COVER SPRAY FOR MOTHS ADVISED

A cover spray for the control of late first brood codling moth worms is deemed advisable on all apples and is so recommended by L. G. Gentner, entomologist of the Southern Oregon Experiment Station and L. P. Wilcox, county agent. Application to be completed by June 9.

Unsettled weather conditions have resulted in a prolonged flight of first brood moths which means an emergence of young worms in fairly large numbers during the next ten days or two weeks. In order to protect the apple crop from these stragglers a spray is now necessary. It is the opinion of the experiment station entomologist that all pear varieties may safely go until the second brood flight starts, which will be approximately three weeks. Therefore, spraying of pears at this time is unnecessary.

Use three pounds of powdered arsenate of lead to the one hundred gallons of water.

MEDFORD YOUTHS TO FILM JUNGLE

Kenneth Swartz and Earl Mercer, who are now employed in the movie industry at Hollywood, will be members of a party of eight sailing from Los Angeles in August for South America on a two years' trip, during which time they will take jungle films and water pictures, both above and below the surface, according to Mrs. William Swartz of this city, Kenneth's mother. Royce Finley of Hollywood, also Mrs. Swartz' son, will be a member of the group, which will include a cameraman and three other film men who have made such trips previously.

Mercer and Swartz were in Medford visiting for several days recently, and returned to Hollywood last Tuesday.
