CULINARY CRAFT....

By Estelle Dorgan, Director, Home Service, the California Oregon Power Company

LET YOUR OVEN COOK FOR YOU
This is a message to new electric range users (the "old" users should not need it). Right now, when hundreds of you are

acquainted with these new possessions we wish to tell you in a practical way some of the delightful things you can do with a minimum of effort. Perhaps the most practical accomplishment of your new electrical servant is automatic meal cooking. These new ranges almost think for you! They actually do "remember" for you!

Who wishes to stay inside these glorious spring days just to watch a cooking process? Well then, by all means let us learn to feel entirely confident that good meals will not suffer in our absence if we have planned well and given them into the care of the range for completion. In fact, that is just what your range would request if it could ask for perfect co-operation. One of the difficult habits to overcome in most new electric range users is constant supervision. This cool, quiet manner of cooking is "too easy" it seems, and they must be looking into the oven or taking the top off of dishes to see if the food is actually being cooked. All of this slows up the process and takes away from the flavor of the foods—and is a complete waste of time. If you range is in good condition, it will do ALL THE WORK by itself. If it doesn't don't waste time about calling for an electrician.
