

MEDFORD PLANS EUGENE CARAVAN FOR CELEBRATION

C. of C. to Enter Stage Coach in Pioneer Parade — May Send Princess — July 26, 27 and 28 Are Dates

According to plans made yesterday afternoon, Medford will participate in the Oregon Trail celebration at Eugene, July 26, 27 and 28, it was announced by Dr. R. E. Lee, chairman of the inter-city visitation committee of the Chamber of Commerce.

Medford's participation will include a coach in the pioneer parade for Friday morning, the possible selection of a princess to participate in the coronation of the queen, and a train caravan leaving Medford Thursday morning and returning Friday night.

Dr. Lee telegraphed the Eugene authorities yesterday that the coach was available, and it is understood that those conducting the celebration will arrange for transportation within a day or so.

"Eugene was very well represented at the recent jubilee here," Dr. Lee stated, "and we hope that we can have a nice delegation to go to the northern city next week."

A minimum of 31 persons must sign up for the train caravan which leaves here Thursday morning at 10:55, arriving at Eugene at 5:20 p. m., and leaves Eugene Friday at 12:05 midnight, arriving here Saturday morning at 8:50 o'clock. The first class fare, round trip, is \$6.25, and standard sleeper for the return trip rates are \$2.25 for lower and \$1.85 upper.

Those who can possibly make the trip are urged to communicate with Dr. Lee or the Chamber of Commerce immediately, so that reservations can be made with the railroad officials. It has not yet been determined whether Medford will have a princess but Dr. Lee and his committee are working on this today and will announce the results of their work at a later date.

The royal coach used in the pioneer parade will be the one taken to Eugene to participate in the parade there, and, with the necessary number for the train trip, Medford will be very well represented.

To banish these pests in a big way just sprinkle Bu-hach where they appear — across their trails (following them to their burrows if possible), and in cracks and crevices.

Bu-hach makes short work of insects — pests though it is guaranteed safe for human beings and animals.
