

MINISTER CHANGES IDEAS ON DIVORCE ASKS ONE HIMSELF

FARM PRODUCTS CONTINUE MOVE HIGHER LEVELS

Ex-Brooklyn Pastor Says U. S. Laws Archaic — Dogmatic Teachings No Longer Accepted by Intelligent.

JUAREZ, Mexico, Aug. 3.—(AP)—Discussing his action for divorce, filed in the civil court here yesterday, Dr. Jeffrey Jennings, former Brooklyn, N. Y., pastor declared that a growing conviction that the laws of the United States governing social relations between men and women are archaic, led him to resign as pastor of the Episcopal church of Brooklyn, and to file suit for divorce.

"Intelligent people no longer can accept the dogmatic teachings of the church," he said.

"Change is a fundamental law of progress. I found myself at the crossroads. I could go on teaching things I no longer believe, or I could resign and be honest with myself. I chose to resign."

"I believe in divorce as a method of correcting errors in married life. I do not think it should be made a cheap thing of no consequence, or that it should be permitted to break up the home.

"In certain cases, where marriage no longer is possible, where one mate's intellectual interests clash with the other, divorce is the proper course."

His grey eyes twinkled, and a smile played over his handsome features as he pushed back a mass of grey hair.

"I didn't always feel that way about divorce," he admitted.

"I've preached dozens of vitriolic sermons about the evil of divorce."

WASHINGTON, Aug. 3.—(AP)—The announcement from Mexico today that all Mexican "mail" divorces granted to Americans in recent years probably would be overthrown in American courts came as no surprise to officials here who have steadily warned against legality of such divorces.

The Mexican mail divorce situation became acute about two years ago when officials in the state of Chihuahua, which borders on the United States, set up its mail order divorce law, which officials there frankly admitted were designed to catch the lucrative American divorce business.

The original divorce "mills" in Mexico were in the states of Yucatan and Morelos, where hundreds of prominent Americans obtained "one way" divorces within the last ten years. These states required residence of only one of the parties to the action and specified that reasonable effort be made to advise the other party of the pending action.

MARTINS FERRY, O.—(UP)—While the nation has sweated, eastern Ohio's coal miners have worked in the comfort of equable year-round temperatures. Their only difficulty has been the loosening of rocks through condensation of fumes. These fall, generally near the outside of the mine, have tied up coal hauling.

The national level of farm prices in mid-June was 77 per cent of pre-war, but since the middle of June farm prices have continued to advance on all major Oregon commodities except cattle and lamb, says the latest report on the agricultural situation and outlook issued by the agricultural economics department of the extension service. Wheat and dairy products, the two most important Oregon products from a standpoint of cash farm income, have shown the greatest strength.

"Compared with a year ago, the June price index of grains at 89 was up 26 points; fruit and vegetables at 108, up 34 points; meat animals at 64, down 3 points; dairy products at 76, up 11 points; and chickens and eggs at 69, up 14," says the report.

"On June 18 the purchasing power in percentage of parity of leading commodities grown by Oregon farmers was as follows: Corn 72, oats 80, barley 67, wheat 73, rye 65, flaxseed 81, hay 67, potatoes 16, apples 104, hogs 40, beef cattle 63, veal 55, lamb 89, sheep 54, eggs 67, wool 102, horses 47 and chickens 81."

Purchasing power of farm products generally in the United States was about 63 per cent of pre-war.

The heavy hay crop of western Oregon has largely offset the shortage east of the Cascades, so that the total crop will be nearly equal to the 1.9 million tons produced last year and a little in excess of the five-year average.

United States hay crops will be exceedingly short due to low yields and use of meadow lands for pasture in the drought area. Emergency hay crops and the cutting of small grains for hay will partly offset the reduced yield from meadows. Total production of all hay is expected to total about 57.5 million tons. During the last 15 years, annual production has averaged around 85 million tons.

No serious fruit shortage will occur this year, the report states. Production of soft fruits in the eastern states was curtailed somewhat, but it now appears that the production of late fruits, except apples, will equal or exceed that of a year ago. Oregon, Washington and Arkansas are the only important apple states where the production is expected to equal that of last year.

British Police Given 4 Skulls. TEDDINGTON, Middlesex, Eng.—(UP)—A cautious gentleman handed the Teddington police a trunk containing four human skulls and 80 arm and leg bones, which, he stated, had been in his garden for the past 25 years. He said he could have buried it, but was afraid someone would dig it up and accuse him of murder. The bones were collected by his father about 1874, when he was engaged in demolition at St. Giles Within Church, London.

