135,500 DEATHS

Annually in these United States, 135,500 people die from insect-borne diseases. Unbelievable, but true—flies laden, germ carrying insects cause more deaths than suicide—bumkide—traffic—up—all other accidents combined.

WHAT IS THE ANSWER?
 Flies are the filthiest things that live. Do not allow them to carry filth and germs into your home. Insects are your family's most dangerous enemies. Mosquitoes inject a poisonous fluid into the blood before they can draw it into their bodies. That causes the swelling and spreads disease.

There is only one FLY-TOX. Insist on the genuine.
