

SECOND JOURNEY TO STRATOSPHERE SLATED IN SPRING

Lessons Learned in Geographic Society's Project Last Year Will Be Aid to Next Venture, Is Belief

WASHINGTON, D. C.—(Sp.)—Another expedition into the stratosphere early next summer in a balloon of three or more cubic-foot capacity, under the joint auspices of the National Geographic Society and the U. S. army air corps, has been announced by Dr. Gilbert Grosvenor, president of the National Geographic Society.

Problem of Torn Fabric Solved Captain Albert W. Stevens, scientific observer and internationally famous aerial photographer, will be in command of the balloon, which will be piloted by Captain Orville A. Anderson.

First Lieutenant Randolph P. Williams, Langley, Field, Virginia, will probably be assigned to have charge of ground operations for the flight. "The decision again to send observers and scientific instruments into the stratosphere by means of a large balloon," says Dr. Grosvenor's statement.

Will Rise From Black Hills "It was found after careful examination and tests by the special committee, working with the assistance of the United States bureau of standards, that the tear in the under fabric resulted from a sticking of that fabric when it was folded partly up into the main bag of the balloon.

"A continuation of the explorations in the high regions of the atmosphere is considered important and desirable to check and test data already obtained, to make additional photographic studies, to bring back samples of stratosphere air, and to make certain other new scientific studies. The expedition will place special emphasis on information that can be obtained only from a manned balloon capable of lifting standard laboratory instruments."

