150 may be accepted by the emergency crop loan office provided the farmer does not have sufficient security to obtain a loan elsewhere.
A farmer applying for \$150 or more must first make application to the production credit association for a loan from it. Rejection of this application by the production credit association will be considered sufficient evidence that other credit is not available and the applicant may then make application to the emergency crop loan office.

NO PROOF OFFERED

"I don't know," the flier replied. "Let me say that I feel that nothing has been done to prove in this case and that nothing has been submitted for trial. So far as I can see, nothing has been clearly proved."
"No criminal action has been taken in the airmail case," O'Mahoney said. "I think you are confusing criminal and civil actions."
"I am not a lawyer," Lindbergh answered. "I think the right to trial is so obvious that it is not a legal question."
Lindbergh said the army air corps was "not designed" for meeting such emergencies as carriage of the mail and had not had "adequate time to study the routes."
"How long does it take to train a military pilot and a commercial pilot?" Senator Hayden (D., Ariz.) asked.
"That is difficult to say," Lindbergh replied. "A man can learn to fly with reasonable safety in a week or two as a student, while it would take years to fly passengers and mail with a reasonable degree of safety."
Pilot Hour Limit Needed
He agreed there should be a limitation of the number of hours per month to be flown by pilots, but said he was not equipped to discuss the pay question.
"The army mail carrying was not as efficient as that of private companies," Lindbergh said. "The army had only 10 days to take over a system that was built up by private companies over 10 years."
"The army equipment was not designed for mail carrying. The pilots were not familiar with the airmail routes. It was not possible to take over in the short time that the army was given."
Senator Schall (R., Minn.) said he had been told that it would cost the army around \$30,000,000 a year to carry the mail, where the private companies had carried it for about \$14,000,000, but the witness said he had no information on this.

SEE ALL THOSE TINY FLAKES?

Crisper! ...because they're baked flakier

Just break a Krispy Cracker. You'll see layer upon layer of tender delicate flakes. And under a magnifying glass will appear hundreds of fairy-like caverns. This unusual flakiness makes Sunshine Krispy Crackers crispier and more flavorful.
