Twenty-ninth Year

HAUPTMANN'S ALIBI SHATTERED

By PAUL MALLON. (Copyright, 1934, by Paul Mallon) WASHINGTON, D. C., Oct. 2.—The most significant inside news of politics right now is that the administration is sending out corn-hog checks at the rate of \$1,000,000 a day.

This money is going to 1,250,000 farmers who have about 6,000,000 votes in their families. And the election is only a month away.

It seems that it is just another of those happy coincidences which always happen nowadays to aid the new dealers, who are, as you must know, mere babes in the political woods.

One thing, however, cannot be denied. The smartest politicians in the world could not have done the corn-hog job any better.

It is no wonder the Republicans are having a hard time trying to make the coming congressional election look like a first-class argument.

More significant is the case of an eastern republican congressman, who has served several terms. His friends always have taken his re-election as a matter of course, but he dropped into town a few days ago with word that he did not expect to win this time.

There is nothing doing in the contest over the speakership of the house. The contestants have not been able to get very far in obtaining pledges of support. A lot of congressmen were left out in the cold when the deal was made for the speakership two years ago.

It is not generally known that there are a number of large industries without codes, notably telephone and telegraph, packing, all dairy products, natural and manufactured gas and tobacco. Nearly all are operating under the president's re-employment agreement.

Those on the inside at NRA say that labor advisers objected to about 40 per cent of the codes now in effect.

Walter Hamilton of the new NIRA board was the liberal who led the Amherst college fight to prevent the ousting of President Meiklejohn.
