

### 195 REGISTER FOR SWIMMING CLASS UNDER RED CROSS

Up until noon today, 195 persons had registered for the Red Cross life saving school being conducted at the Natorium for two weeks. The classes, in charge of Jean Eberhart, opened today.

All who are interested in swimming, are urged to enroll in these classes. From 9 to 9:30 a. m., is the class for beginner girls, and from 9:30 to 10 a. m. for beginner boys. The next hour is for swimming, and from 11 to 12, for junior life saving.

In the evening, the swimming class for adults is from 7 to 8 o'clock, and from 8 to 9 is the senior life saving and examiners class.

A. H. Banwell, manager of the Jackson County Chamber of Commerce, issued the following statement today, in connection with the school:

"The idea of giving instruction in swimming and life-saving is very commendable and should be done in every community in the United States of America. It not only provides a means of very helpful recreation but the life saving classes will place swimmers in a position to offset and curb the many drowning accidents which occur throughout the country.

"The Red Cross is to be congratulated for providing the leadership in this very splendid movement."

Concerning the movement, Ben E. Harder, president of the Jackson County Chamber of Commerce, has added his endorsement, saying:

"The loss of life through accidental drowning does more to break down the morale of a community than almost any other type of accident. We can do much to prevent such accidents by the proper training of each individual.

"The water safety program of the American Red Cross which teaches swimmers and non-swimmers what to do in cases of emergency, has been an inspiration to leaders among boy and girl organizations, summer camp groups and kindred welfare activities, to work diligently to conserve human life.

"Swimming promotes health, cleanliness, self-reliance and quick thinking. It furnishes a sane and wholesome use of leisure time. Through life-saving instruction fine character traits of unselfish service to our fellowmen are encouraged.

"Swimming is healthy, exhilarating fun that old and young may enjoy."

### NEW WHISKEY GOES FAST AT RUM STORE

Southern Oregon folk did not entirely quench their thirst over the Fourth with mountain water, judging from the fact that the local state liquor store has sold ten cases of one brand of whiskey alone since Monday.

This particular variety of 100 proof straight whiskey is a product of the Oregon Liquor Control Commission and sells at \$1.45 per quart. The first shipment was received in Medford Monday.

Radio Operator—Stanton D. Burnett of Forest Grove, Ore., has been enrolled with the Civilian Conservation Corps and has been assigned to district headquarters as a radio operator.

### STRATOSPHERISTS IN GONDOLA

This is the first picture showing Major William Kepner (left) and Capt. A. W. Stevens inside the gondola of the balloon in which they hope to penetrate the stratosphere to record heights, starting soon from a spot near Rapid City, S. D. (Associated Press Photo)

### PORTER ASSUMES CHAIR AS MAYOR ON COUNCIL VOTE

(Continued from page one)

Airport—In addition to the regular operation work at the airport, one section of the field was burned and a firebreak scraped around the landing circle.

Buildings—Installed new sign at the city hall.

Consolidated Lots—We continued the use of the new grass cutter and have cut the grass on approximately 100 city-owned lots. Numerous requests have been received for additional work and we are continuing the cutting with four men supplied from the relief kitchen.

Catchbasins—Installed the catchbasin clean-out and repaired fountain at children's playgrounds.

Garbage—Served notice to remove accumulated garbage to two property owners.

Parks—Spaded and seeded additional area at children's playground and we are overhauling the playground equipment.

Streets—The street sweeper traveled 277 miles, picked up 85 loads of sweepings. The street finisher was operated each night during the Jubilee and Friday nights of each week for the remainder of the month.

Three men were busy 10 days during the month repairing holes in broken pavement.

Street Signs—All traffic and street signs were painted early in the month, prior to the Diamond Jubilee.

Sidewalks—We have rechecked the notices of sidewalk repairs and find that several property owners are complying with the notice for sidewalk repairs served in April.

