

NEW SERA WORK GETS UNDER WAY MEDFORD REGION

Under the supervision of the local State Emergency Relief headquarters, several new projects were started in Medford this morning, the beginning of which brings into use practically every known kind of relief work for the local metropolitan area.

The new projects include clerical work at the county agent's office, and school superintendent's office, and research work to be carried on at the experiment station near Phoenix.

The local office reports that the main street project, now underway, will be completed this week, and includes only grading, but that another project may be ordered for paving and walling the excavation.

Work is progressing rapidly on the Bear creek and Roxy Anne projects, but will not be completed for some time, it was announced. The work on flood control at Bear creek is under the direction of the city, while the Roxy Anne work comes under the county management.

Kenneth Wall, manager of personnel and placement at the local office, has recently returned from a week spent in Roseburg, where the same re-employment set-up that is used in Medford, is being installed.

The purpose of the program is two-fold: First, to return many of the unemployed to useful and gainful occupation; second, to produce tangible, useful results in a form for which there is great social and economic need.

Has Four Divisions The program consists of four major, inter-related divisions: "1. Modernization, repair and new construction;

"2. Mortgage insurance; "3. Mortgage associations; and "4. Building and loan insurance.

"The modernization phase of the program will furnish national guidance and support for locally-managed renovating campaigns throughout the country and protection for home owners against unwarranted cost advances.

For these purposes and to assure adequate financing at low cost and on moderate terms of repayment, a new governmental agency is required.

COMMUNICATIONS

To the Editor: I have been requested by Verne Shangle, chairman of the parade committee, of which I am a member also, to notify through the Tribune the members of the Three-Quarters of a Century club that every one of them

can take part in the parade on Thursday, June 7, register their names at Jubilee headquarters as soon as it is possible to do so, and those who are unable to appear personally, send a letter to the committee, so that they can be assigned their seats also.

I want to urge the members of the Southern Oregon Pioneer society to do the same, so that they can be assigned to their places also.

This is actually necessary and will be a great help to the committees in ar-

ganging the parade, who are working hard and doing everything in their power to honor the old pioneers and their sons and daughters, and we must put our shoulders to the wheel and show our appreciation by helping them make this one of the grandest and most brilliant stunts that has ever been pulled off in Jackson county or any other county in the state of Oregon.

So please don't wait, as time is getting short and I know they will be pleased to see us coming in by the dozens.

Respectfully, JOHN B. GRIFFIN, President S. O. Pioneer Society, Medford, May 14.

"SHOPPING...THERE'S A REAL TEST OF NERVES, TOO, MR. BUCK!"

Listen to what Mrs. Abbot J. Copeland has to say on shopping—and nerves:

"There's no doubt in the world that healthy nerves are vital to a man who goes out and catches wild animals alive. But take it from a busy wife and mother who spends many hours each week searching through the stores— anxious to make the family budget reach as far as possible—you need healthy nerves to be a shopper, too! Tramping through miles and miles of aisles... pricing, comparing, judging quality and values... well, that's a test of anyone's nerves. 'Nerves' don't ever bother me, though. As for cigarettes, I smoke Camels. They don't upset my nerves. And I have never tasted such flavor and mildness."

Frank Buck, who has brought back many tons of wild cargo from the jungles of Asia, says:

"It takes healthy nerves to bring 'em back alive. It's a job packed with thrills, excitement, and real danger. I never would have been able to populate half the zoos in this country, cross the Pacific 20 times with tons of savage live cargo, and save my own life a half dozen times by quick action if I didn't have healthy nerves. I am a heavy smoker. I prefer Camels, knowing that I can safely smoke all I want without upsetting my nerves."

How Are YOUR Nerves?

Jangled nerves are apt to visit us all. You know the signs—telephone slamming, frowning, hot words that wound others, worrying and fuming over trifles. If you are inclined toward jumpy nerves check up now—on your eating and sleeping, your habits of work and play. Make Camels your cigarette. They never get on your nerves.

Camels are made from finer, MORE EXPENSIVE TOBACCOS than any other popular brand.
