BANK CALL ISSUED FOR MARCH FIFTH

WASHINGTON, March 23.—(AP)—A call issued today for the condition of National banks on March 5 will afford a sharp contrast with that of a year ago when President Roosevelt ordered every bank in the United States closed.

Now more than 5,100 national banks are licensed and operating. These banks on the date of the last bank call, December 30, reported total assets of \$21,747,483,000.

Since last year also the government has advanced \$1,939,000,000 in capital notes or preferred stock purchases in 6,300 banks to bolster their position for reopening. Of this number approximately 2,300 were national banks.

SALEM, March 23.—(AP)—A. A. Schramm, state superintendent of banks, issued a call today for the condition of all state banks at the close of business Monday, March 5.

CULINARY CRAFT....

"BELIEVE IT OR NOT" Nineteen hundred thirty-three was the best sales year ever enjoyed by the electric refrigeration industry!

These are days of keen buying. People are giving a lot of thought to every investment, small or large, and buying the things which give them the greatest return in service, or beauty, or both. In that thought you find the answer to the continuous sale of electric refrigerators, even through so-called "bad times."

Electric refrigerators have sold themselves completely in the matter of convenience. Everyone admires their cleanliness, ease to keep clean, good appearance in the kitchen, etc. But even now there are many who do not realize the actual facts regarding food preservation. Time and again a "prospect" will say: "I won't be using current during the winter months for the refrigerator." Of course, when possible, the refrigerator is placed in the kitchen, which is almost as warm in winter as in summer. The danger point in food spoilage is 59 degrees; above that we find rapid development of bacteria and enough food might be ruined in a day to pay for a week's current consumption. Again, rapid changes in weather conditions will sour milk or break down the freshness of foods not protected by constant cold. In fact, there are any number of good reasons why discontinuing this available service to safeguard the food supply of the family would be most unwise and even extravagant.

Spring seems to have surprised us this year by arriving ahead of time. We welcome it gladly—but are hardly prepared for the warmth so early in the season. So, again refrigeration has become vitally important in our plans. Electric refrigeration is certainly the leader in this early "spring opening."
