

### LOCAL STUDENTS MAY ENROLL IN '34 SUMMER SCHOOL

#### Sessions to Open in Eugene and Portland June 18 for Six Weeks' Term — Outstanding Educators Added

UNIVERSITY OF OREGON Eugene. (Sp.)—Among those from Medford who have inquired about the University of Oregon summer sessions are Laura N. York, Grace Turquist, Junita Demmer, Dorothy Pittenger, Grace G. Reid and Mildred E. St. John.

A great deal of interest has been shown in the University of Oregon summer sessions in Eugene and Portland, which will open on June 18 for the six weeks term. A number of featured courses will be offered, and several outstanding educators from other institutions have been added to the regular staff of the university, it is announced by Alfred Powers, director of summer sessions.

**Courses Offered**  
In the Portland session, courses in education will be given by Dr. Jay C. Knobe of the University of New Mexico and regular members of the university faculty. Dr. Merle Curti, Smith college will offer courses in American history, and Professor Bernard Hinshaw of Illinois Wesleyan university will teach classes in drawing and painting. The work in sociology will be under the direction of Dr. Carroll D. Clark, head of the department of sociology at the University of Kansas. Courses will also be available in the following departments: anthropology, bacteriology, botany, chemistry, economics, English, French, German, health education, journalism, music, philosophy, physical education, physiology, political science, psychology and public speaking. Classes will be held in Lincoln high school.

**Teachers Clinic Feature**  
Public school teachers and others interested in aiding children who have learning difficulties will have the opportunity of taking part in the remedial teaching clinic to be held in connection with the Eugene summer session. The clinic school will be conducted by Dr. B. W. Dellmark of the university faculty, assisted by Miss Lillian Rauner of the Los Angeles public schools.

For the fifth successive year the University of Oregon has been designated by the Carnegie corporation as its western center for instruction of teachers of art in the public schools. Dr. Eugen Gustav Steinhilf, director of the National School of Decorative Art in Vienna, will be the visiting director.

Other visiting instructors in the Eugene session will be Miss Marion Horton, traveling librarian from the Los Angeles city school library, who will give courses in library methods, and Dr. Joseph von Bradah of the City College, New York, who will offer work in German.

**School for Coaches**  
Of particular interest to men will be the coaching school to be held during the first two weeks of the session at Eugene. Basketball and baseball instruction will be in charge of William J. Reinhart, varsity coach in these sports. Football will be taught by Prince G. Callison, Oregon coach who has already earned a national reputation, and instruction in track and field events will be given by W. D. (Bill) Hayward, veteran track coach.

The offerings of the Eugene session will also include courses in business administration, drama, economics, education, English, history, journalism, Latin, law, mathematics, music, philosophy, physical education, physics, political science, psychology, romance languages, public speaking and sociology.

At both summer sessions interesting programs of social events have been arranged to care for the recreational needs of those in attendance.

Full information on any summer session of the State system of Higher Education may be obtained from the office of the director in the Oregon building, Portland, or at the University of Oregon, Eugene.

### POISON VICTIM WILL RECOVER

Ben Ekholm, 43, local orchardist, who yesterday noon swallowed a spray solution in mistake for wine, was resting easy today at the Sacred Heart hospital, according to Dr. J. C. Hayes, attending physician. His condition is not regarded as serious.

Prompt action by Ekholm saved more serious consequences, according to Dr. Hayes. He did not swallow a large amount of the poison, but as soon as the first mouthful passed his palate realized his error and rushed to this city. Very little of the fluid reached his stomach.

### BESSIE M. JONES TAKEN BY DEATH

Bessie Mabel Jones, wife of Edward Jones of near Jacksonville, passed away at the home of her father, W. A. Childreth, in Jacksonville at 1 o'clock Tuesday afternoon, suffering an illness of several months. Besides her husband, she is survived by one daughter, Edna Newman, also of Jacksonville; her mother, Mrs. McCredy of southern California survives.

Mrs. Jones was born in Jackson county, January 8, 1869, and with

## THE CALL OF THE OPEN ROAD

The Call of the Open Road beckons motorists to the carefree, venturesome life of camping out, for its highways and byways lead to such restful, scenic spots as that shown in the upper left. At the right Jack Holt, Columbia Pictures star, invites visitors to his Western Auto equipped camp. Holt, who stars in the current "Whispering" and the forthcoming "Black Moon," is seen in the lower left enjoying his favorite sport, which is so popular at this time of year. The "siren" in the circle is typical of the relaxation that is found at the other end of the open road. In the lower right, a Western Auto salesman advises Holt to check his battery as well as other parts of the car in preparation for an outing.

### PROBE BEER SALE TO BOY IN CRASH

The state liquor commission is now investigating the sale of beer last Saturday to a 16-year-old California youth, it was revealed in juvenile court this morning at the hearing of Joe J. Braden, 16, of McCloud, Cal., charged with reckless driving. Braden entered a plea of guilty to the reckless driving charge and was fined \$25 and costs by Justice Coleman.

Braden told the court he had visited, with two companions, a Pacific highway resort and had drunk a large glass of beer and a small one. The lad told the court the beverage had no effect on his driving. A state trooper informed the court the matter had been reported to the state liquor commission.

