

'EYE' Poured FOR WORLD'S LARGEST TELESCOPE

The pouring of 20 tons of molten glass to form the "eye" of the world's largest telescope took place at Corning, N. Y. In what was regarded as an epochal step in scientific achievement, the mold of the "eye," or mirror, of the 200-inch telescope is shown below. Above is a huge iron ladle from which the glass was poured. The crew leader is helmeted against glare. It took a month to heat the glass and it will take 10 months to cool it. THESE DOGS BARKED—AND DILLINGER JUMPED OUT OF WINDOW

These two pictures tell the whole story of John Dillinger's escape from a trap laid by federal officers at the Little Bohemia resort in northern Wisconsin. It was these dogs which unwittingly saved Dillinger from capture when they barked and warned him that strangers approached. Thereupon he sent his machine gunners into action and jumped out of a back window of the resort lodge. The dogs are shown with their owner, Mrs. Nan Wanatka, wife of the proprietor of the isolated resort near Mercer, Wis. (Associated Press Photos)
