GLUT IN WHEAT SUPPLY REMAINS WORLD PROBLEM

Necessity for Government Measures to Bring Profits for Farmers Still Exists Is View at Conference

By ALBERT W. WILSON Associated Press Foreign Staff. LONDON, Aug. 15.—(AP)—That necessity still exists for government measures to bring wheat farmers a satisfactory margin of profit was stressed at the opening session today of the international wheat conference...

A review of the current situation disclosed that the wheat "diplo-mats" expect the 1,000,000,000-bushel glut or world stocks will be considerably relieved as a result of the universal drought...

But we still have far to go if we want to safeguard the world against the danger of grave crises in the future, said a conference spokesman.

The drought will go a long way this year toward getting rid of the world's surplus but we are convinced it will not go as far as recent reports indicated. Furthermore, we cannot count on similar favorable prospects next year and the year after.

A summary of drought results made at the meeting brought out that Argentina alone of the big producers will have a good crop. But big carryovers were found still to be a serious menace.

Just back from a European tour, Andrew Cairns of Canada, secretary of the world wheat commission, said he found that France, Yugoslavia and Hungary especially will have a larger carryover than was anticipated earlier.
