

GOVERNOR OPENS STATE CONCLAVE TO STUDY CRIME

Federal, State, County and City Peace Officers Told Crime a Major Problem — Policy is Outlined

PORTLAND, Ore., March 29.—(AP)—Federal officers, city policemen, sheriffs, state troopers and prosecuting attorneys crowded together in a large conference room here today to undertake a war on crime. More than 300 attended the crime conference called by Governor Charles H. Martin.

Officials from Washington, D. C., known internationally, rubbed elbows with down-country constables as the state and federal governments marshaled their forces to make the drive on crime more efficient in the Pacific northwest.

Carl C. Donagh, United States district attorney here and a delegate to the national crime conference in Washington, D. C., last December, was named chairman of the conference, which has to consider the three phases of anti-crime warfare—capture, prosecution and punishment.

A Major Problem
In opening the conference Governor Martin declared he regarded crime as "one of the major problems of our civilization—a problem that is not confined to any state or nation."

"In his address the governor reiterated his statement that as governor he would treat criminals "with justice but with firmness."

"One of the principal causes of our present crime problem is the excessive and ill-advised use of the pardoning power," Martin continued. "I have before me the list of pardons of the governors of Oregon in the last 12 years, which shows the record of the convicts since release."

"I am advised that this record is necessary only fragmentary, but it demonstrates only too conclusively the fact that a large percentage of those pardoned have committed sub-

sequent criminal offenses. One convict who was given a full pardon was subsequently returned to the state penitentiary two times. Another pardoned convict later served time in the New Mexico and Utah state penitentiaries and on McNeil's Island. I, therefore, have determined that except in most unusual circumstances I will not pardon criminals.

To Aid Rehabilitation
"Insofar as it is possible for me to do so, however, I shall give every aid to the rehabilitation of convicts from war worthy and capable of reform. With that thought in mind I approved senate bill 405, which provides that any time prior to the expiration of the convict's maximum sentence and after the expiration of his minimum sentence, the governor on his own motion or on the written recommendation of the state parole board may parole the convict and employ him on public works for not longer than six months at the going wage."

"I have also approved the establishment of special reading courses for prisoners in our state penitentiary by the state library. You would likewise be interested to know that the University of Oregon has inaugurated special correspondence courses of instruction for the benefit of the prisoners. These measures have my approval and will have sympathetic administration."

NEW DEAL CALLED FOR BELGIUM ON MONETARY EVILS

Program Announced by Premier Places Country Provisionally Off Gold Standard — Belga Value Cut

By EDUARD TRAU
Associated Press Foreign Staff
BRUSSELS, March 29.—(AP)—Premier Paul Van Zeeland today proclaimed a new deal for Belgium, with the value of the gold belga cut "a maximum of 30 per cent" and with sweeping economic and monetary reforms to be rushed into effect.

Political observers expected parliament, to which Van Zeeland announced the program, to give the government a vote of confidence by a majority of 40 or 50 members.

Van Zeeland stated: "The currency level would not be the same as today, but in no case would it be more than 30 per cent below the present level," and he added that the new regime will go into effect Monday with a provisional cut of 25 per cent in the belga's value.

Cracks Gold Bloc
The premier's announcement cracked the European gold bloc, for the comprehensive program he announced involves the suspension of gold payments by Belgium pending an international agreement on currency policy.

The premier announced the undertaking of great public works schemes, the favoring of industrial production by all possible measures, the reduction of taxes, the guarantee of bank deposits, and a desire to resume diplomatic and commercial relations with Russia.

Although Van Zeeland and his government seem assured of a vote of confidence in the chamber of deputies on this program, lively opposition is expected in the senate. Parliament is expected to debate day and night throughout the week end, including Sunday, before the vote is taken.

The government's program is a result of heavy blows dealt Belgian industries by countries with depreciated currency.

By the government's action, Belgium provisionally is off the gold standard, although she intends to return when an international monetary conference can arrive at world stabilization.

Parliament Astonished
Premier Van Zeeland astonished the joint session of the parliament, before which he made his announcement, when he enumerated the speed and volume of gold withdrawals from the National bank—withdrawals totaling five billion francs since October, 1934, with soaring withdrawals during the present month.

He said that on March 12 gold withdrawals amounted to 50,000,000 francs; on March 14, 10,000,000 francs; on March 15, 34,000,000 francs; and on March 16, during the two hours which preceded the introduction of exchange control, that more than 260,000,000 was withdrawn.

U. S. INCLUSION IN FAR EAST PACT IS TOPIC IN MOSCOW

After this expose, which vividly surprised parliament, the chamber adjourned until 4 p. m.

LONDON, Eng., March 29.—(AP)—The drift of currency quotations in favor of sterling became more pronounced today as the announcement of Belgian devaluation raised fears regarding other gold securities.

The offerings of United States dollars and gold bloc currencies were liberal and rates sagged as the proceeds were invested in British pounds.

Uncertainty regarding the future was indicated by the three months discount rate which in the case of the belga, amounted to 3 to 4 belgas to the pound. Dollar futures, however, carried a 1/2 cent premium.

After touching 4.85 to the pound, the dollar closed at 4.83, 3/4 cent to the pound lower than yesterday.

The French franc closed at 73.50 to the pound as compared to yesterday's close of 73.25.

The belga closed at 25 1/2 to the pound as compared to yesterday's close of 25.

INTERPLEADER HEARING CHANGED TO APRIL 15 BY ORDER FROM JUDGE

Argument on the interpleader suit of Niedermeyer, Inc. Against E. H. Fehl, involving four years in state prison for ballot theft, and his wife and mother-in-law, originally set for the first week of April, has now been changed to April 15, by Circuit Judge Carl E. Wimberly of Douglas county, assigned by the state supreme court to hear the case when the Fehl filed an affidavit of prejudice against Judge H. D. Norton.

The suit is for the purpose of protecting among creditors a judgment awarded by the state supreme court for approximately \$4800, in favor of the Fehl against Niedermeyer, Inc. Creditors include Jackson county, for unpaid taxes, and a \$3000 coat bill against Fehl, for trial in Klamath county, on a charge of venue, and Ted Helmroth of Griffin creek and J. T. Thomas of Ashland, for money loaned to Fehl to purchase the Pacific Record-Herald building at a sheriff's sale.

Answers filed by claimants, allege that Fehl's transfer of the \$13,000

SALEM, March 29.—(AP)—Frank Markovetz, Portland tank house operator, was the only fatality among Oregon industrial workers during the past week, the industrial accident commission reported today. Accidents numbered 375.