Sewers—Answered eight calls for plugged sewers. It was also necessary to connect the house at 940 South Central with the main sewer. This property is in the name of Mrs. Burdell, now living in Tennessee. The cost of this connection will be paid by her representative, C. S. Butterfield.

Septic Tank—We have completed construction of the settling basin in the septic tank and have floated the greater portion of the sludge into this basin, using 2000 gallons of oil to control the odor. The grit chambers have been cleaned and we find that considerable sludge continues to rise to the surface and this we are compelled to draw each day. We are applying 240 pounds of chlorine per 24 hours to the outfall.

Tree Limbs—It will be necessary to check the town for low-hanging tree limbs and we are now serving notices to some 200 property owners requesting that they trim the trees 10 feet above the sidewalk to comply with the ordinance.

Report on SEERA was:

Bear Creek—All the rock available has been placed in the rock walls and the men are now excavating in the main channel.

Roxy Ann—The portion of the road between station 320 and 360 has been widened to a width of 20 feet. The trail from the spring to the north side, 4200 feet in length, has been completed. We are digging the trench to collect the spring water and building the rock basin.

Street Signs—The street sign project is 95 per cent complete and we have changed the design of the sign which will permit us to paint the signs on the posts hereafter, and we will not be compelled to take the signs down for repainting.

East Main Street Curve Elimination—Under an additional project, work was again started on the East Main street curve elimination with 10 men on June 30.

The following is a list of projects approved, amounts expended and balance:

Project	Approved	Expended	Balance
Roxy Ann	\$17,370.00	\$6,106.06	\$11,263.94
Bear Creek	14,487.00	4,532.15	9,954.85
East Main Curve Elimination	980.40	127.00	853.40

### SEVEN SHOT AS COPS, STRIKERS COME TO GRIPS

(Continued from page one)

union workers under bluecoat protection.

Acting Governor Frank F. Merriam, at Sacramento, kept closely in touch with developments on the beleaguered waterfront.

In Seattle, two railroad trains, guarded by police, rolled into a pier to do some unloading and shippers there said the move broke a two-weeks' waterfront blockade set up by striking longshoremen.

Meanwhile, President Roosevelt's labor disputes committee working on the prolonged coastwide walkout of longshoremen and other maritime workers, waited in vain for an answer from the various factions in the strike on its arbitration request.

The board previously announced it would wait until midnight tonight before proceeding under the authority of the newly enacted federal law for settling labor disputes.

Trucks Start Fracas

As on Tuesday, when more than a score of persons were injured in the first clashes, the trouble in San Francisco started today after trucks began rolling into the steamship piers, which are owned by the state. The immediate objective of business leaders was to empty the heavily loaded piers and make way for more cargo.

The police, however, instead of waiting for the pickets to advance upon the trucks as before, charged the union lines. First they laid down a barrage of tear gas that drove 200 pickets back for several blocks. The strikers replied with a few rocks. One of their number fell, seriously hurt.

Strikers finally retreated to Rincon hill, a high eminence overlooking the waterfront and forming the San Francisco anchorage for the big bridge being constructed across the bay. Up the steep hill the police charged after them, firing shots over the heads of the strikers. Several shacks occupied by watching women and children were struck by police bullets. From the hilltop came answering shots, one of the bullets narrowly missing two policemen on a pier below.

Strikers Retreat

The pistol and gas volley was too much for the union men, who yielded the hill, shouting as they retreated. A sailor was gassed and taken to an emergency hospital.

On Harrison street, close to the piers, bluecoats charged another crowd of pickets, who retreated several blocks and threw up a barricade of timbers. The police broke through it, however, and fired shots over the pickets' heads as they fled. Here F. L. Hodges, unemployed bystander, was shot in the stomach and another man, J. Hart, received a bullet in the left leg.

Fire broke out in a boxcar of the state-owned line but was quickly extinguished. Burning gas bombs started several fires on Rincon hill, which changed hands several times in the battling.