WASHINGTON, Aug. 3.—(AP)—The use of wood alcohol as a denaturant, discontinued during the prohibition era in the wake of much congressional criticism because of resulting deaths, was again authorized today by the internal revenue bureau.

GROCETERIA SUPER FOOD MARKETS

BREAD AND CAKES LIKE MOTHER MADE

What Are Bakery Substitutes? —

Bread Is Your Best Food — If Pure

We've said a lot about about substitutes and that we never use them.—Now, let somebody else tell you just what they are.

- 1—Consumer's Research, Inc., in "100,000,000 Guinea Pigs," says:—"Bread may be the most dubious food we eat. With most yeast in commercial baking there are used 'yeast foods' potassium bromide, and other chemicals. French officials consider them harmful and have banned their use."
- 2—The Encyclopedia Britannica says:—"The carbon dioxide may be introduced by the agency or certain chemicals.
 - 1—Tartrate powders:—Tartrate powders have the disadvantage that they frequently contain lead—a poison.
 - 2—Phosphates:—A form of phosphoric acid.
 - 3—Alum powders:—Contain potassium bisulphate and alum.—It is generally admitted that by the use of alum more or less eatable bread may be baked from flour which otherwise could hardly be made into bread at all."

ENGLAND, France and other countries forbid their use because they believe them detrimental to health. What isn't good for them surely can't be good for you.

OUR BREAD CONTAINS THE FOLLOWING INGREDIENTS AND NO OTHER:
SPERRY'S FINEST FLOUR—CANE SUGAR — FLEISCHMAN'S YEAST—MILK —SHORTENING—SALT—PLUS MEDFORD'S PURE WATER.

It's pure—wholesome—clean and no so-called "yeast foods" or chemicals of any kind are used in its preparation.

Beside its purity—there is that real home flavor—possible under no other conditions.

1 lb. LOAF 8c
1 1/2 lb. LOAF 12c

Home Purity Bakery

Purity in cakes and pastries is just as essential as in bread—Using none but Home formulas we have no need for any but the ingredients you would use in your own home.—This accounts for the unusually fine quality of our cakes and pastries,—is why your own baking is their only rival.

A CHALLENGE TO CAKE QUALITY

Dixie Chocolate Pecan Angel Cake
Our regular delicious angel cake impregnated with rich chocolate and tasty pecan kernels.—Heavily iced with chocolate. No advance in price.

- 1/2 Cake 25c
 - Whole Cake 49c
 - Cookies—any kind, assorted 2 doz. 25c
 - Cinnamon Snails 6 for 10c
 - Parker House or Napkin Rolls Doz. 15c
 - Iced Cherry Buns 6 for 12c
 - Butter Horns Each 5c
- Real Home Quality Without the Fuss and Worry—

Fruits and Vegetables

- Red Rhubarb 4 lbs. 15c
- Bunch Vegetables 3 for 10c
- Large Fancy Celery 2 for 25c
- Fancy Celery Hearts Each 15c
- Summer Squash—many kinds Lb. 3 1/2c
- Large Fancy Cucumbers 3 for 10c
- Fresh Green Peas 2 lbs. 19c
- Egg Plant 2 for 15c
- Home Grown Tomatoes 2 lbs. 9c
- Large Green Peppers 4 lbs. 15c
- Blue Lake Green Beans 3 lbs. 10c
- Home Grown Cantaloupes—27 size 3 for 20c
- Sunkist Oranges—252 size Doz. 25c
- Sunkist Lemons—360 size Doz. 25c
- Calavos—(avocados)—large size 2 for 35c
- Strawberries for Canning—(15-cup crate) \$1.15

SUPER MEAT MARKET

The Harvest Season Lunch Box

Preparing a lunch day after day is a hard job, ordinarily—but easy if you add variety by the use of our Luncheon meats. Those little surprises that make the lunch appreciated are here for you in wide variety—nearly every known cooked luncheon meat—in an assortment if you prefer.

Try this special assortment tomorrow for a better lunch with less worry.

- Assorted Luncheon Meats—Lb. 25c
- Our Own Meat Luncheon Spread—(taste it)—Pt. 25c
- Fancy Dry-picked Hens—3 1/2 to 4 1/2-lb. size—Lb. 19c
- Rabbits—Fancy Fryers—Lb. 20c
- Steer Beef Roast—Lb. 10c
- Wisconsin Wheel Swiss Cheese—Lb. 25c
- Boned and Rolled Shoulder of Lamb. Lb. 18c
- Shortening—4 lbs. 35c
- Bacon—right from the corn belt—any size piece—Lb. 22c