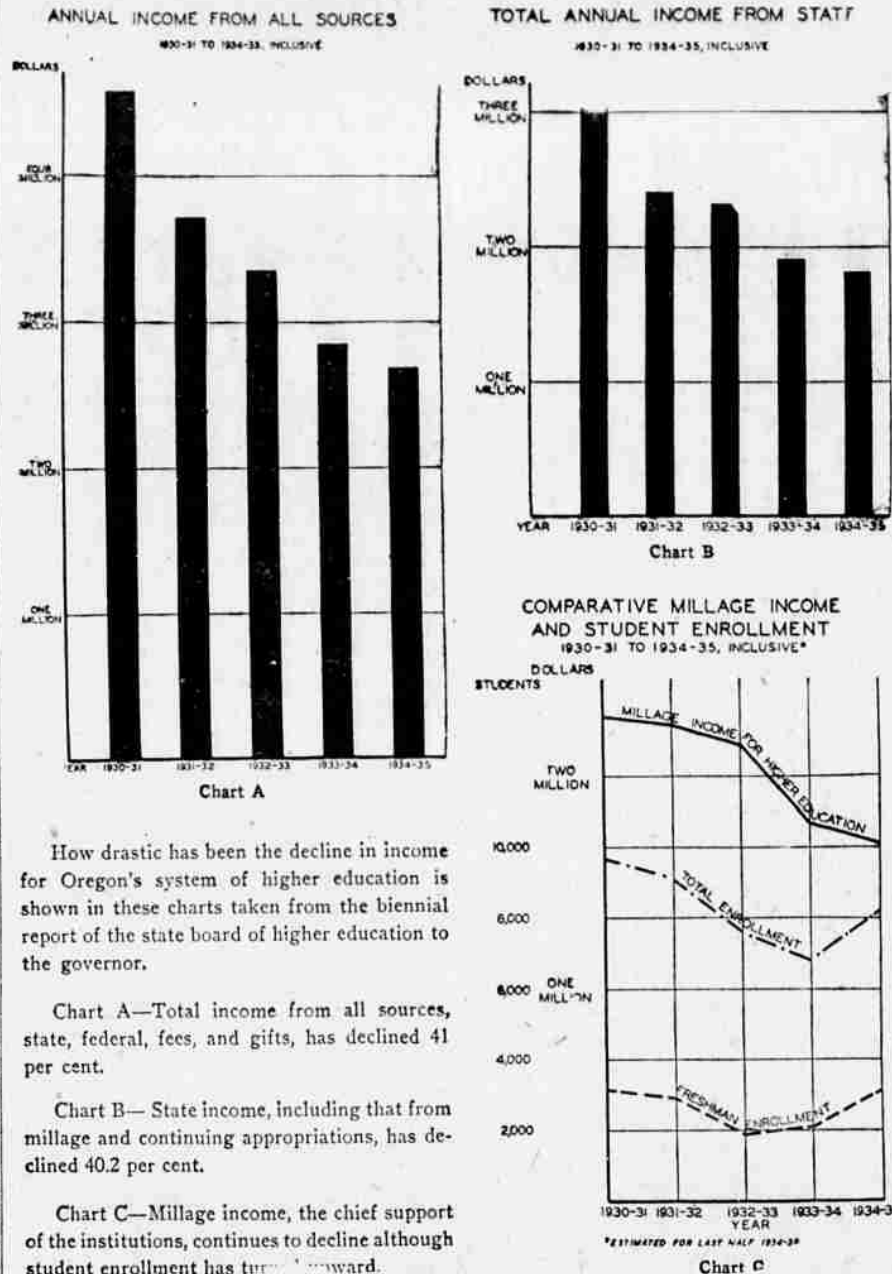

Divorced by Eraser. SURINGFIELD, (UP)—Mary Thomas Keyer wanted to change husbands, so she chose the easiest way. She used some ink remover to obliterate the name of Frank Keyer from her marriage license and inserted that of Everett Baker, also changing the date of the marriage from 1932 to 1934.

Two of the National League's star catchers broke into the 1934 averages among the second basemen—Manager Jimmy Wilson of the Phils and Al Lopez of the Brooklyn Dodgers.

Thousands have journeyed to MINERAL WELLS, Texas for BETTER HEALTH

Now THE GREAT POWER OF MINERAL WELLS IS BROUGHT TO YOU... Certified MINERAL WELLS CRYSTALS

CHARTS SHOW HIGHER EDUCATION INCOME DROP

How drastic has been the decline in income for Oregon's system of higher education is shown in these charts taken from the biennial report of the state board of higher education to the governor.

Chart A—Total income from all sources, state, federal, fees, and gifts, has declined 41 per cent.

Chart B—State income, including that from millage and continuing appropriations, has declined 40.2 per cent.

Chart C—Millage income, the chief support of the institutions, continues to decline although student enrollment has turned upward.

UNIVERSAL JOINT IS INVENTED TO REMOVE TRAILER OBJECTIONS

After two years' work, G. J. Shafer of Jacksonville has completed a model for a universal-joint coupling unlike any trailer hitch on the market.

Demonstrating with the model at the Mail Tribune offices yesterday, the inventor pointed out that with its use there would be absolutely no strain on an automobile to which a trailer was fastened.

There is no limit to the angle at which this joint can turn, the inventor explained, and even should a trailer roll over and over, the car to which it is fastened would not be jerked about.

Shafer, a mechanic-machinist and cabinet maker by trade, has completed and put into use one section of the hitch and states that he has already had offers from many to buy the complete device if he could have it manufactured.

To Yakima—Having been in Medford for the last week attending to business with local agriculturists, A. L. Ryall of the U. S. department of agriculture, left this morning on the Shasta for his headquarters at Yakima, Wash.

Provost Calls—Don Provost of Ashland made a business trip to Medford Thursday morning, according to the Ashland Tidings, which also stated that Harry Silver of Ashland was a business caller in Medford Wednesday.

Golden Slipper to Reopen. HILL CITY, S. D.—(UP)—Resumption of activities at the Golden Slipper

Is Told She Lies

A dramatic incident occurred during the trial of Bruno Hauptmann at Flemington, N. J., when Mrs. Hauptmann cried out, "you are lying" to Mrs. Ella Achenbach (above) as the latter testified to a conversation between her and the defendant's wife.

per abashed is expected shortly, following announcement that the pit is unwatered. The mine has not been operated for 30 years.

Washington State college has added another dual track meet to its 1935 program, taking on the California Bears at Berkeley. The date is set for March 30.

Hockey teams in the Northwestern Professional league were consistent losers this season, all five of the clubs dropping their first home games.

LOCALS

Precipitation Noted—The weather bureau at the municipal airport reported this morning that a trace of precipitation was recorded during the 12-hour period ending at 5 p. m. yesterday, while during the following 12-hour period .01 of an inch was noted.

