MEDFORD FINANCE INSTITUTION HAS ENVIABLE RECORD

The Commercial Finance corporation, of Medford, under the guiding hand of W. W. Walker, who has had many years' experience in banking and finance, has made a wonderful record since it was organized in 1927.

The company was organized by a group of Medford business men with an authorized capitalization of \$300,000.00. During its entire period of business operations the company has paid its preferred dividends regularly and in full and in addition the common stockholders have received excellent returns on their investment. During this same period the company has issued, sold, and retired more than a half million dollars worth of short time secured notes, a large part of these notes going to individual investors of southern Oregon and banks of the same territory. There has never been a default on either principal or interest on these notes.

In looking back over the past five depression years one might well wonder how a company could fair so well when many other and larger companies were losing money every year and many of them defaulting on their obligations. The answer lies in Mr. Walker's able direction of the company's efforts.

From a small beginning in the first year of the company's history with only one assistant and a volume of business of \$281,000.00 Mr. Walker has built up the business to where there are now seven employees and the volume of business in 1934 was over \$1,000,000.00.

Besides serving the finance needs of Medford and Ashland the Commercial Finance corporation also handles a large part of the commercial paper in Grants Pass, Klamath Falls, and Yreka and the other small towns in southern Oregon and northern California.
