Grunow TRUE **ALL-WAVE RADIO**

At last you can enjoy the thrill of world broadcasting without the two greatest annoyances that have heretofore troubled listeners-weak signal strength of foreign stations and "passing over" many short-wave stations without knowing they were on the air.

In the Grunow truly all-wave receivers-and in the Grunow alonethere is incorporated the "Signal Beacon," a device that literally tells you: "Here's Madrid," "Here's London," "Here's Buenos Aires." The Grunow "Signal Beacon" is the result of arduous work and long experiment on the part of two of radios greatest scientists-backed by an expenditure of hundreds of thousands of dollars to make this amazing achievement possible.

Eyestrain is dangerous and glasses are inconvenient. BUT electric bill.

> nothing else you can buy will give you as much comfort, good health and convenience as electricity. Keeping your toaster on the shelf on entire month would save less than enough on your electric bill to buy one gallon of gas for the car. When you are away in the evening, a dark house is an invitation to burglars. One light left on costs less than one cent an evening and is excellent burglar insurance. The difference between an abundance of light for safe, comfortable seeing anywhere in the living room, for all of the family, and one small light around which everyone tries to crowd, would save less than enough on the electric bill to take the entire family to the movies once. Yes, you con save on your electric bill . . . but at what a socrifice!
