# MORE THAN 50% LONGER NON-SKID MILEAGE in the NEW Firestone HIGH SPEED TIRE FOR 1934

THE new Firestone High Speed Tire for 1934 is the greatest tire Firestone has ever built. With its wider, flatter tread, greater thickness, deeper non-skid, more and tougher rubber, and greater non-skid contact with the road, you get more than 50% longer non-skid mileage.

This new development is made possible by the Firestone patented process of Gum-Dipping, whereby the cotton fibers inside the high-stretch cords are soaked and coated with pure liquid rubber. This provides greater strength, safety and blowout protection.

Firestone engineers pioneered and developed the first successful balloon tire in 1923, and it is only natural that Firestone would lead in the further development of tire construction to meet the demands of the high-powered high-speed cars of today.

The new Firestone High Speed Tires for 1934, have already proved their worth by constant testing on the Firestone fleet of test cars over all kinds of roads and highways throughout the United States.

Firestone High Speed Tires are further subjected to the most severe tests known on the greatest proving ground in the world—the Indianapolis Speedway. In fact, Firestone Tires have been on the winning cars in the annual 500-Mile Indianapolis Race for fourteen consecutive years—conclusive evidence of Firestone's outstanding leadership in tire development and construction.

Drive in today and replace your thin, smooth, worn tires with a new set of the Safest—Longest Wearing—and Most Dependable Tires Firestone has ever made
