

FIND QUEER FISH IN DRYING LAKES CENTRAL OREGON

PORTLAND, Aug. 9.—(AP)—In the small, tepid and yellowish waterholes in the wide expanse of land embraced by south central and southeastern Oregon, strange forms of fish life—species believed yet unclassified, have been found.

Dr. Carl L. Hubbs, ichthyologist of international repute, who led an expedition into the fast vanishing desert lakes, is reported by word received here to have netted several strange types of fish from the holes of the area—a region once covered to great depths by a pre-historic inland sea.

A strangely stunted fish about five inches in length, and believed by Dr. Hubbs to be the descendant of a race of giant fish that inhabited the great Oregon sea, is regarded as the most important of the specimens so far taken. Some newly-discovered sub-species of other forms of fish life were caught in water areas of Klamath and Lake counties. Several most unusual forms of crustaceans were found in the underground lake in the Malheur cases—water barren of fish life.

All these are to be sent to Dr. Hubbs' laboratory at University of Michigan for classification. His research will continue until September.

MABEL MACK TO ACT AS LEADER

Mrs. Mabel C. Mack, county home demonstration agent, has been called to Corvallis to serve as acting state leader of home economics extension during the absence of Miss Claribel Nye, state leader. Miss Nye has been called to Washington, D. C., by the federal relief administration, to serve as technical advisor on home economics projects.

Miss Nye is one of a number of specialists in her field who have been "drafted" by the government to assist in various phases of the recovery program within the last few months.

During Mrs. Mack's leave of absence from Jackson county, Miss Alice Mallin of Oregon City will serve as acting home demonstration agent. Miss Mallin arrived Tuesday from Lin county, where she has been a temporary home demonstration agent for the past two months in charge of the relief canning program.

Mrs. Mack will leave for Corvallis Saturday.

Sales of Newest Goodyears Show Public Approval

Unprecedented sales have resulted since the public announcement of the Goodyear "G-3" tire on April 29, according to C. C. Furnas, of the Medford Service Station, local dealer for the Goodyear Tire & Rubber Co.

"The new 'G-3' All-Weather sky-rocketed to success," Mr. Furnas asserted. "It took Goodyear over 24 months to perfect it, but it met with immediate public acceptance within 24 hours after its announcement."

"There are a number of reasons why the 'G-3' has become so popular. Included are a wider, flatter tread, giving greater road contact; more diamond blocks in the center of the tread for additional safety; an average of two pounds more rubber per tire; wider riding ribs; narrower and deeper grooves—all of which sum up 43 per cent more non-skid mileage in the 'G-3' over old style tires.

"In addition, the tire may be purchased for the present at the same low price, but restrictions on crude rubber may affect tire prices, and it seems reasonable to expect that anyone purchasing tires now will be saving money besides getting the benefit of new tires during the hot summer months, and sure-footed traction during the winter when wet, slippery streets are the rule," Mr. Furnas continued.

MILLIONS OF CHINESE SUFFERING IN DROUGHT

SHANGHAI, Aug. 9.—(AP)—Reports to the national government from the drought-stricken province of Anhwei said today that 30,000 men, women and children are facing starvation, being virtually without food and water.

While these victims of the severe heat and drought were more seriously affected than any others in China, literally millions throughout the country are suffering in varying degrees.

SALEM, Aug. 9.—(AP)—The state banking superintendent has no legal right to release any securities of national banks deposited with the department in order to carry on a trust business, except by court order, the attorney-general held in an opinion today, requested by A. A. Schramm, state banking superintendent.