### 500 Children to Take Part in Eugene's Oregon Trail Pageant

Children will have their part in the huge Oregon Trail epic to be held in Eugene July 29, 27, and 28. More than 500 boys and girls from 5 to 9 years of age will stage a costumed wagon proglogue just before the big pageant each night of the celebration. Each outfit will have a pioneer, a lady driver, and two boys will pull the wagon as "oxen." The entire city of Eugene is cooperating in the event, which will include the pageant, the world-famous pioneer parade, and many other events. The pageant this year will be enacted on Hayward field with a cast of more than 2000.

### GRAPPLING CARD WILL PIT STARS IN THREE BOUTS

Along with the feature match between Gus Sonnenberg, famous grappler, and big Don Wagner, former O. S. C. football star next Monday night at the armory, Promoter Mack Lillard is offering a pair of preliminary bouts, one of which at least, would go for a main event on most any card. The promoter has signed Ad Herman of Germany and Louis Andrews of Greece for a forty-five minute semi-final mix which should be a hummer. Both men are fast, they are newcomers to this territory and anxious to make a favorable impression for the sake of future bookings.

For a thirty-minute curtain raiser, Professor Edward Newton, Salem teacher, will trade grips with Rollin Warren, the Klama's Copco engineer. Newton, while lacking the polish of Warren, is a sturdy and aggressive wrestler who can give a good account of himself.

The fact that Sonnenberg will appear here has created much comment among local fans and Lillard declares that if sufficient interest is shown he hopes to also bring Jim London, undisputed world champion, here on his projected tour of the west.

### ROOSEVELT TRIP PLAN UNCHANGED

SAN FRANCISCO, July 5.—(AP)—President Roosevelt has not changed his plan to return to Washington by Portland and the northern route, Mayor Angelo J. Rossi was informed today.

Mayor Rossi had extended an official invitation to the president to include San Francisco in his itinerary. "As you can readily see," said a telegram to the mayor today from Marvin H. McIntyre, one of the president's secretaries, "the president's time is very limited, and he plans to disembark at Portland and return direct to Washington."

### MILK BOARD NAMES EAST OREGON AIDE

PORTLAND, July 5.—(AP)—E. G. Harlan, administrator of the Oregon milk control board, announced here today the appointment of C. W. Daley of Pendleton as full-time representative of the milk board for Umatilla, Union, Baker, Morrow and Wallowa counties.

Daley, former city milk inspector of Pendleton, will have his headquarters in that city.

### HIGHWAY HEADS TO SIGN BONDS

SALEM, July 5.—(AP)—Members of the state highway commission will meet Saturday or Monday to sign the temporary bonds forms which arrived here from Washington, D. C. today for the first \$1,000,000 of the \$5,600,000 loan and grant from the federal government for construction of the five Oregon coast bridges.

It was announced at the highway department that upon signature of the bonds they can be deposited with the state treasurer, who in turn will send the receipts to the public works department. Upon arrival of the receipt at Washington, the million dollar advance will be forwarded to a Portland bank, subject to withdrawal by the highway commission.

### Avoid False Teeth Dropping or Slipping

You needn't fear false teeth dropping or slipping if you'll sprinkle a little Fastech on your plates each morning. Gives all day comfort and teeth hold tight. Goodness. No gummy, pasty taste or feeling. Get Fastech from your druggist. Three sizes.

### TOO LATE TO CLASSIFY

The TIRE SENSATION of '34

THE NEW Firestone CENTURY PROGRESS TIRE Beyond Comparison IN QUALITY AND PRICE WITH ANY FIRST QUALITY TIRE MADE

As the millions of World's Fair visitors saw tires made in the Firestone Factory and Exhibition Building, we asked thousands this question: "What do you value most in a tire?" Car owners from every state in the Union were interviewed—drivers of automobiles, trucks, buses—out of it all came one composite answer: "Give us Blowout Protection, Non-Skid Safety, and Long Wear, at a moderate price."

