'TAKE MY ADVICE' SENIORS' COMEDY SCORES REAL HIT

(By Bill Cummings.)

Each role an example of amateur perfection, the entire cast of the senior class play, held in the high school auditorium last night, combined to turn in what the capacity house acclaimed an exceptional high school production of Eugene O'Neill's comedy in three acts, "Take My Advice."

Well cast characters featured the performance, which was supported by each of the players with like ability, and given proper emphasis by the acting of the leads, who stood out as excellent examples of high school talent. The play was well rounded out in every detail and weak spots were conspicuous by their absence.

The most important and most difficult role was well taken care of by Lucian Clement, as Bob Mannion, a striving newspaper editor, held in obedience to the will of his creditor, a dominating politician, John Wargrim, controlling the town of Eureka through the medium of Mannion's paper.

Clement's portrayal of the helpless editor was a highlight of the play, and formed a nucleus for the performances of the rest of the characters.

He was supported in the lead by Jean Quisenberry, who turned in a noteworthy portrayal of Peggy Acton, niece of the dominating politician, and centered the feminine characterizations. It was Peggy who gave the \$2000 to Mannion that enabled him to pay off his debt in time to reverse the situation and ruin the plans of the dictatorial Wargrim.

Bill Prentice, as the politician, stepped into the role with just the proper type of gruff assurance to provide necessary villainy to the plot.

The humor of the play was supplied in good measure by a quartet of characters whose comedy work centered around the activity of Jimmy Samson, a breezy salesman whose business, in representing a city corporation was making up towns such as Eureka, and rushing their property. The part of Samson was cleverly portrayed by Bob Sherwood, who put across the whole idea with a personality-plus characterization en-

COUNTY MUST PINCH TO STAY IN BUDGET EXPENDITURE LIMIT

The county court and county officials held a conference Wednesday and discussed the status of the budget for the purpose of keeping within the same for the year.

A recent audit by E. M. Wilson shows that in the first four months of the year 34.3 per cent of the budget has been expended. At this rate, by the end of the year there will be a slight deficit.

Retrenchment was urged in all county offices and activities so as to keep within the allotments for the year. All offices are now operating on a limited financial basis and county activity is held to emergency work.

The county is faced with the problem of providing funds for the payment of old age pensions, for which no provision was made in the budget, in the expectation that the legislature would provide ways and means for this fund. The legislature, however, provided for the spending, but not the revenue. The county has so far issued 9 old age pension certificates. In the neighborhood of 250

Goodyear has licked problem that baffled the tire industry—with the new "G-3". See it here!

IT TAKES a better tread to keep its grip on modern high-speed highways—with faster cars, quicker get-aways—more powerful brakes. All these strains grind away ordinary treads too fast.

But now we've got the answer! A tread that keeps its grip 43% longer—gives 43% more non-skid mileage. Grueling, grinding road tests show that it keeps its grip twice as long as competitive tires!

Read that list of extras in this new "G-3" All-Weather tire—and remember, you have to have "NON-SKID" before you can have "NON-SKID MILEAGE"—you have to have GRIP where you see it on this tire—in the center of the tread—if you want the extra miles of safety which you get in the "G-3".