Will Select Apparel—Mrs. E. T. Burelson left here last night on the Shasta for Los Angeles, where she will remain for the next two weeks. In addition to visiting friends, Mrs. Burelson will select spring apparel for Burelson's ladies' ready-to-wear store before returning to Medford.

Johnson, Not Robinson, at Port-Geo. R. Johnson is the senior radio operator at the new radio airways station at the airport, not G. R. Robinson, as reported yesterday in this paper, it was learned today. His assistants will be E. C. Dickes and M. F. Meera.

Name Misspelled—Due to error, Hans Engell's name was misspelled in the report of the long distance ski race on the Siskiyou last Sunday. Mr. Engell is a former Swiss army champion ski racer, where he made 153-foot ski jumps. He says lack of time to practice is a handicap now.

Improper Licenses—Two arrests for improper license on automobiles are on file at the state police headquarters, one showing the arrest of Charles Wilson, Crescent City, who appeared before Justice Coleman yesterday and received a fine of \$5 and costs, and Irving Bean, Rogue River, on the same charge, who was scheduled to appear Thursday in Justice Reed's court in Gold Hill. The fine against Wilson was remitted.

KEEP ON TOP O' THE WORLD

When you're feeling well, you're usually happy. Life is at its best. But when you're sick and blue, days lose their zest. You lack enthusiasm.

Common constipation, due to insufficient "bulk" in meals, is an enemy of happy living. It frequently causes headaches, loss of appetite and energy. Correct it by eating a delicious cereal.

Kellogg's ALL-BRAN is a natural food for normal persons. It furnishes generous "bulk" to aid elimination. ALL-BRAN also provides vitamin B and iron.

Isn't this gentle food safer than risking patent medicines? Unlike cathartics, it remains effective with continued use. Two tablespoons daily are usually sufficient. Chronic cases, with each meal. If not relieved this way, see your doctor.

Serve ALL-BRAN as a cereal with milk or cream, or use in cooking. Sold by all grocers. In the red-and-green package. Made by Kellogg in Battle Creek.

Keep on the Sunny Side of Life

CULINARY CRAFT....

By Estella Dorgan, Director, Home Service, the California Oregon Power Company

Fish in the Menu. When quantities of smelt appear in the market, as has happened lately, a promise of early spring seems to greet us.

And early spring is the time we use fish generously in the variation of our menus which have grown heavy, and a bit tiresome perhaps through the winter season. There is hardly a food which so gracefully works into our plans for any time of the year.

Estella Dorgan says, it is delicate in flavor if carefully handled and combined beautifully with other foods, so is ideal as a helper in this season.

There is a tendency in most families to specialize on one fish, for instance the popular tuna. It will be served "creamed" until all pleasure in its appearance has been worn out. Maybe it is salmon that you purchase and use continuously. Why not try using a little imagination and enjoying a bit of novelty in the preparation and serving of fish? I'm sure you will find new friends and, perhaps, a new "stand-by" in the process.

For Breakfast. Cookfish on Toast. Cut the codfish into small pieces, cutting across the grain. Rinse in hot water several times until freshened.

2 tablespoons butter 2 tablespoons flour 1 cup milk 2 hard cooked eggs 2 tablespoons dried celery 1 cup shredded codfish Salt and pepper to taste Toast triangles. Make sauce of the melted butter, flour and milk. Season and add the cooked eggs, diced, the finely diced celery and the freshened fish. Place a spoonful on each freshly toasted triangle and serve promptly.

Brush with butter or cooking oil and season to taste. Place on heavy paper in broiling pan in preheated oven and cook about 15 minutes (until just done.) Serve immediately, plain or with a small amount of hot cream. Luncheon. Deviled Crab. Yolks of 4 hard-cooked eggs 2 tablespoons flour 2 tablespoons butter 1 cup cream 1 cup flaked crab meat 1 tablespoon chopped parsley 1 cup buttered crumbs. Mix all ingredients well and season to taste. Place on buttered shells or in buttered casserole. Bake at 375 degrees for 15 minutes if using casserole.