Firestone engineers used every conceivable resource in the development of a tire embodying these qualifications and selling to the public at a price within the reach of every car owner. Answer—the new Firestone Century Progress Tire.

COMPARE QUALITY—CONSTRUCTION IS PRICE

This new tire is equal or superior to any other first quality tire, regardless of brand—name—or by whom manufactured, or at what price offered for sale. Call on the Firestone Service Dealer or Service Store and examine it. You will be sold on the rugged quality and will want to equip your car with these new tires.

REMEMBER—you save money buying today, as rubber has advanced 442% and cotton 190%, and tire prices cannot remain at these low levels.

Size	Price	Size	Price
4.50-20	\$6.10	5.50-17	\$8.75
4.50-21	\$6.30	5.50-18	9.00
4.75-19	6.70	5.50-19hd	11.20
5.00-19	7.20	6.00-19hd	12.45
5.25-18	8.00	6.50-19hd	14.30
5.25-21	8.80	7.00-20hd	17.10

Other sizes proportionately low

**YOUR ALLIES in Codling Moth Control**

Enlist the aid of these two sturdy fighters in your war for Codling Moth control! They are two of S-W's time-tried and proved insecticides.

**S-W ARSENATE OF LEAD**      **S-W KILLEX**

● This product is guaranteed to contain at least 98% lead arsenate. Further, the special air floating process used in the manufacture of S-W Arsenate of Lead creates a different shaped lead particle, thus causing more to cling to the fruit and foliage than with ordinary brands. No filler or spreader is added. So the visible heavier coating of S-W sprayed trees means that more Codling Moth killing spray actually remains on the fruit.

● S-W Arsenate of Lead can be removed by a single alkaline or acid wash, despite the heavier coating. One packing house in Yakima reported no samples of S-W sprayed apples over the lead tolerance (season of 1933) out of 347 analyses. The fruit was cleaned with a single acid wash.

● S-W KILLEX is the most satisfactory Arsenate of Lead substitute known. It employs arsenic as the active killing agent and contains no lead oxide—thus simplifying the washing problem. Its effect has been proved as permanent as Arsenate of Lead sprays, and scores of growers use KILLEX exclusively for their Jerez Codling Moth spray. KILLEX contains no more than S-W Arsenate of Lead. It contains no abrasives that will injure spray pumps.

● An exceptionally effective spray is a combination of S-W Arsenate of Lead and S-W KILLEX. Simply use 1/2 Arsenate of Lead and 1/2 Killex. They mix readily, and as the lead deposit on the fruit is obviously reduced, the washing problem is simplified.

● S-W TAPSO FLAKES—The latest development in tar soap sprays that make S-W Arsenate of Lead sprays even more effective by increasing the deposit and producing an even coating.

The Sherwin-Williams Horticultural Advisor will gladly cooperate in suggesting an effective and yet economical spray program.

"BETTER CONTROL WITH LESS SPRAYS"

OFFICES AND WAREHOUSES IN PRINCIPAL CITIES

REDUCED PRICES DO NOT MEAN REDUCED VALUE

**Every Ford V-8 model has a V-8 ENGINE 85 HORSEPOWER 112 IN. WHEELBASE**

**\$505 and up**

F. O. B. DETROIT

The only change in the Ford V-8 is the change in price. Lower price does not mean any change in basic materials or in engineering. For Ford has only one standard.

There is only one Ford V-8 car chassis. It gives you a full 112" wheelbase. It is a powerful car—developing a generous 85 horsepower. It has the only V-8 engine in a car selling for less than \$2500.

Despite its bigness, its roominess and its power, the new Ford V-8 is the most economical car Ford has ever built. You save money on gas and oil every mile you drive.

Examine the new Ford V-8. Look at costly cars. The more high-priced cars you inspect... the more Ford V-8 features you'll see!
