Wall St. Report

NEW YORK, Dec. 26.—(AP)—The stock market was again unsettled by selling in the utilities today. Several industrialists tried to go against the downward trend elsewhere early, but the tone of the general market turned rather heavy in the afternoon, and losses of fractions to a couple of points were numerous at the finish. Sales approximated 1,000,000 shares.

COLDS YIELD TO HOT WINE CURE

PARIS.—(UP)—Warm Bordeaux or Burgundy, served with a whiff of cinnamon, now is discovered to be the best cure for colds, influenza and other ills. Cafes along the Grand Boulevards are the first to discover that there is money in hot wines as a popular drink.

It is advocated for babies and grandmothers, and since Parisians insist upon sitting on outdoor terraces even during the cold months, the hot wine vogue is proving a popular one. Calculating proprietors of cafes say that the hot wine did should reduce the amount of coal they must buy to stoke the stoves which are used to supply a modicum of heat on the open terraces.

15 KILLED WHEN EXCURSION TRAIN HIT BY EXPRESS

(Continued from Page One) day for additional victims as officials of the Canadian National Railway opened an investigation of a collision last night which took at least 15 lives.

More than a score of persons were injured, some critically, when the Detroit to Toronto express tore into the rear of the stationary excursion train on a siding at Dundas, seven miles from Hamilton.

Five women were among the mangled victims of the disaster whose bodies have been recovered but as yet are unidentified. Additional deaths were feared.

Laden with merry holiday travelers, the excursion train was bound from London, Ont., to Toronto. Most of the victims, all of whom apparently were Canadians, were residents of those two cities.

Two wooden cars at the rear of the excursion train, which had been switched onto a siding because of a "hot box," were crushed and many passengers, screaming in agony, were pinned for hours beneath the wreckage.

The alertness and quick thinking of Engineer E. Burrell of the speeding train from Detroit, No. 16, was credited by railway officials with having averted an even greater tragedy.

Seeing no hope of preventing the locomotive from plowing into the rear of the special train, Burrell ordered it cut loose from the coaches behind and prevented them from telescoping.

In contrast to the terrific crash when the giant engine struck the wooden coaches, there was only a slight jolt when the express cars rolled up to the wreckage.