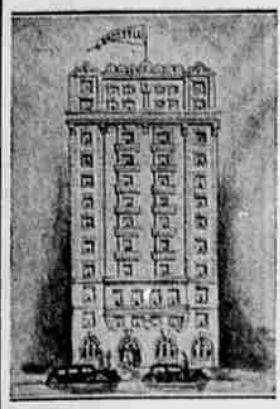

Two autos were more or less damaged. Braden's father was in court and said the loss was covered by insurance. The accident occurred in the Berrydale district. Braden and a boy acquaintance came to this city from McCloud to do some trading and remained over to see the Shrine parade.

### Pioneer Gown Is Worn By Deputy In Jubilee Spirit

Miss Nydahl Neil, chief deputy of the county clerk's office, appeared for work this morning, wearing a gown her grandmother wore in pioneer days, and that her great-grandmother wore before her. It was a black creation, with a wasp waist, ruffled skirt, and a white collar. Miss Neil looking very demure, was the center of feminine interest.

A pact was made yesterday among the women workers of the clerk's office, that in keeping with the pioneer spirit of the Diamond Jubilee they would wear pioneer costumes the balance of the week. Miss Neil was the only one to keep the agreement.

### ALL THE COMFORTS OF HOME MAY BE FOUND AT THE BROZTELL

IT IS EASILY accessible to shopping and theatrical centers, churches, libraries, parks and transportation lines. Ladies traveling without escort will appreciate the atmosphere of security and rest it offers. Every room with tub and shower. Room With Bath \$1.50 Hotel Broztell Fifth Ave. & 27th St., N. Y. J. SUGARMAN, Manager.

### WEALTH AND PLAY COMING FOR MAN THROUGH SCIENCE

#### Thousand-Fold Increase in Riches and Universal Spread of Leisure Are Promised by New Methods

BOSTON, June 6.—(AP)—Scientific discoverers are laying the foundation for a thousand-fold increase in the world's wealth and a universal spread of more leisure, said Howard W. Blakeslee, science editor of the Associated Press, in the commencement address today at Massachusetts Institute of Technology.

"It used to be said there were 12 men in the world who understood the Einstein theory of relativity," said Blakeslee. "But I have yet to hear of even one economist who understands the economic paradox."  
Made Own Paradox.  
"The paradox is largely produced by scientists. They made the extra wealth and leisure whose distribution just now puzzles the world. Their simple and straightforward approach may help in the distribution, and their new discoveries certainly will be a factor in the settlement."  
Blakelee pointed out that a biologist in keeping informed on current scientific progress would have to read 183 scientific articles daily, and he called attention to the service of the press in disseminating information.  
"You, as scientists, may never use the daily newspaper to tell your story, although it is becoming one of the best media. The fact that the press is free insures against sinister influences depriving you of the opportunity for publication in your own field."

Synthetic Dresses Next.  
Blakeslee told of progress, developed in this country, for converting alcohol 100 per cent into acetic acid at low cost. "This is an understanding move. Also a direct step toward synthetic dress goods of greater beauty, higher quality and more universal dependability. It is a step toward making textiles and more of other things directly out of trees."

A plan is being worked out, Blakeslee said, to develop power on a tropical island from the sun and the sea. "Another group of scientists," he said, "is studying the use of our rivers for irrigation of a new type. Canals, they say, are too wasteful, but as new structural materials develop, water can be piped in closed conduits for great distances."

Current Affects Weather.  
"This idea may have some immediate appeal if the Japanese current keeps shifting as oceanographers say it has this year. Some meteorologists attribute the drought in the midwest to this shift."  
"I know of another scientific research which claims to be making

### ROTARIANS HEAR VETS AID AGENT

Albert Absher of Portland, veterans' placement representative, national re-employment service of the U. S. department of labor, gave an interesting talk before the meeting of the Rotary club held at the Hotel Medford Tuesday.

Absher revealed the two functions of the re-employment service, to supply the CWA contingent with help, and to furnish men for the local employment committee.

Of the 6th re-employment district, composed of Jackson and Josephine counties, according to Absher, 827 unemployed have registered. A total of 869 unemployed have been placed on jobs during the same period of registration. In the state of Oregon, out of a total registration of 103,000, 20,000 men and 13,000 women have been given work.

### DRAWING MAKES LESSARD NOMINEE

SALEM, June 6.—(AP)—Dellmore Lessard, Portland attorney, today won the draw for the Democratic nomination for state senator from Multnomah county, following a vote for the nomination with Austin F. Fiegel in the primary election.

The drawing, held under statutory provisions in the case of a tie and before the secretary of state and the candidates or their representatives, was made by a disinterested party by picking the slip of paper with the winner's name upon it from a hat.

Surgery Aided Guinea Hen  
FALL MILLS, Va. (UP)—A successful job of plastic surgery has been performed by J. A. Peake, Fall Mills poultryman, on a guinea hen. The hen got her bill entangled in a wire fence and tore it off. Peake glued the bill back and it has grown into place.

Texas Beautifies Yards  
AUSTIN, Tex. (UP)—Texas municipalities have entered upon a practical campaign for beautified yards and home gardens. Austin, Temple, San Marcos and many other places are offering reduced summer water rates to encourage home gardening.

A Worn Out Battery or Generator may ruin that vacation trip.

## 5 Six-Footers... and not a cramp in a Carload!

FIVE big men can relax in utter comfort on the deep cushions of the Ford V-8. Wide seats keep elbows out of ribs. Ample leg room keeps legs from being cramped.

Why? Because Ford measures roominess in terms of usable body room. Not in terms of the distance between bumpers, which means nothing when you come to analyze it.

The Ford V-8's very engine construction gives you more body room, as the diagram explains. Cylinders are "doubled-up" saving space, not strung along in a line to waste it.