Tuna a la King. 1 large can of tuna fish. 1 green pepper, shredded 2 pimientos, cut in tiny pieces 3 hard-cooked eggs, diced 2 cups medium white sauce. Wash and dry the large oysters. Dip in batter and fry a golden brown in deep fat. Drain and serve hot with lemon and parsley garnishing. Batter: 2 eggs 1/2 teaspoon salt 1/2 teaspoon paprika 1 cup flour 1 teaspoon baking powder 2-3 cups strained oyster liquor. Dinner. Planked Fish. Preheat the plank, which has been thoroughly oiled. Place the prepared fish in the center of this plank, sprinkle with salt and pepper (brush with butter if it is a very lean fish). Place in oven at 450 degrees for 10 minutes and reduce heat to 350 degrees for 30 minutes. Remove from oven and place border of vegetables around the fish in plain form or make baskets or groups. Garnish and serve promptly.

Baked Halibut. 4 lbs. whole fish 2 slices of bacon 3/4 cups stuffing. Wipe fish and stuff lightly. Sew or skewer into shape and bake one hour at 375 degrees. Stuffing: 1/2 lb. crackers 1 tablespoon butter 1 1/2 cups milk 1 cup canned corn 1 small onion, minced 2 tablespoons chopped celery 2 tablespoons chopped green pepper Seasoning to taste. Heat milk until butter is melted

in it, add vegetables and crumbled crackers. Cool slightly before using. Place strips of bacon on top of prepared fish—or brush with melted butter. Rice Mold With Salmon Sauce. 1 cup uncooked rice 1 1/2 cups milk 3 eggs Salt and pepper to taste. Cook the rice until tender in 3 cups of boiling water. Drain with cold water. Add the milk and well beaten eggs and season. Place in buttered mold (or molds) and bake 35 minutes at 350 degrees. Fill with the following sauce: 2 cups cream sauce 2 cups flaked canned (or baked) salmon 1/2 cup chopped stuffed olives 1 tablespoon catsup 1 tablespoon minced celery Salt and pepper to taste. Fish Rolls. Biscuit dough 1 1/2 cups flaked fish Egg sauce. Make a standard recipe of biscuit and spread out about 3/4 inch in thickness. Spread with the flaked fish and roll. Cut into 1 1/2 inch slices and place in greased muffin tins. Bake 25 minutes at 450 degrees. Serve hot with an egg sauce. Garnish with parsley. Egg sauce: 1 1/2 cups thin white sauce 2 hard cooked eggs, diced 1 teaspoon paprika Salt and white pepper to taste.

A New Way. FOSSIL. Ore.—(UP)—Two councilmen insured continuance in office for two years more by failing to post notice of election. Citizens who went to the city hall to vote were informed the city election had been called off.

22 to 43% LESS ENGINE WEAR WITH TRITON MOTOR OIL. Shown by laboratory tests and 60,000-mile, 60-day stock car road run. UNDER identical conditions of speed and temperature an automobile engine was run in a series of 1,000-mile tests with high-grade "Eastern" and "Western" oils, and TRITON. After each 1,000 mile period, the oil was drained from the crankcase and scientifically analyzed to determine its iron content. This gave a comparison of the cylinder wear occurring during the time each oil was being used, because the metal worn from cylinder walls, rings, and pistons was carried into the crankcase by the oil. The analyses of the various oils showed that Triton reduced engine wear from 22 to 43%—depending on the oil used—22% in the case of the Eastern oil and 43% in the case of the Western oil. The results of these wear tests were backed up by cylinder measurements of a stock car driven 60,183 miles in 60 days with Triton motor oil. These measurements, made by Prof. R. L. Daugherty, California Institute of Technology, before and after the run showed less than one-half the normal wear for that distance! Other Ways You Benefit From Triton! Over 250,000 miles of stock car road and speedway runs have shown that: Triton outlasts Eastern or Western oils... forms less carbon and less sludge... is more stable in service... is less affected by temperature... assures easier starting... saves the battery, and reduces cold motor wear. Made by Propene Solvent Process. TRITON is refined by Union's patented PROPANE solvent process, which eliminates all undesirable low-gravity, low-grade materials from the finished oil. Triton is the first 100% pure paraffin-base oil made from California crudes! Try TRITON today! Triton costs only 30c a quart in sealed cans. Now at thousands of independent dealers and all Union service stations. Watch for the big blue and white Triton banner. UNION OIL COMPANY. FIRST 100% PURE PARAFFIN-BASE OIL from California Crudes! Outlasts EASTERN OR WESTERN OILS
