The librarian is in attendance from 10 to 4, at which time the Bible and all authorized Christian Science literature may be read, borrowed or purchased. The public is cordially invited to attend the services and visit the reading room...

The Federated Churches

Joe M. Johnson, Pastor Central Point, Oregon "Christianity and Patriotism" is the title of the lesson in the Bible schools this week. The Scripture is in Matt. 22. Our school begins at 9:45. Again we invite you to our young people's services at 7 o'clock. Then to enjoy with us the opening services in the evening church service. Mr. Maynard Putney will bring a short message to the young people. This Sunday morning we honor the motherhood of the world in a special service. Regardless of where our dear mothers are, we are glad to pay a small tribute to their memory. The pastor will speak on the subject: "Mother and The Book," in the morning service; and in the evening will speak on the subject: "Christian Reactions to Everyday Life." We invite all who are not in obligations elsewhere to join us in worship.

SILVERTOWN SALES SHOW BIG INCREASE

The growing national demand for Silvertown tires with the Life-Saver Golden Ply is indicated by recent preliminary sales figures for 1933 released by the B. F. Goodrich company, according to officials of Lewis Super Service Station. "Unit sales of Silvertowns last year showed more than a 10 per cent increase and this excellent showing is generally attributed to the product. "Almost everyone who drives a car realizes the potential hazards of blowouts. Statistics prepared by various agencies indicate clearly that thousands of accidents, many of which result in death or serious injury, are caused annually by tire failures. "Golden Ply tires are engineers' real heat inside the casings which if sustained will cause ply separation, a major cause of blowouts. "The engineering advances made by all automotive manufacturers enabling them to build cars which will easily travel in excess of 70 miles an hour brought new problems for the tire producers. "Tires were subjected to much higher normal driving speeds than ever before and the problem of heat generated inside tires became a real concern to rubber engineers. "After two years of intensive study and thousands of tests, many of which were conducted on the latest automobile track in America, Goodrich announced its new tire created to meet modern driving conditions. "At the outset many car owners thought here was simply another tire but the convincing results of hundreds of thousands of driving miles in all parts of the United States has brought the increasing popular demand."
